## **Part 1 Principles and concepts**

<b>1 Economics, institutions, and development studies: a global perspective</b>	<b>13</b>
How the other two-thirds live	3
Economics and development studies	7
The nature of development economics	
Why study development economics?: some critical questions	
The important role of values in development economics	
The nature of Western economic theory	
The limited relevance of traditional theory	13
Economies as social systems: the need to go beyond simple economics	16
Third World social systems as part of an interdependent international social system	17
Summary and conclusions	18
Concepts for review • Questions for discussion • Further readings	21
<b>2 Diverse structures and common characteristics of developing nations</b>	<b>23</b>
Similarity within diversity	23
An overview of the diverse structure of Third World economies	24

Size and income level	
Historical background	
Physical and human resource endowments	
Relative importance of public and private sectors	
Industrial structure	
External dependence: economic, political, and cultural	
Political structure, power, and interest groups	
Common characteristics of developing nations	29
Low levels of living	
Per capita national incomes	
Relative growth rates of national and per capita incomes	
The distribution of national income	
Extent of poverty	
Health	
Education	
Low levels of productivity	
High rates of population growth and dependency burdens	
High and rising levels of unemployment and underemployment	
Substantial dependence on agricultural production and primary product exports	
Small-scale agriculture	
Dependence on exports	
Dominance, dependence and vulnerability in international relations	
Conclusion	45
Concepts for review • Questions for Discussion • Further readings	46
Appendix 2.1	48
Relative ranking of fifteen selected Third World countries by various indices of development	
Appendix 2.2	49
Selected social and economic indicators of development: by groups of countries	
<b>3 The meaning of development</b>	<b>56</b>
Everyone wants development, but what does it mean?	56
Two major approaches to the study of economic development	57
The linear stages model	
Rostow's stages of growth	
The Harrod-Domar growth model	
Obstacles and constraints	
Necessary versus sufficient conditions: some criticisms of the stages model	
International-structuralist models	
The neocolonial dependence model	
The false paradigm model	
Conclusions	

Dualism and the concept of dual societies	64
International dualism	
Domestic dualism	
What do we mean by "development"?	67
Traditional economic measures	
The new economic view of development	
Beyond narrow economic criteria	
Three core values of development	
Life-sustenance: the ability to provide basic needs	
Self-esteem: to be a person	
Freedom from servitude: to be able to choose	
The three objectives of development	
Underdevelopment and development: a multidimensional schematic summary	73
Concepts for Review • Questions for discussion • Further readings	77
Appendix 3.1	
The neo-Marxist theory and critique of economic development	79
<b>4 Historic growth and contemporary development: Lessons and controversies</b>	<b>86</b>
The growth game	86
The economics of growth: some basic concepts and illustrations	87
Capital accumulation	
Population and labor force growth	
Technological progress	
The historical record: Kuznets' six characteristics of modern economic growth	93
High rates of per capita output and population growth	
High rates of productivity increase	
High rates of economic structural transformation	
High rates of social, political, and ideological transformation	
International economic outreach	
Limited international spread of economic growth	
Conclusions: the interdependence of growth characteristics	96
Some lessons and implications	97
The limited value of the historical growth experience: differing initial conditions	99
Resource endowment, physical and human	
Relative levels of per capita income and GNP	
Climatic differences	
Population size, distribution and growth	
The historical role of international migration	
The growth stimulus of international trade	
Basic scientific and technological research and development capabilities	

Stability and flexibility of political and social institutions	
Concepts for review • Questions for discussion • Further readings	107–108
Appendix 4.1	
The classification of innovations	109

---

## **Part II Problems and policies — domestic**

A note to the student on the organizational structure and operating procedure for analyzing development problems in Parts 2 and 3

<b>5 Growth, poverty, and income distribution</b>	<b>115</b>
The growth controversy	115
Who gets how much of what?: a simple illustration	116
Some basic concepts: size and functional distributions of income	120
Size distributions	
Lorenz curves	
Gini coefficients and aggregate measures of inequality	
Functional distributions	
A review of evidence: inequality and absolute poverty in Third-World countries	127
Inequality: variations among countries	
Absolute poverty: extent and magnitude	
Economic characteristics of poverty groups	131
Economic growth and the extent of poverty	134
Redefining development goals — growth with improved income distribution	136
The role of economic analysis: redistribution from growth	137
Growth versus income distribution	
The traditional argument: factor shares, savings, and economic growth	
A counter-argument	
GNP as a biased index of national development and welfare	
Constructing a poverty-weighted index of social welfare	
Combining the economics of growth and distribution	
The range of policy options: some basic considerations	145
Areas of intervention	
<u>Policy options</u>	
Altering the functional distribution of income through policies designed to change relative factor prices	
Modifying the size distributions through progressive redistribution of asset ownership	
Modifying (reducing) the size distribution at the upper levels through progressive income and wealth taxes	

Modifying (increasing) the size distribution at the lower levels through direct transfer payments and the public provision of goods and services	
Summary and conclusions: the need for a package of policies	
A final question	
Concepts for review • Questions for discussion • Further readings	151–152
Appendix 5.1	
Factor shares, savings, and economic growth: an illustration	154
<b>6 The population debate</b>	<b>157</b>
Numbers and controversies	157
The basic issue: population growth and the quality of life	158
A review of numbers: population growth—past, present, and prospective	159
World population growth through history	
The structure of the world's population	
Geographical region	
Fertility and mortality trends	
Age structure and dependency burdens	
Birthrates: their relation to income levels, GNP growth rates and income distribution	
The hidden momentum of population growth	
The population debate: some conflicting opinions	171
Population growth is not a real problem	
Some other issues	
A deliberately contrived false issue	
Population growth is desirable	
Population growth is a real problem	
The population hawk argument	
The provision of family planning services	
Human rights	
Development plus population programs	
Goals and objectives: toward a consensus	176
Concepts for review • Questions for discussion • Further readings	178–179
<b>7 Economics of population and development</b>	<b>180</b>
The theory of demographic transition	180
The Malthusian population trap	183
The basic model	
Criticisms of the model	
The microeconomic theory of fertility	187
General considerations	
The demand for children in developing countries	
Some empirical evidence	

The implications for development and fertility	
Some policy approaches	193
What developing countries can do	
What the developed nations can do in their own countries	
How developed countries can assist developing countries in their varied population programs	
Conflicts, tradeoffs, and choices among alternative policies and competing objectives: some final observations	197
Concepts for review • Questions for discussion • Further readings	199
<b>8 Unemployment: Issues, dimensions, and analyses</b>	<b>201</b>
The employment problem: some basic issues	201
Dimensions of Third World unemployment: evidence and concepts	203
Employment and unemployment: trends and projections	
Labor force: present and projected	
Labor underutilization: some definitional distinctions	
Linkages between unemployment, poverty, and income distribution	
The lag between industrial output and employment growth: the misplaced emphasis of the 1950s and '60s	
Economic models of employment determination	210
The traditional competitive free market model	
Flexible wages and full employment	
Limitations of the competitive model for developing countries	
The Keynesian model	
Insufficient demand and the employment gap: the simple model	
Limitations of the model in the development context	
Output and employment growth: conflict or congruence?	
Growth models and employment levels: the conflict argument	
Growth and employment: the congruence argument	
Appropriate technology and employment generation: the price-incentive model	
Choice of techniques: an illustration	
Factor-price distortions and appropriate technology	
The possibilities of labor-capital substitution	
Concepts for review • Questions for discussion • Further readings	223

<b>9 Urbanization and rural-urban migration: trends, theories, and policies</b>	<b>225</b>
The urbanization dilemma	225
Urbanization trends and projections	226
Urban unemployment and underemployment	229
Migration and development	229
The Lewis theory of development	233
The basic model	
Criticisms of the Lewis model	
Migration in developing nations: some general facts	236
The migration process	
Migrant characteristics	
Toward an economic theory of rural-urban migration	238
A verbal description of the Todaro model	
Some policy implications	
The need to reduce imbalances in urban-rural employment opportunities	
Urban job creation is an insufficient solution for the urban unemployment problem	
Indiscriminate educational expansion will lead to further migration and unemployment	
Wage subsidies and traditional scarcity factor pricing can be counterproductive	
Programs of integrated rural development should be encouraged	
Summary and conclusions: the shape of a comprehensive employment strategy	244
Concepts for review • Questions for discussion • Further readings	246–247
Appendix 9.1	
A mathematical formulation of the Todaro migration model	248
<b>10 Agricultural transformation and rural development</b>	<b>251</b>
The imperative of agricultural progress and rural development	251
Agricultural stagnation in the Development Decade	253
The structure of Third World agrarian systems	257
Two kinds of world agriculture	
Peasant agriculture in Latin America, Asia, and Africa	
Latin America and Asia: similarities and differences	
The <i>latifundio-minifundio</i> pattern and resource underutilization in Latin America	
The fragmentation and subdivision of peasant land in Asia	
Subsistence agriculture and extensive cultivation in Africa	
Conclusions	

The economics of small-scale agricultural development: transition from subsistence to specialized farming	269
Stage I: subsistence farming: risk, uncertainty, and survival	
Stage II: the transition to mixed and diversified farming	
Stage III: from divergence to specialization: modern commercial farming	
Stages of farm evolution: a summary	
Toward a strategy of agricultural and rural development: some main requirements	276
Improving small-scale agriculture	
Technology and innovation	
Policies and institutions	
Three conditions for rural development	
Land reform	
Supportive policies	
Integrated development objectives	
Rural development in China: a unique approach	280
The people's commune	
Poverty, employment, and income distribution	
How the Chinese system works: six important factors	
Implications for rural development in other Third World nations	
Concepts for review • Questions for discussion • Further readings	286–287
<b>11 Education and development</b>	<b>289</b>
Education and human resources	289
A profile of education in developing regions	292
Public educational expenditure	
Enrollments	
Dropouts	
Literacy	
Costs and earnings	
Basic problems of primary and secondary education	295
Inertia and inefficiency	
Poor management and distorted incentives	
Maladjustment to social needs at the primary level	
Problems of higher education	299
Factors affecting the ability to learn: some causes and consequences	300
The economics of education and employment	301
Educational supply and demand: the relationship between employment opportunities and educational demands	
Social versus private benefits and costs	
The need to curtail artificially induced educational demands: convergent benefits and costs	
Education, society, and development: some issues	310

Education and economic growth	
Education, inequality, and poverty	
Education, internal migration, and fertility	
Education and rural development	
Education and international migration: intellectual dependence and the brain drain	
Summary and conclusions: major educational policy options	321
Policies largely external to educational systems	
Adjusting imbalances, signals, and incentives	
Modifying job-rationing by educational certification	
Curbing the brain drain	
Policies internal to educational systems	
Educational budgets	
Subsidies	
Primary school curricula in relation to rural needs	
Quotas	
Concepts for review • Questions for discussion • Further readings	325–326

**Part III Problems and policies — international**

<b>12 Trade theory and development experience</b>	<b>331</b>
The importance of international trade and finance	331
Five basic questions about trade and development	333
The importance of trade for development: a statistical review	334
Exports, imports, and current account balances	
Importance of exports to different developing nations	
The composition of trade	
The terms of trade	
The traditional theory of international trade	341
Specialization and the principle of comparative advantage: the classical labor-cost model	
Relative factor endowments and international specialization: the neoclassical model	
Trade theory and development: the traditional arguments	
Some criticisms of traditional free trade theories in the context of Third World experience	348
Fixed resources, full employment, and the international immobility of capital and skilled labor	
Trade and resource growth	
Unemployment, resource underutilization, and the vent-for-surplus theory of trade	
International factor mobility and multinational corporations	
Fixed, freely available technology and consumer sovereignty	

Internal factor mobility and perfect competition	
The absence of national governments in trading relations	
Balanced trade and international price adjustments	
Country trade gains accrue to country nationals	
Some conclusions: trade and economic development, the limits of theory	357
Concepts for review • Questions for discussion • Further readings	361–362
<b>13 The balance of payments and commercial policies</b>	<b>364</b>
Extending our analysis to commercial and financial policies	364
The balance of payments	365
Financing payments deficits: the international monetary system and Special Drawing Rights	367
Trade strategies for development: to look outward or inward, or outward and inward?	369
Export promotion: looking outward and seeing trade barriers	
Primary commodity export expansion	
Expanding exports of manufactured goods	
Import substitution: looking inward but still paying outward	
The strategy and results	
Tariff structures and effective protection	
Foreign exchange rates, exchange controls, and the devaluation decision	
Conclusions: trade policies and development	
Economic integration: the potential benefits of looking both outward and inward	387
Some basic concepts	
Third World regional integration in practice: some case studies	
Conclusions	
Trade policies of developed countries: the need for reform	393
Rich-nation tariff and nontariff trade barriers	
Export incentives of developed countries	
The problem of adjustment assistance	
Domestic economic policies	
Concepts for review • Questions for discussion • Further readings	397–398
<b>14 Foreign investment and aid: old controversies and new opportunities</b>	<b>399</b>
The international flow of financial resources	399
Private foreign investment and the multinational corporation	400

Multinational corporations: size, patterns, and trends	
Private foreign investment: some pros and cons for development	
Traditional economic arguments in support of private investment: filling gaps	
Arguments against private foreign investment: widening gaps	
Reconciling the pros and cons	
Foreign aid: the development assistance debate	407
Conceptual and measurement problems	
Why donors give aid	
Political motivations	
Economic motivations: two-gap models and other criteria	
Economic motivations and self-interest	
Why LDC recipients accept aid	
The effects of aid	
OPEC and development assistance	418
Surplus petrodollars	
Two new initiatives	
Other possibilities	
Bilateral aid	
Expanded financial support for international assistance agencies	
Concessional oil sales	
Looking to the future	
Conclusions: toward a new view of foreign aid	423
Concepts for review • Questions for discussion • Further readings	425–426

---

## **Part IV Possibilities and prospects**

<b>15 Development planning: theory and practice</b>	<b>429</b>
The planning mystique	429
The nature of development planning	430
Basic concepts	
Planning in mixed developing economies	
The rationale for planning in developing economies	432
The market-failure argument	
The resource mobilization and allocation argument	
The attitudinal or psychological argument	
The foreign aid argument	
The planning process: some basic models	434
Characteristics of the planning process	
Planning in stages: three basic models	
Aggregate growth models: projecting macro variables	
Input-output models and sectoral projections	
Project appraisal and social cost-benefit analysis	
Conclusions: planning models and plan consistency	

Important considerations in choosing particular planning models	456
The crisis in planning: problems of implementation and plan failures	458
Theory versus planning practice	
Factor prices, choice of technique, and employment creation	
Rural-urban imbalances and <u>migration</u>	
The demand for education and the employment problem	
The structure of the economy	
Reasons for plan failures	
Deficiencies in plans and their implementation	
Insufficient and unreliable data	
Unanticipated economic disturbances both external and internal	
Institutional weaknesses	
Lack of political will	
Concepts for review • Questions for discussion • Further readings	465–466
<b>16 Monetary and fiscal policy: the role and limitations of the state</b>	<b>467</b>
An eclectic view of development policy	467
Some components of macroeconomic policy in developing countries	468
Monetary and financial policies: the limitations of traditional macro instruments	
The emergence of development banking	
Fiscal policy for development	
Taxation: direct and indirect	
Fiscal policy to control inflation	
Inflationary-financed industrial growth: scope and limitations	
The interrelationship between problems and policies	480
Public administration: the scarcest resource	482
Development policy and the role and limitation of the state: concluding observations	484
Concepts for review • Questions for discussion • Further readings	488–489
<b>17 Development issues in the 1980s: energy, food, and the international economic order</b>	<b>490</b>
Global interdependence	490
Energy and raw materials: a seller's market	491
Energy and the world economy	
Raw materials and mineral resources	
World food shortages	495
Determinants of food demand: population and affluence	

Constraints on supply: land, water, energy, and fertilizers	
The new international economic order (NIEO)	501
Evidence of present inequities	
Origin and content of the NIEO	
Observations on the NIEO	
Summary and concluding remarks	506
Questions for discussion • Further readings	508– 509
Appendix 17.1	
Twenty-five key objectives of the NIEO	510
Appendix 17.2	
Santiago declaration of Third World social scientists, April 1974	513
Appendix 17.3	
Communiqué of the Third World forum conference in Karachi, January 1975	514
<b>Glossary</b>	<b>518</b>
<b>Bibliography</b>	<b>555</b>
<b>Index</b>	<b>581</b>
