Contents

	<i>Preface</i>	<i>iii</i>
1.	Introduction	1
	I. Background	1
	II. Some General Comments on Reinforced Ceramics	3
	Reference	4
2.	Properties of Structural Materials	5
	I. Background	5
	II. Fracture Toughness and Reliability	6
	III. General Comparison of Mechanical Properties of	
	Materials	8
	IV. Comparison of Materials at High Temperatures	15
	V. General Characteristics of Reinforced Ceramics	17
	VI. Summary	20
	References	20
3.	Toughening Mechanisms in Ceramic Matrix Composites	21
	I. Background	21
	II. Major Toughening Mechanisms in Ceramics	
	Reinforced with Continuous Fibers	22
	III. Major Toughening Mechanisms in Whisker or	
	Discontinuous Fiber Reinforced Ceramics	25
		<i>vii</i>

IV.	Other Toughening Mechanisms in Ceramic Composites	26
V.	Summary	27
	References	27
4.	Mechanical Testing of Ceramic Matrix Composites	29
I.	Background	29
II.	Mechanical Testing of Continuous Fiber Reinforced Ceramics	29
III.	Mechanical Testing of Whisker Reinforced Ceramics	41
IV.	Other Perspectives on Mechanical Testing	41
V.	Summary	42
	References	43
5.	Fibers and Whiskers for Ceramic Reinforcement	45
I.	Background	45
II.	Continuous Carbon Fibers	46
III.	Continuous Ceramic Fibers	52
IV.	Ceramic Whiskers	81
V.	Summary	89
	References	89
6.	Fiber Architecture	93
I.	General Considerations	93
II.	Types of Fiber Architecture	94
III.	Summary	106
	References	106
7.	Selection of Compatible Reinforcement and Matrix Materials	107
I.	Background	107
II.	Matrix Selection Criteria	108
III.	Overall Predicted Suitabilities of Ceramic Materials for High-Temperature Composite Applications	116
IV.	Summary	117
	References	117
8.	Importance of the Fiber/Matrix Interface in Ceramic Matrix Composites	119
I.	Background	119
II.	Measurement of Interfacial and Frictional Stresses	120
III.	The Indentation Test for Studying Fiber/Matrix Interfaces	123
IV.	Interfacial Stresses for Whisker Reinforced Ceramics	128
V.	Summary	128
	References	128

9.	Fiber Coatings	131
	I. Background	131
	II. Fiber Coatings Formed <i>In Situ</i>	131
	III. Fiber Coatings Applied Prior to Composite Fabrication	134
	IV. Summary	144
	References	144
10.	Slurry Processing of Whisker Reinforced Ceramics	147
	I. Background	147
	II. General Considerations in Slurry Processing	147
	III. Fabrication of Whisker Reinforced Ceramics	153
	IV. Summary	179
	References	179
11.	Slurry Processed Continuous Fiber Reinforced Ceramics	183
	I. Background	183
	II. Glass and Glass-Ceramic Matrix Composites	184
	III. Hot Pressed Crystalline Matrix Composites	199
	IV. Summary	202
	References	203
12.	Ceramic Matrix Composites Produced by Reaction Bonding	205
	I. Background	205
	II. Reaction Bonded Composite Materials	206
	III. Cement Bonding	220
	IV. Summary	221
	References	223
13.	Matrix Formation by Macromolecule Decomposition	225
	I. Background	225
	II. Sol-Gel Processing	225
	III. Polymeric Precursor Processing	232
	IV. Summary	241
	References	242
14.	Production of Ceramic Matrix Composites by Chemical Vapor Infiltration	245
	I. Background	245
	II. CVI Processing for Ceramic Matrix Composites	248
	III. Modeling of the CVI Process	258
	IV. Mechanical Properties of CVI-Produced Composites	261
	V. <i>In Situ</i> Codeposition of Matrix and Reinforcing Phases	272
	VI. Summary	274
	References	274

15.	Melt Processing of Ceramic Matrix Composites	279
	I. Background	279
	II. Composite Formation Using Ceramic Melts	279
	III. The Dimox™ Process	280
	IV. Summary	286
	References	287
16.	Machining, Joining, Nondestructive Evaluation, and Design	289
	I. Background	289
	II. Machining of Ceramic Matrix Composites	290
	III. Joining of Ceramic Matrix Composites	296
	IV. Nondestructive Evaluation	305
	V. Designing with Ceramic Matrix Composites	309
	VI. Summary	312
	References	313
17.	Applications of Ceramic Matrix Composites	315
	I. Background	315
	II. Market Size for Ceramic Matrix Composites	315
	III. Funding Sources for Applications Related R&D	316
	IV. Silicon Carbide Whisker Reinforced Alumina Cutting Tools	318
	V. Applications for Continuous Fiber Reinforced Ceramics	322
	VI. Summary	335
	References	335
	<i>Index</i>	339
