Contents

<i>Preface</i>	xi
1 INTRODUCTION	1
1. An interpretation 2. Ten questions 3. Walras' contribution 4. Later developments 5. A plan of the book	
2 COMMODITIES	5
1. The question 2. Commodities 3. Prices 4. Uncertainty 5. Contingent commodities 6. Commodity bundles	
3 AGENTS	10
1. The question 2. Agents 3. Preferences 4. Properties of preferences 5. Indifference curves 6. Utilities 7. Smooth preferences 8. Scale-independent preferences 9. An example 10. Endowments 11. Planned exchanges 12. A second example 13. Contingent exchanges 14. Equilibrium 15. A third example	
4 SOCIETY	21
1. The question 2. Optimal allocations 3. Incompleteness of criterion 4. Incompleteability of criterion 5. Equilibria and optima 6. Optima and equilibria 7. Smooth preferences 8. An example 9. Non-convex preferences	
5 COALITIONS	32
1. The question 2. Core allocations 3. An example 4. Equilibria and the core 5. Replication defined 6. Equal treatment 7. The core and equilibria 8. Approximation 9. Non-replicated economies 10–11. Two further examples	
6 PRICE-TAKING	41
1. The question 2. Manipulation 3–5. Three examples	

6. Obtainable prices	7. Obtainable and equilibrium prices	
8. Approximation	9. Non-replicated economies	
10. A further example	11. A lacuna	
7 EXISTENCE		49
1. The question	2. An indirect approach	
3. Excess demands	4. Properties of excess demands	
5. An example	6. A direct approach	
7. Linear preferences	8. A second example	
9. Concave preferences	10. A third example	
11. Large economies	12. Approximation	
13. Non-replicated economies		
8 CONTINUITY		59
1. The question	2. Excess demands and attributes	
3. Similar attributes and similar excess demands	4. Similar excess demands and similar attributes	
5. Non-critical economies	6. Rareness of critical economies	
9 UNIQUENESS		68
1. The question	2. Non-critical economies	
3. Representative economies defined	4. Uniqueness in representative economies	
5. Multiple-market economies defined	6. Existence and uniqueness confirmed	
7. Non-representative economies		
10 STABILITY		77
1. The question	2. The adjustment mechanism	
3. Representative economies	4. Possibility of instability	
5. Stability confirmed	6. Non-representative economies	
7. Local stability	8. Disequilibrium exchanges	
11 PREDICTION		86
1. The question	2. Shifts in demand	
3. Representative economies	4. Possibility of perverse changes	
5. Prediction confirmed	6. Non-representative economies	
7. The substitutes case defined	8. Uniqueness and stability with substitutes	
9. Prediction with substitutes		
12 CONCLUSION		95
1. A summary	2. Production	
3. Capital	4. Money	
5. An assessment		

Contents

ix

13 APPENDIX

99

1. Value and scarcity 2. Scarcity and value

Bibliography

1. Historical references 2. General references 3. Specific references 102
