

Kurt Faber

Biotransformations in Organic Chemistry

A Textbook

Third Completely Revised Edition

With 36 Figures, 266 Schemes, and 25 Tables

Bibliothek Fachbereich Chemie
Technische Universität Darmstadt

Springer

Inventar Nr. OC / 11894

Contents

Preface

1 Introduction and Background Information

1.1 Introduction.....	1
1.2 Common Prejudices Against Enzymes.....	1
1.3 Advantages and Disadvantages of Biocatalysts.....	3
1.3.1 Advantages of Biocatalysts.....	3
1.3.2 Disadvantages of Biocatalysts.....	7
1.3.3 Isolated Enzymes versus Whole Cell Systems.....	8
1.4 Enzyme Properties and Nomenclature.....	10
1.4.1 Mechanistic Aspects.....	11
1.4.2 Classification and Nomenclature.....	20
1.4.3 Coenzymes.....	22
1.4.4 Enzyme Sources.....	23
References.....	24

2 Biocatalytic Applications

2.1 Hydrolytic Reactions.....	27
2.1.1 Mechanistic and Kinetic Aspects.....	27
2.1.2 Hydrolysis of the Amide Bond.....	49
2.1.3 Ester Hydrolysis.....	59
2.1.3.1 Esterases and Proteases.....	59
2.1.3.2 Lipases.....	88
2.1.4 Hydrolysis and Formation of Phosphate Esters.....	116
2.1.5 Hydrolysis of Epoxides.....	126
2.1.6 Hydrolysis of Nitriles.....	136
References.....	146
2.2 Reduction Reactions.....	160
2.2.1 Recycling of Cofactors.....	160

2.2.2 Reduction of Aldehydes and Ketones Using Isolated Enzymes.....	166
2.2.3 Reduction of Aldehydes and Ketones Using Whole Cells....	175
2.2.4 Reduction of C=C-Bonds Using Whole Cells.....	187
References.....	194
2.3 Oxidation Reactions.....	201
2.3.1 Oxidation of Alcohols and Aldehydes.....	201
2.3.2 Oxygenation Reactions.....	206
2.3.2.1 Hydroxylation of Alkanes.....	210
2.3.2.2 Hydroxylation of Aromatic Compounds.....	214
2.3.2.3 Epoxidation of Alkenes.....	216
2.3.2.4 Sulfoxidation Reactions.....	220
2.3.2.5 Baeyer-Villiger Reactions.....	224
2.3.2.6 Formation of Peroxides.....	239
2.3.2.7 Dihydroxylation of Aromatic Compounds.....	233
References.....	236
2.4 Formation of Carbon-Carbon Bonds.....	243
2.4.1 Aldol-Reactions.....	243
2.4.2 Acyloin-Reactions.....	259
2.4.3 Michael-Type Additions.....	262
References.....	264
2.5 Addition and Elimination Reactions.....	267
2.5.1 Cyanohydrin Formation.....	267
2.5.2 Addition of Water and Ammonia.....	270
References.....	273
2.6 Glycosyl-Transfer Reactions.....	275
2.6.1 Glycosyl Transferases.....	275
2.6.2 Glycosidases.....	279
References.....	286
2.7 Halogenation and Dehalogenation Reactions.....	288
2.7.1 Halogenation.....	288
2.7.2 Dehalogenation.....	293
References.....	298

3 Special Techniques

3.1 Enzymes in Organic Solvents.....	300
3.1.1 Ester Synthesis.....	309
3.1.2 Lactone Synthesis.....	328
3.1.3 Amide Synthesis.....	330

3.1.4 Peptide Synthesis.....	331
3.1.5 Peracid Synthesis.....	338
3.1.6 Redox Reactions.....	339
3.1.7 Medium Engineering.....	342
3.2 Immobilization.....	345
3.3 Modified and Artificial Enzymes.....	357
3.3.1 Modified Enzymes.....	357
3.3.2 Semisynthetic Enzymes.....	361
3.3.3 Catalytic Antibodies.....	362
References.....	367
 4 State of the Art and Outlook.....	 377
 5 Appendix	
5.1 Abbreviations.....	382
5.2 Suppliers of Enzymes.....	383
5.3 Commonly Used Lipase Preparations.....	384
5.4 Major Culture Collections.....	385
5.5 Pathogenic Bacteria and Fungi.....	386
 Subject Index.....	 388
