# TABLE OF CONTENTS

PREFACE	ix
CHAPTER 1 INTRODUCTION TO COMPLEX SYSTEMS	1
1.1 Finite Complex Systems	1
1.2 Some Concepts of Complexity	3
1.3 Fundamental Issues of Complexity	9
1.4 Multi-level System and Control	14
1.5 Design and Algebraic Systems	16
1.6 Models Using Catastrophe Theory	24
1.7 Aspects of FCS Modelling	29
1.8 Computer Models and Man Machine Interaction	31
Note	35
References	35
CHAPTER 2* MATHEMATICS OF MACHINES, SEMIGROUPS AND COMPLEXITY	37
2.1 Finite State Machines	37
2.2 Definitions and Bounds of Complexity	39
2.3 Machines and Semigroups	44
2.4 The Krohn–Rhodes Prime Decomposition Theorem for Finite Semigroups and Machines	54
2.5 An Application of the Prime Decomposition Theorem – Some Results on Combinatorial Semigroups	62
2.6 Calculating the Complexity of a Transformation Semigroup	66
2.7 The Generalized Model	73
References	75
CHAPTER 3 COMPLEXITY AND DYNAMICS	76
3.1 Introduction and Motivation	76
3.2 Competitive Processes and Dynamical Systems	79

3.3	Description of a Dynamic System	86
3.4	Axioms of Complexity	89
3.5	Evolution Complexity	91
3.6	Dynamic Systems of Resource Depletion	95
3.7	Complexity in Thom's Program	106
3.8	Policy Conclusions	108
	Notes	110
	References	111
CHAPTER 4 STRUCTURAL CHARACTERISTICS IN ECONOMIC MODELS		112
4.1	Introduction	112
4.2	Preliminary Considerations	112
4.3	Decomposable Systems	114
4.4	Systems Modelling and Complexity	115
4.5	Structure of the Model	119
4.6	The Model's Basic Set of Relationships	121
4.7	Evaluation of Complexity	125
4.8	Discussion	128
4.9	Comparison with some Studies on the Economics of Organization	131
	Note	132
	References	132
CHAPTER 5 COMPLEXITY, BOUNDED RATIONALITY AND PROBLEM-SOLVING		134
5.1	Introduction	134
5.2	Bounded Rationality	134
5.3	Problem Solving	139
5.4	An Overview of Algorithmic Complexity and Problem- Solving	144
5.5	A Case in Heuristics: General Problem-Solving (GPS)	147
5.6	Planning	151
5.7	Conclusions	152
	Appendix: Problem-Solving for Energy Technology Assessment	153

Notes	155
References	156
<b>CHAPTER 6 COMPLEXITY AND DECISION RULES</b>	<b>157</b>
6.1 Introduction	157
6.2 Background and Motivation	157
6.3 Choice Processes and Complexity	158
6.4 An Example of a Decision or Search Rule	161
6.5 A Social Choice Machine	162
6.6 Complexity of Decision Rules	164
6.7 A Construction of Compatible Decision Rules	167
6.8 Summary and Extension	170
Notes	172
References	173
<b>CHAPTER 7 COMPLEXITY AND ORGANIZATIONAL DECISION-MAKING</b>	<b>175</b>
7.1 Introduction	175
7.2 Organizational Structures and Performance	176
7.3 Organizations and Environments	178
7.4 A Real-time Organization	181
7.5 Information Technology	186
7.6 Costs of Information Processing	192
7.7 A Simple Machine Model of Organizational Design	194
7.8 Organizational Malfunctioning and Design	196
7.9 The Case of Line Organization	197
7.10 The Parallel Processing Line	201
7.11 The Case of Staff Organization	206
7.12 The Staff Acting as an Input Filter	206
7.13 Optimization Problem of the Staff Design	208
7.14 The Alternately Processing Staff	211
7.15 The Parallel Processing Staff	212
7.16 Some Practical Aspects of Organizational Design	216
Notes	217
References	218
<b>INDEX OF NAMES</b>	<b>219</b>
<b>INDEX OF SUBJECTS</b>	<b>221</b>
