CONTENTS

| | |
|--|-----|
| Preface | v |
| 1. P. Wolfe, Convergence theory in nonlinear programming. | 1 |
| 2. G. Zoutendijk, Nonlinear programming, computational methods | 37 |
| 3. D. Davies, Some practical methods of optimization | 87 |
| 4. E. M. L. Beale, Advanced algorithmic features for general mathematical programming systems | 119 |
| 5. M. J. D. Powell, Rank one methods for unconstrained optimization | 139 |
| 6. R. Fletcher, A class of methods for nonlinear programming with termination and convergence properties | 157 |
| 7. S. Schechter, Minimization of a convex function by relaxation | 177 |
| 8. J. Abadie, Application of the GRG algorithm to optimal control problems | 191 |
| 9. E. M. L. Beale, Computational methods for least squares | 213 |
| 10. G. H. Golub and M. A. Saunders, Linear least squares and quadratic programming | 229 |
| 11. R. W. Cottle and W. C. Mylander, Ritter's cutting plane method for nonconvex quadratic programming | 257 |
| 12. L. Collatz, Applications of nonlinear optimization to approximation problems | 285 |
| 13. D. Gale, Nonlinear duality and qualitative properties of optimal growth | 309 |
| 14. S. Vajda, Stochastic programming | 321 |
| 15. J. L. Balintfy, Nonlinear programming for models with joint chance constraints | 337 |
| 16. R. E. Gomory, Properties of a class of integer polyhedra | 353 |
| 17. F. Glover, Faces of the Gomory polyhedron | 367 |
| 18. F. C. Hu, On the asymptotic integer algorithm | 381 |
| 19. E. Balas, Minimax and duality for linear and nonlinear mixed-integer programming | 385 |
| 20. B. Roy, R. Benayoun and J. Tergny, From S.E.P. procedure to the mixed OPHELIE program | 419 |

| | |
|---|-----|
| 21. J. A. Tomlin, Branch and bound methods for integer and non-convex programming | 437 |
| 22. E. M. L. Beale, Selecting an optimum subset | 451 |
| 23. M. J. Beckmann, Dynamic programming of some integer and non-linear programming problems | 463 |
| 24. G. W. Graves and A. B. Whinston, An algorithm for the quadratic assignment problem. | 473 |
| 25. G. B. Dantzig, Complementary spanning trees | 499 |
| 26. C. Berge, Hypergraphs generalizing bipartite graphs | 507 |
| Appendix I. G. Zoutendijk, A product-form algorithm using contracted transformation vectors | 511 |
| Appendix II. B. A. Murtagh, A short description of the variable-metric method | 525 |
| Appendix III. J. Abadie and J. Guigou, Numerical experiments with the GRG method | 529 |
| Author Index | 537 |
| Subject Index | 541 |
