CONTENTS

CHAPTER 1: NONLINEAR ECONOMIC DYNAMICS	1
1 DYNAMICS VERSUS EQUILIBRIUM ANALYSIS	1
2 LINEAR VERSUS NONLINEAR MODELLING	2
3 THE TOOLS OF ANALYSIS	3
3.1 Perturbation Methods	3
3.2 Structural Stability and Catastrophe	4
3.3 Chaos and Fractals	5
4 THE CHOICE OF MODELS	6
CHAPTER 2: SPATIAL PATTERN FORMATION	8
1 SCIENTIFIC EXPLANATIONS	8
1.1 Spatial Patterns	8
1.2 Types of Scientific Explanation	9
1.3 Teleological Explanation as Shorthand for Causal	9
1.4 The Case of Minimal Action	10
1.5 Hexagonal Cell Formation	10
2 OPTIMAL PATTERNS	11
2.1 Tessellations	11
2.2 The Isoperimetric Problem	11
2.3 Average Distance	12
3 STRUCTURALLY STABLE PATTERNS	13
3.1 Dangers of Optimality	13
3.2 Structural Stability of Cell Aggregates	13

3.3 Structural Stability of Flows	14
3.3.1 The Flow Model	14
3.3.2 The Structure of Flow Portraits	15
3.3.3 Perturbations	16
3.3.4 Topological Equivalence	16
3.3.5 Structural Stability	17
3.3.6 The Character of Stable Flows	17
3.3.7 Economic Interpretation	18
3.4 Transitions Between Stable Patterns	19
4 CONCLUSION	23
APPENDIX	23
CHAPTER 3: POPULATION DYNAMICS	25
1 THE ORIGINAL HOTELLING MODEL	25
1.1 Stationary Solutions	27
1.2 Stability	27
1.3 Discrete Case	29
2 GROWTH	31
2.1 Production	31
2.2 Pure Growth: Stationary Solutions	32
2.3 Pure Growth: Stability	33
3 DIFFUSION	34
4 GROWTH AND DIFFUSION	35
4.1 Stationary Solutions in One Dimension	37
4.2 Amplitude and Period	38
4.3 Stability	40
4.4 Dynamics	42
5 CONCLUSION	44
CHAPTER 4: BUSINESS CYCLES	45
1 THE MULTIPLIER-ACCELERATOR MODEL	45
1.1 The Original Model	46
1.2 Nonlinear Investment Functions and Limit Cycles	47
1.2.1 Limit Cycles: Existence	51
1.2.2 Limit Cycles: Asymptotic Approximation	54
1.2.3 Limit Cycles: Transients and Stability	59
2 SPATIAL MODELS	62
2.1 Interregional Trade	63

2.2	The Linear Model	64
2.3	Coordinate Separation	66
2.3.1	Example: Square Region	68
2.3.2	Example: Circular Region	72
2.3.3	Example: Spherical Region	73
2.4	Nonlinear Spatial Model	76
2.4.1	Example: Dispersive Waves	77
2.4.2	Example: Standing Waves	79
3	THE TWO-REGION MODEL	81
3.1	The Persistence of Cycles	81
3.2	Perturbation Analysis	83
3.3	The Unstable Zero Equilibrium	85
3.4	Other Fixed Points	87
3.5	Properties of Fixed Points	90
3.6	The Arbitrary Phase Angle	92
3.7	Stability	93
4	THE FORCED OSCILLATOR	94
4.1	The World Market	95
4.2	The Small Open Economy	96
4.3	Stability	97
4.4	Catastrophe	98
5	CHAOS	99
5.1	Relaxation Oscillations: The Autonomous Model	101
5.2	Relaxation Oscillations: The Forced System	103
6	CONCLUSION	104
7	APPENDIX: A DISCRETE MODEL OF CHAOS	104
7.1	The Cubic Iterative Map	105
7.2	Formal Analysis of The Chaotic Regime	111
7.3	Symbolic Dynamics	112
7.4	Brownian Random Walk	113
