

PROCEEDINGS OF THE FIRST INTERNATIONAL CONFERENCE "GEO-FILTERS"
KARLSRUHE / GERMANY / 20-22 OCTOBER 1992

Filters in Geotechnical and Hydraulic Engineering

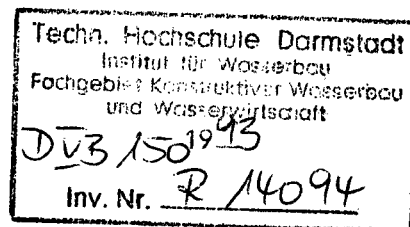

Edited by

J.BRAUNS & U.SCHULER

Institute of Soil Mechanics and Rock Mechanics, University of Karlsruhe, Germany

M.HEIBAUM

Federal Waterways Engineering and Research Institute, Karlsruhe, Germany

A.A. BALKEMA / ROTTERDAM / BROOKFIELD / 1993

Table of contents

Preface	IX
Organization	XI
1 Geometrical design	
Behaviour of coarse and well-graded filters <i>U.Schuler & J.Brauns</i>	3
Research needs in geotextile filter design <i>B.R.Christopher, R.D.Holtz & G.R.Fischer</i>	19
Geotextile filter design based on the filtration opening size obtained by hydrodynamic sieving <i>J.Mlynarek, J.Lafleur, A.Rollin & G.Lombard</i>	27
Reliability study of granular filters <i>K.J.Witt</i>	35
Experimental determination of void size curves <i>M.H.A.Sória, R.T.Aramaki & E.Viviani</i>	43
Void characteristics and filter performances of cohesionless soils <i>B.Åberg</i>	49
Filtration processes observed with γ -ray density meter <i>Y.Okita & M.Nishigaki</i>	57
On particle migration with the help of grading entropy <i>J.Lörincz</i>	63
On granular filters with the help of grading entropy <i>J.Lörincz</i>	67
A method for determining the void size distribution curve for filter materials <i>A.Silveira</i>	71
Some advances in the geometric-probabilistic method for filter design <i>F.Federico & A.Musso</i>	75
A critical review of geotextile pore size measurement methods <i>G.R.Fischer, R.D.Holtz & B.R.Christopher</i>	83

A simple approach to the design of mineral and textile filters <i>H.Schulz</i>	91	Uses and limitations of a the hydraulic conductivi <i>Y.Savard, S.Leroueil & I</i>
Filter criteria for well graded cohesionless soils <i>J.Lafleur, J.Mlynarek & A.L.Rollin</i>	97	Design of a graded filter <i>T.Tanaka, E.Toyokuni &</i>
Piping stability in the filter material of rock-fill dams <i>Y.Myogahara, T.Sueoka, S.Morita & H.Kuroki</i>	107	Summary of discussions
Comparison of existing granular filter criteria <i>Ch.Batereau</i>	113	3 Application of filte
A contribution to the improvement of dimensioning analogies for grain filters and geotextile filters <i>G.Heerten</i>	121	Dewatering a deep exca <i>W.Steiner</i>
Investigation and application of granular and geotextile filters <i>P.Peter</i>	129	The hydraulic transmiss unidirectional and radia <i>M.Avanzini, D.Cazzuffi</i>
Summary of discussions on the session 'Geometrical design'	137	Application of biodegra <i>S.D.Ramaswamy, G.P.K</i>
2 Hydraulic design and clogging		Laboratory investigatio <i>L.Z.Niespodzińska</i>
Design of geometrically open filters in hydraulic structures <i>M.B.de Groot, K.J.Bakker & H.J.Verheij</i>	143	Filter stability of non-w <i>W.Muth</i>
Numerical modelling of water-filter interaction under waves <i>W.Magda & W.Richwien</i>	155	A contribution to the ex <i>H.H.Schwab</i>
Point of view regarding the geotextile filtering protections applied to clayey media <i>L.Kellner, S.Matei & A.Savin</i>	165	Laboratory study of se <i>T.C.Kenney & J.Westla</i>
The influence of external parameters on the determination of hydraulic characteristics of geotextile filters <i>D.Cazzuffi, A.Mazzucato & N.Moraci</i>	173	New developments of <i>E.Baldovin</i>
The description of a filter process as a two-phase flow <i>M.A.Koenders, H.S.Patel & A.F.Williams</i>	181	Long term behaviour o <i>Ph.Delmas, A.Nancey</i>
A transport model for filtration: Control of erosion processes <i>H.den Adel & K.J.Bakker</i>	189	Seepage conditions in <i>V.I.Shcherbina, E.A.Fe</i>
Clogging of the drainage blanket in landfills <i>G.F.Mitchell, S.M.Sargand & J.Rueda</i>	197	Summary of discussio
Geotextile filter behaviour with critical filtration conditions <i>Y.H.Faure, A.Elamir, B.Farkouh, P.Gendrin & P.Reisinger</i>	209	4 Suffosion and pip
Filtration criteria for cohesive soil geotextile systems <i>E.Güler</i>	217	A new model to deal v <i>J.B.A.Weijers & J.B.Sc</i>
The influence of hydraulic head and hydraulic gradient on the filtration process <i>H.-J.Köhler</i>	225	Assessment of suffosi <i>V.V.Burenkova</i>
Erosion resistance of widely graded cohesive soils <i>B.W.Müllner</i>	241	Underground erosion <i>H.Armbruster & I.H.I</i>

Uses and limitations of a clogging technique with bentonite in suspension to reduce the hydraulic conductivity of soils <i>Y.Savard, S.Leroueil & R.Bouchard</i>	249
Design of a graded filter – The most stable graded filter <i>T.Tanaka, E.Toyokuni & E.Ozaki</i>	257
Summary of discussions on the session 'Hydraulic design and clogging'	265
 3 Application of filters and case studies	
Dewatering a deep excavation in glacial silts and sands <i>W.Steiner</i>	269
The hydraulic transmissivity of geosynthetics: An experimental comparison between unidirectional and radial flow <i>M.Avanzini, D.Cazzuffi & P.Rimoldi</i>	277
Application of biodegradable jute geotextile filters <i>S.D.Ramaswamy, G.P.Karunaratne & S.Palit</i>	285
Laboratory investigations of geotextiles and their implementation <i>L.Z.Niespodzińska</i>	293
Filter stability of non-woven geotextiles – Tests in situ <i>W.Muth</i>	301
A contribution to the examination of hydraulic stability of earth and rock fillings <i>H.H.Schwab</i>	305
Laboratory study of segregation of granular filter materials <i>T.C.Kenney & J.Westland</i>	313
New developments of filters in some recent Italian embankment dams <i>E.Baldovin</i>	321
Long term behaviour of a non-woven geotextile in a 21 year-old dam <i>Ph.Delmas, A.Nancey, Y.H.Faure & B.Farkouh</i>	331
Seepage conditions in the core and foundation of an earth- and rockfill dam <i>V.I.Shcherbina, E.A.Fedotova & A.M.Navitskas</i>	339
Summary of discussions on the session 'Application of filters and case studies'	345
 4 Suffosion and piping	
A new model to deal with the piping mechanism <i>J.B.A.Weijers & J.B.Sellmeijer</i>	349
Assessment of suffosion in non-cohesive and graded soils <i>V.V.Burenkova</i>	357
Underground erosion caused by raised water levels of impounded rivers <i>H.Armbruster & I.H.M.Tröger</i>	361

Mechanism for regressive erosion beneath dams and barrages <i>H.Müller-Kirchenbauer, M.Rankl & C.Schlötzer</i>	369
Hydrodynamic classification of a non-cohesive soil in the vicinity of geotextiles <i>W.Richwien & W.Magda</i>	377
Summary of discussions on the session 'Suffosion and piping'	383
 <i>5 Closure</i>	
Closing report <i>W.Wolski</i>	387
 Authors' addresses	397
Author index	401

Preface

It was in 1990, that the geotechnical and hydraulic but relatively narrow restricted number of incidents entire globe. From that would have to be an international

Furthermore, isolated be observed; this application been developed, of which world. Therefore, it was overdue, so much the contacts.

There was a third generation with granular filters (or geotextile filters. An international discussion and an exchange

Finally, it could be seen conferences and in technical empirically as well as theoretical seen to offer a first for the field.

With this background geotechnical and hydraulic held from October 20th

This book, which you nearly 50 in number and of proposals, sent in you located in Karlsruhe, Mechanics and Rock Mechanics and Research Institute. their sincere thanks to

The conference, in which Prof. H. Hahn, vice-president The conference was held sessions on individual
