

*Psychology and Biology
of Language and Thought*

ESSAYS IN HONOR OF ERIC LENNEBERG

EDITED BY

George A. Miller

Elizabeth Lenneberg

ACADEMIC PRESS New York San Francisco London 1978

A Subsidiary of Harcourt Brace Jovanovich, Publishers

Contents

<i>List of Contributors</i>	<i>xi</i>
<i>Acknowledgments</i>	<i>xiii</i>

<i>Introduction</i>	<i>1</i>
GEORGE A. MILLER	

chapter 1	
<i>Causality: Linear or Systemic?</i>	<i>13</i>

PAUL A. WEISS	
Introduction	13
When Do We Give a Thing a Name?	14
Development of the Brain	16
Characterizing a System Objectively	18
Misrepresenting the Brain as a Mechanical Machine	20
The Ambiguity of Scientific Language	22
Conclusions	24
References	26

chapter 2	
<i>Biology of Language: The Epistemology of Reality</i>	<i>27</i>

HUMBERTO R. MATURANA	
Epistemology	28
Living and Nervous Systems	36
Language and Consensual Domains	47
Reality	55
Conclusion	60
References	63

chapter 3

*Pattern Formation in Chemistry and Biology:
A Mini-Survey of Mechanisms*

65

NANCY KOPELL

Introduction	65
Patterns Induced by External Periodicities	66
Patterns Produced by Frequency Gradients	68
Liesegang Rings: Periodic Precipitation Patterns	72
Hydrodynamical Patterns: Double Diffusion	75
Patterns Formed by Chemical Reaction and Diffusion	77
Biological Examples of Pattern Formation	79
Conclusion	83
References	84

chapter 4

*Three Levels of Mentation and the
Hierarchic Organization of the Human Brain*

87

JOSEPH ALTMAN

Three Levels of Mentation	87
Neural Systems Involved in Mentation	94
Summary	104
References	105

chapter 5

Motor Programming and Language Behavior

111

SIMEON LOCKE

chapter 6

Aphasia and the Concept of Brain Centers

119

O. L. ZANGWILL

Brain Centers and Connections	120
The Localization of Speech	123
Thought and Language	126
The Right Hemisphere and Language	129
Summary	130
References	131

chapter 7

*Lenneberg, Locke, Zangwill, and the
Neuropsychology of Language and Language Disorders*

133

AARON SMITH

The Biological Foundations of Language	134
Plasticity of Hemispheric Functions of the Infant Brain	140

Plasticity of Hemispheric Functions of the Adult Brain	141
Diaschisis, Chronic Aphasia, and Constructional Dyspraxia	143
Development of Standardized Language and Neuropsychological Tests	145
Anatomical Bases of Variation in Aphasic Disturbances	146
References	148
 chapter 8	
<i>A New Paradigm of Reference</i>	151
ROGER BROWN	
Early Research in the Process of Naming	151
A New Paradigm	152
The Basic Object Level	159
Uses of the New Paradigm	163
References	166
 chapter 9	
<i>Pastness</i>	167
GEORGE A. MILLER	
Pastness as a Semantic Phenomenon	167
Reichenbach's Concept of Tense	171
An Argument for Reference Times	172
Thorne's Concept of Tense	178
Development of Pastness in Child Language	180
References	184
 chapter 10	
<i>Conflict and Progress</i>	187
HERMINE SINCLAIR	
 chapter 11	
<i>On the Biological Basis of Language Capacities</i>	199
NOAM CHOMSKY	
 chapter 12	
<i>Can an Inquiry into the Foundations of Mathematics Tell Us Anything Interesting about Mind?</i>	221
GABRIEL STOLZENBERG	
Introduction	221
The View that Pure Mathematics Has Fallen into a Trap	222
The Concept of an Act of Acceptance as Such	226
Use of the Term <i>Trap</i> : Three Conditions that Must Be Fulfilled	232
Belief Systems: Attitudes about Undoing Accepted Beliefs	233

The Case of Pure Mathematics	236
A View from the Edge of the System: The Tug of Language That Pulls One Inside	238
On Not Being Taken in by Language	244
<i>Understanding Mathematical Statements</i>	249
The Contemporary Mathematician's Unfulfilled Task: Making Mathematical Language Function the Way He Wants It To	256
The Decisive Influence of Language Use on the Conduct of Mathematical Research	259
Concluding Remarks	266
References	269
chapter 13	
<i>Discussion of the Chapters by Stolzenberg and Chomsky</i>	271
JACK CATLIN	
Formal Grammar	271
Innate Knowledge	276
References	279
<i>Bibliography of Eric Lenneberg</i>	281
<i>Author Index</i>	285
<i>Subject Index</i>	291
