Business Cycle Theory

A Survey of Methods and Concepts

Springer-Verlag Berlin Heidelberg New York London Paris Tokyo

Contents

.

1.4

1. Introduction	1
2. Measurement	5
2.1. Economic Indicators	6
2.1.1. The Harvard-Barometer	6
2.1.2. NBER-Indicators	8
2.1.3. Indicators in Germany	14
2.1.4. Diagnosis and Prognosis by Means of Indicators	19
2.2. Capacity Utilization	20
2.2.1. Concepts Based on Single Factors of Production	22
2.2.2. Concepts Based on Production Functions	27
2.2.3. The Wharton School Index and Surveys	33
3. Shock-Dependent Business Cycle Theories	36
3.1. Discrete-Time Shock-Dependent Models	37
3.1.1. Linear Models of the Cycle	37
3.1.1.1. The Basic Samuelson-Model	37
3.1.1.2. Hicks' Linear Accelerator	43

١

Contents

	3.1.1.3. The Influence of Inventories	47
	3.1.1.4. Monetary Aspects of the Cycle	51
	3.1.2. A Non-Linear Multiplier-Accelerator Model	54
	3.2. Continuous-Time Shock-Dependent Models	56
	3.3. The Kalecki-Model and Mixed Difference-Differential Equations	59
	3.4. The Relevance of Shock-Dependent Business Cycle Theories	63
4.	Business Cycle Theory and Exogenous Shocks	65
	4.1. The Political Business Cycle	66
	4.1.1. Governmental Behavior as the Cause of Business Cycles 4.1.2. Implications of the Political Business Cycle	68 72
	4.2. The Theory of Stochastic Business Cycles	. 74
	4.2.1. Business Cycle Models with Stochastic Exogenous Influences 4.2.2. A Stochastic Business Cycle Model	· 74 · 78
	4.3., The Rational Expectations Approach to Business Cycles	82
	4.3.1. Expectations and Rationality in Economic Theory 4.3.2. The New Classical Macroeconomics	83 88
	4.3.3. Rational Expectations Business Cycle Models	92
5.	Shock-Independent Business Cycle Theories	101
	5.1. Vogt's Linear Growth Cycle Model	102
	5.2. Goodwin's Quasi-Non-Linear Accelerator	105
	5.3. Non-Linear Theories of the Cycle	109
	5.3.1. Kaldor's Non-Linear Investment and Savings Functions	109
	5.3.2. The Poincaré-Bendixson Theorem and the Existence of	116
	5.2.2.1 Chang (Smyth's Deformulation of the Kalder Model	110
	5.3.2.2. The Non-Linear Phillips-Curve and the Cycle	123
	5.3.2.3. Non-Walrasian Macroeconomics and the Business Cycle	130
	5.3.3. Predator-Prey Interpretations of the Business Cycle	139
	5.3.4. The Liénard-van dēr Pol Equation	144
	5.3.4.1. The Uniqueness of Limit Cycles	.144
	5.3.4.2. The Kaldor-Model as a Liénard Equation	147
6.	New Developments in the Theory of Dynamical Systems	151
	6.1. Dynamical Systems and Transitions	152

Contents

6.1.1. The Hopf-Bifurcation	153
6.1.1.1. The Hopf-Bifurcation in the Continuous-Time Case	153
6.1.1.2. The Hopf-Bifurcation in the Discrete-Time Case	161
6.1.2. Non-Linearities and Chaotic Movements	165
6.1.2.1. Chaos in Discrete-Time Models	166
6.1.2.2. Chaos and Business Cycles	175
6.1.2.3. Chaos in Higher-Dimensional Systems	180
6.2. Catastrophe Theory and Business Cycle Theory	188
6.2.1. Basic Ideas of Catastrophe Theory	189
6.2.2. The Kaldor-Model in the Light of Catastrophe Theory	196
6.3. Structural Instability and Business Cycle Theory - Conclusions	202
