

10th INTERNATIONAL CONGRESS ON METALLIC CORROSION

VOLUME I : SESSIONS 1 to 4

7-11, November 1987, Madras, India

Organised by:
CENTRAL ELECTROCHEMICAL RESEARCH INSTITUTE
Karaikudi, India

TRANS TECH PUBLICATIONS
Switzerland—Germany—UK—USA

CONTENTS

VOLUME I : SESSIONS 1 to 4

SESSION 1

ATMOSPHERIC CORROSION

| | | |
|-------|---|-----|
| 1.1. | Atmospheric Corrosion in Marine Environments <i>L. Espada, P. Merino, A. Gonzalez and A. Sanchez</i> | 3 |
| 1.2. | A Simulative Laboratory Test for Evaluation of Metallic Corrosion in Windy Coastal Atmosphere <i>Ting-Chung Chang, Yiang I, Yaw-Tzong Horng</i> | 9 |
| 1.3. | Long-term Atmospheric Corrosion of Mild Steel, Zinc, Copper and Aluminium in Spain <i>M. Morcillo, S. Feliu and S. Giménez</i> | 17 |
| 1.4. | The Atmospheric Corrosion Study of Galvanized Steel Wire Strand in Taiwan <i>Yaw-Tzong Horng, Yiang I, Ting-Chung Chang</i> | 27 |
| 1.5. | Corrosion Mapping for Catalonia, Spain <i>J.M. Costa and M. Vilarrasa</i> | 35 |
| 1.6. | Application of Metallography to the Determination of Aluminium Corrosion in Different Test Sites in Galicia (N.W. of Spain) <i>L. Espada, M.E. Vazquez, M. Izquierdo and A. Gonzalez</i> | 45 |
| 1.7. | Study of Behaviour of Several Zinc Coatings in Atmospheres Containing Sulphur Dioxide <i>E. Almeida Padinha, D. Pereira and M.J. Justo</i> | 49 |
| 1.8. | The Pitting Factors of Low Carbon Steel : Correlation between Accelerated and Atmospheric Corrosion Testing <i>L. Espada, P. Merino, A. Gonzalez and A. Sanchez</i> | 59 |
| 1.9. | A Study of Rust Layer of the Atmospheric Corrosion-resistant P-V System Low Alloy Steel <i>WU Jixun and Chan Renrin</i> | 69 |
| 1.10. | Application of Infrared Spectroscopy in the Study of Atmospheric Rust Systems <i>A. Raman</i> | 75 |
| 1.11. | Removal of the Corrosive Hydrogen Sulfide Pollutant from the Intake Air for a Controlled Environment <i>Chieh-Mei Hsiao, Daw-Ming Fann, A.S.T. Chiang and Yiang I.</i> | 95 |
| 1.12. | Utilisation of Weathering Steels in Czechoslovakia <i>Lubomir Rozlívka</i> | 101 |
| 1.13. | Chloride Ion Effect on Aluminium under Atmospheric Corrosion Conditions <i>P.L. Cabot, J.M. Costa, H. Vidal and M. Vilarrasa</i> | 113 |
| 1.14. | The Morphology of Corrosion Products on Steel <i>R.A. Francis</i> | 121 |
| 1.15. | Effect of Air Pollution on Corrosion of Mild Steel : Preliminary Field Studies at Three Sites in Madras City <i>S. Chandrasekaran, R. Jayabalou, Y.V. Subrahmanyam and D. Raguraman</i> | 131 |
| 1.16. | Atmospheric Corrosion of Metals — Long Term Exposure Results at Mandapam Camp <i>M. Sundaram, P.S. Mohan and V. Ananth</i> | 143 |
| 1.17. | Atmospheric Testing of Metallic Coatings <i>Herbert, H. Lawson</i> | 147 |
| 1.18. | Corrosion of Structural Metals in Atmospheres with Different Corrosivity at 8 Years' Exposure in Sweden and Czechoslovakia <i>V. Kucera, D. Knotkova, J. Gullman and P. Holler</i> | 167 |
| 1.19. | Corrosion of Metals in Sulphur Dioxide Atmosphere—A Laboratory Study <i>P.S. Mohan, M. Sundaram and S. Guruviah</i> | 179 |
| 1.20. | Atmospheric Steel Corrosion in Industrial Zone of Pancevo <i>Milena Matic-Vlaskalin and Pejakovíc Jasmina</i> | 185 |

SESSION 2
BASIC ASPECTS OF CORROSION

| | | |
|-------|--|-----|
| 2.1. | Temperature Influence on Corrosion of Armco Iron in Acid Solutions <i>G. Perboni and G. Rocchini</i> | 193 |
| 2.2. | The Mechanism of Tensile Stress Accelerating Anodic Dissolution of Metals <i>Wei Baoming and Hao Ling</i> | 201 |
| 2.3. | Cathodic Polarization of Vapour Deposited Aluminium Film Electrodes in HCl Medium <i>A.M. Ghander, F.M. Reicha and M.I. Youssif</i> | 209 |
| 2.4. | Pourbaix Diagrams Derivation in the Presence of Polynuclear Species in Solution <i>I.F. Fishtik, I.G. Povar and I.I. Vataman</i> | 219 |
| 2.5. | The Study of the Particle Size of the Inner Rusty Layer of Seawater Corroded Products of Low Alloy Steel <i>Ma Ruzhang, Wu Jixun, Yang Dejun, Ji Guiquan and Wuifan</i> | 223 |
| 2.6. | Corrosion of Steels in the H ₂ O-H ₂ S System : Protective Properties of Corrosion Film <i>M.V. Popa, Cristina Cimpoeru, Gh. Beizadea, E. Roman and D. Crisan</i> | 229 |
| 2.7. | The Anodic Dissolution of Iron XII. Recent Findings Supplementing the Information about the Kinetics of the Dissolution Reactions <i>G. Bech-Nielsen and J.C. Reeve</i> | 239 |
| 2.8. | Electrochemical Behaviour of Copper-Nickel Alloy in Sodium Chloride Solution <i>Fu-Xing Gan, Zhe Zhang and Lu-An Yao</i> | 249 |
| 2.9. | Features of Electrochemical Noises during Pitting Corrosion <i>Cao Chu-Nan, Lin Haichao and Chang Xiaoyuan</i> | 257 |
| 2.10. | The Erosion Corrosion Behaviour of Cu-Ni Alloys in Synthetic or Natural Seawater from Potential and Impedance Measurements <i>P.R. Roberge and R. Beaudoin</i> | 263 |
| 2.11. | The Effect of Copper-addition on Electrochemical Behaviour and Surface Composition of Ferritic Stainless Steel in Sulphuric Acid Solution <i>M. Seo, J. Guo, G. Hultquist, C. Leygraf and N. Sato</i> | 271 |
| 2.12. | The Study of Anodic Behaviour of Ni-P Alloy in Chloride Solution <i>Yuan Jiang-Nan and Wen Li-Chang</i> | 279 |
| 2.13. | An Electrochemical Investigation of the Corrosion Behaviour of Mild Steel in Clay <i>Yin Yaode, Zhang Lihua and Gao Ying</i> | 285 |
| 2.14. | Electrochemical Behaviour of Aluminium in NaCl-Anodic Polarisation in Alkaline Solutions <i>R. Narayan and K.P. Sheriff</i> | 295 |
| 2.15. | Partial Electrochemical Reduction of Thin Oxide Film Grown on Stainless Steel Nb Alloys <i>S.E. Kuri and C.V. D'Alkaine</i> | 305 |
| 2.16. | Electrochemical Corrosion of Copper and Copper Sulphide in Acidic Solutions <i>W. Barzyk, P. Wandzilak and A. Pomianowski</i> | 311 |
| 2.17. | Oxidation and Corrosion of AISI 304. Study by Cyclic Voltammetry, Potentiostatic, Galvanostatic and Impedance Methods <i>T.F. Otero, Y.J. Jimenez and M.P. Huete</i> | 319 |
| 2.18. | Peculiarities of the Electrochemical and Corrosion Behaviour of Metals (Fe, Al) in Aprotic Media <i>V.A. Safonov, L.Yu. Komissarov and S.A. Sokolov</i> | 329 |
| 2.19. | Electrochemical and Corrosion Behaviour of Zr-based Intermetallic Compounds <i>O.A. Petrii, S.Ya. Vasina and I.L. Gogichadze</i> | 335 |
| 2.20. | Electrochemical Behaviour of Copper-Nickel Alloy in Sulfide Polluted Sea Water <i>M.C. Leiro and B.M. Rosales</i> | 343 |
| 2.21. | Thin Layer Mixed Potential Model for the Corrosion of High Level Nuclear Waste Canisters <i>Mirna Urquidi-McDonald and Digby D. McDonald</i> | 351 |
| 2.22. | Mass Transfer Aspects of Electrochemical Corrosion <i>F.A. Abdulaleem, F.M. Al-Habdan and M.E. El-Dahshan</i> | 383 |
| 2.23. | Corrosion Behaviour of Titanium Anodic Oxide Films <i>Shang-Fen Xie</i> | 397 |
| 2.24. | Electrochemical Aspects of Selective Sulphide Mineral Dissolution <i>M.K. Yelloji Rao and K.A. Natarajan</i> | 403 |

| | | |
|-------|---|-----|
| 2.25. | Zinc Behaviour in Slightly Alkaline Solutions. The Reduction Process <i>N. Bocchi and C.V. D'Alkaine</i> | 417 |
| 2.26. | Development of the Theory of Structural Electrochemical Corrosion of Metals and Alloys <i>N.D. Tomashov</i> | 425 |
| 2.27. | Corrosion Behaviour of Sintered Stainless Steel in Sulphuric Acid and Sodium Chloride Solutions <i>T. Raghu, S.N. Malhotra and P. Ramakrishnan</i> | 441 |
| 2.28. | Dynamic System Analysis in Corrosion Research and Testing <i>K. Jüttner and W.J. Lorenz</i> | 457 |
| 2.29. | Corrosion in Ferric Chloride Solutions. Evaluation by D.C. Electrochemical Methods <i>J.J. Royuela</i> | 465 |
| 2.30. | Corrosion-electrochemical Properties and Some Aspects of the Electronic Structure of Chromium Carbides, Nitride and Carbo-nitrides <i>Ya.M. Kolotyrkin, V.M. Knyazheva, S.G. Babich and V.B. Kozhevnikov</i> | 473 |
| 2.31. | Hydrogen Evolution Kinetics in Corrosion of Copper, Iron and Zinc in Water <i>M. Seo, G. Hultquist, L. Gräsjö and N. Sato</i> | 481 |
| 2.32. | Chemical Corrosion of Silver in Silver Nitrate Containing TiO_2 and Alkaline Earth Metal Ions <i>L. Bapat and J. Ramanan</i> | 489 |
| 2.33. | Electrochemical Polarization Studies of API 5L Grade \times 65 Steel in Chloride Solution <i>B. Mazza, T. Pastore, P. Pedferri and G. Rondelli</i> | 501 |
| 2.34. | Studies on Bimetallic Corrosion <i>Mrs. Venusubramanian, C. Rajagopal, Mrs. Vijayalakshmi Ramakrishnan and K. Balakrishnan</i> | 511 |
| 2.35. | A United View of the Formation and Growth Phenomena of Oxides on Uniform Metal Electrodes <i>M. Noel and K.I. Vasu</i> | 525 |
| 2.36. | Mechanism of Tin Dissolution in Sulphuric Acid <i>M. Natesan and S. Venkatakrishna Iyer</i> | 531 |
| 2.37. | Optical Study of Copper-inhibitor System <i>S. Muralidharan, R. Ravi, G. Rajagopal, N. Palaniswamy and K. Balakrishnan</i> | 537 |
| 2.38. | Mechanism of Oxygen Reduction on Stainless Steel <i>S. Muralidharan, R. Ravi, G. Rajagopal, N. Palaniswamy and K. Balakrishnan</i> | 543 |
| 2.39. | Corrosion and Diffusion <i>P. Radhakrishnamoorthy</i> | 553 |
| 2.40. | Cathodic Polarisation in Aqueous Solutions <i>J.S.L. Leach, B.R. Pearson and A. Rahmat</i> | 563 |
| 2.41. | Influence of Crystallization on Corrosion on Fe-Ni-B Metallic Glasses <i>V.S. Raja</i> | 571 |
| 2.42. | Effect of Chloride Content in Industrial Water on Corrosion Behaviour of Steels <i>Shih Shengtai, Xu Naixin, Zhang Chengdian, Pan Huiying and Zhou Fengming</i> | 581 |
| 2.43. | Mechanistic Studies on the Dissolution of Copper in Sulphuric Acid and Hydrochloric Acid <i>M. Natesan, S. Syed Azim, R. Meenakshisundaram and N. Palaniswamy</i> | 587 |
| 2.44. | Corrosion and Electrochemical Behaviour of Tungsten Carbide in Phosphoric Acid at High Temperature <i>I.P. Anoshchenko, A.N. Tulenov and A.V. Androsov</i> | 593 |
| 2.45. | Electrochemistry of Cr- and Ni-Base Binary Metallic Glasses <i>P.V. Nagarkar, T.P. Moffat, P.C. Searson, R.M. Latanision and R.R. Ruf</i> | 597 |
| 2.46. | Electrochemical Behaviour of Porous Nickel Electrode in Alkali Solutions <i>G. Paruthimal Kalaignan, V.S. Muralidharan and K.I. Vasu</i> | 615 |
| 2.47. | Nucleation and Growth of Anodic Films. IV. Anodic Deposition of Silver Sulphide <i>S. Jaya, T. Prasada Rao and G. Prabhakara Rao</i> | 627 |
| 2.48. | Galvanic Corrosion at Composite-metallic Materials Interface <i>F. Bellucci, L. Nicodemo, A. Bongiovanni, A. Di Martino and G. Capobianco</i> | 633 |
| 2.49. | Corrosion Studies of Zinc in Aqueous Binary Mixtures of Acetonitrile through Polarisation Technique <i>L. Bahadur, P. Singh and Ravindra N. Singh</i> | 643 |
| 2.50. | Electrochemical and AES Investigations of Some Metallic Glasses in Sulphuric Acid Solution <i>I.B. Singh, R.D.K. Misra, T.K.G. Namboodhiri and R.S. Chaudhary</i> | 651 |

SESSION 3
BIOLOGICAL CORROSION

| | | |
|------|---|-----|
| 3.1. | Corrosion of 7075 Al Alloy in Media Contaminated by <i>Cladosporium Resinae</i> <i>E.S. Ayllon and B.M. Rosales</i> | 669 |
| 3.2. | Steel Corrosion by Metabolic Products of Sulfate Reducing Bacteria Prevention by Inhibitor <i>C. Sinicki and C. Gaboriau-Soubrier</i> | 681 |
| 3.3. | Microbiological Corrosion of Steel in the Water of Thermal Power Plant <i>A.P. Akolzin</i> | 687 |
| 3.4. | The Influence of Bacteria of Sulphur Cycle on Lead Corrosion <i>S.B. Yanover, A.I. Lisaya, O.A. Lunev, I.A. Kozlova, L.M. Purish, N.P. Zvyagintseva and E.I. Andreyuk</i> | 695 |
| 3.5. | Microorganisms as Factors of Damage of Gas Pipe-lines Coverings <i>E.I. Andereyuk, Zh. P. Kopteva, V.V. Zanina and A.E. Kopteva</i> | 699 |
| 3.6. | Ecological and Biochemical Aspects of Corrosion of Underground Constructions <i>E.I. Andreyuk, I.A. Kozlova, N.S. Antonovskaya, A.I. Pilyashenko-Novohatny</i> | 705 |
| 3.7. | Changes in the Composition of Microbial Communities in the Process of Corrosion of Reinforced Concrete Constructions <i>A.M. Rozhanskaya, A.I. Pilyashenko-Novohatny, E.I. Andreyuk and I.A. Kozlova</i> | 713 |
| 3.8. | Mechanisms and Control of Microbiological Corrosion in Petroleum Industry <i>S.S. Chatterjee and K.C. Banerjee</i> | 717 |

SESSION 4
CASE STUDIES

| | | |
|-------|--|-----|
| 4.1. | Anti-corrosive Properties of Spent Motor Oils <i>P. Petkov, N. Benova and D. Mincov</i> | 729 |
| 4.2. | Case Study of Corrosion in Desalination Plants <i>M.E. El-Dahshan, F.M. Al-Habdan and F.A. Abdulaleem</i> | 735 |
| 4.3. | Case Study : Development Motor Vehicle Underbody Coatings in Yugoslavia <i>Husejn Huseljić</i> | 745 |
| 4.4. | Corrosion and Its Protection of Evaporator's Red Copper Heating Pipe in Chemical Production of Salt <i>Ma Xinhua</i> | 753 |
| 4.5. | Corrosion Behaviour and Stress State of Laser Hardened Zone on Spring Steel <i>Wu Weitao, Wang Maocai, Niu Yan, Zuo Yangxiu and Shen Dehe</i> | 757 |
| 4.6. | Failure of Copper Pipes in Kuwait's Domestic Tap Water <i>F. Al-Kharafi, H.M. Shalaby and V.K. Gouda</i> | 767 |
| 4.7. | Corrosion and Material Problems in Cogeneration Boiler Systems of the Pulp and Paper Industry <i>D.G. Chakrapani</i> | 783 |
| 4.8. | Electrochemical Aspects of Grinding Ball-Mineral Interactions in Ore Grinding <i>K.A. Natarajan and I. Iwasaki</i> | 799 |
| 4.9. | Electrochemical Study of the Corrosion Resistance of Copper and Some Brazings in Hot or Cold Domestic Water <i>H. Idrissi Chbihi and S. Audisio</i> | 805 |
| 4.10. | Applicability of Electrochemical Impedance Technique in Metallic Sheets Quality Control for Food Industry <i>I.C.P. Margarit, O.R. Mattos, T.M.C. Nogueira and W. Rosas</i> | 813 |
| 4.11. | Corrosion Experience with a Large Vehicle Fleet <i>R.H. Casling</i> | 823 |
| 4.12. | Stress Corrosion Cracking of Ammonia Storage Sphere <i>S.K. Grover, K.N. Parikh, A.K. Lahiri and P.K. Chaudhuri</i> | 835 |
| 4.13. | The Exploitation of Low Temperature Heat <i>Dinko Zorovic and Aleksandar Zorovic</i> | 843 |
| 4.14. | Fly Ash Erosion Behaviour of Boiler Tube Materials in the Coal-fired Boiler Environment <i>Hisao Fujikawa, Yoshiaki Shida and Nobuo Ohtsuka</i> | 847 |
| 4.15. | High Temperature Corrosion of Cast Iron Chains by Coal Ash <i>Salah El Moujahid</i> | 857 |

| | | |
|-------|--|-----|
| 4.16. | Case Study of Stress Corrosion Cracking of Stainless Steel Tubes due to Continuous Chlorination Treatment of Cooling Water <i>K. Elayaperumal</i> | 861 |
| 4.17. | Use of Organo-phosphonate Cooling Water Treatment in Indian Chemical Process Industries <i>K. Elayaperumal</i> | 869 |

VOLUME II : SESSIONS 5 to 9

SESSION 5

CATHODIC PROTECTION

| | | |
|-------|---|------|
| 5.1. | Electrochemical Evaluation of Dissolution Characteristics of Al-Basic Sacrificial Anodes in Seawater <i>Zhang Jinglei, Guo Gongyu, Sun Kelang and Hou Baorong</i> | 879 |
| 5.2. | Vertical Semi-continuously Cast Aluminum Anodes, Further Improvements <i>M.C. Reboul, J.L. Meteau, M. Alliot and J.P. Heath</i> | 885 |
| 5.3. | Optimization in Anode Arrangements in High Electric Resistance Media <i>Toshiaki Kodama</i> | 895 |
| 5.4. | Cathodic Protection Economics as Related to Graphite Anode Behaviour in Deep Groundbed Systems <i>Joe F. Tatum, P.E. and Joseph F. Tatum, Jr., P.E.</i> | 905 |
| 5.5. | Electrochemical Behaviour and Some Examples of Application of PbO ₂ /Ti Electrode in Sea Water with Different Salinity <i>Chen Huimin et al.</i> | 921 |
| 5.6. | Mathematical Modelling of Electrochemical Protection <i>V.A. Makaro, V.T. Ivanov and N.P. Glazov</i> | 927 |
| 5.7. | Protection of Steel by Inhibitors in Combination with Impressed Current <i>J.C. Lin and H.C. Shih</i> | 935 |
| 5.8. | Experimental Confirmation of a Mathematical Model for the Design of Cathodic Protection Systems <i>B. Mazza, T. Pastore, P. Pedferri, G. Taccani, E. Ferrari and F. Gasparoni</i> | 945 |
| 5.9. | Development of a Series of Al-Zn-In Ternary Alloy Anodes for the Cathodic Protection of Submerged Structures <i>V. Kapali, K.N. Srinivasan, B. Venkataraman and K. Balakrishnan</i> | 955 |
| 5.10. | Studies on Mg Alloys Containing Mn for use as Galvanic Anodes <i>K. Balakrishnan, T.M. Balasubramanian, N. Palaniswamy, B. Venkataraman and G.T. Parthiban</i> | 963 |
| 5.11. | The Dissolving Mechanism of Aluminium Anodes in Chloride Solutions <i>Wu Peiqiang and Wang Yuanxi</i> | 969 |
| 5.12. | Aluminium Alloy Anodes for Cathodic Protection of Marine Structures <i>A.G. Kulkarni and A.Y. Paranjpe</i> | 983 |
| 5.13. | Micro-computer Controlled Cathodic Protection System <i>K. Balakrishnan, S. Birlasekaran, P. Subramanian, R. Meenakshisundaram, G. Radhakrishnan, R. Kalidoss and Thirumalai Parthiban</i> | 989 |
| 5.14. | Corrosion and Cathodic Protection of Ice Going Vessels in Subarctic and Arctic Environment <i>Jari Aromaa, Markku Tavi, Seppo Yläsaari and Ari Nylund</i> | 993 |
| 5.15. | Performances of Various Anodes Used in the Impressed Current Cathodic Protection System <i>S.S. Chatterjee and K.C. Banerjee</i> | 1001 |
| 5.16. | Performance of Aluminum Alloy Anode in High Temperature Sea Mud <i>Hirotaka Ohkohchi, Minoru Hachiya and Katsutomo Oka</i> | 1013 |

SESSION 6

COATINGS AND LININGS

| | | |
|------|---|------|
| 6.1. | Corrosion Preventive Coatings on Aluminium <i>K. Lakshman Rao</i> | 1021 |
| 6.2. | Considerations on the Corrosion Resistance of Metallic Materials Coated with Electroless Nickel <i>G. Salvago and G. Fumagalli</i> | 1027 |

| | | |
|-------|---|------|
| 6.3. | Status of Protective Coating and Lining in the Industry in Indian—An Overview <i>V.S. Gupta, P.K. Ghosh and D.K. Guhasarkar</i> | 1035 |
| 6.4. | Effect of Deposition Temperature on Microstructure and Corrosion Resistance of Tantalum Coating <i>Lu Yanping and Zhang Changxin</i> | 1045 |
| 6.5. | Corrosion of Metal Beneath Coatings <i>Lai Chun-Xiao</i> | 1051 |
| 6.6. | Influence of Thinner Addition on Brushability and Sagging of High Build Anticorrosive Paints <i>Beatriz Del Amo, Carlos A. Giudice and Vicente J.D. Rascio</i> | 1063 |
| 6.7. | A Study of the Relation between Ion Beam Etching and Chemical Etching of Aluminium Thin Films Prepared at Different Experimental Conditions <i>A.M. Ghander, F.M. Reicha and M.I. Youssif</i> | 1071 |
| 6.8. | Corrosion Resistance of Tantalum Coating in Fused Salt <i>Zhang Chang-Xing and Lu Yan-Ping</i> | 1079 |
| 6.9. | Evaluation of Anticorrosive Paint Binders by Means of A.C. Techniques Influence of the Coat Thickness <i>A.R. Di Sarli, E.E. Schwiderke and J.J. Pdesta</i> | 1091 |
| 6.10. | On Electrochemical Reductive Destruction and Cathodic Disbondment of Protective Polymeric Coatings <i>A.A. Pud and G.S. Shapoval</i> | 1101 |
| 6.11. | Effect of Some Factors on the Polymeric Coatings-to-Cathodic Disbonding Stability <i>G.S. Shapoval and V.A. Bagrij</i> | 1107 |
| 6.12. | Cathodic Process of Atmospheric Corrosion and an Approach to Development of Rust Control Coating <i>Chen Junming and Wang Ge</i> | 1113 |
| 6.13. | Factors Influencing the Corrosion Resistance of Polyester Powder Films on Zinc Coated Steel <i>N.R. Short, S.O. Agbonlahor and J.K. Dennis</i> | 1119 |
| 6.14. | Study of Different Primers in Natural Environments <i>L. Espada, A. Gonzalez, A. Sanchez and P. Merino</i> | 1129 |
| 6.15. | Antifouling Paints of the Emulsion Type Based on Cuprous Oxide <i>J.J. Caprari and O. Slutzky</i> | 1133 |
| 6.16. | Investigation of Degradation Processes in Primer Coatings <i>M. Kunst and I. Esih</i> | 1139 |
| 6.17. | Surface Enrichment of Mild Steel and Cast Iron with Silicon (by C.V.D. Process) and Corrosion Behaviour of Coated Materials in Hot Concentrated Sulfuric Acid <i>Y. Cetre, S. Audisio and H. Mazille</i> | 1151 |
| 6.18. | Influence of Curing Process Parameters on the Quality of Organic Coatings <i>A. Zagar-Maricic and I. Esih</i> | 1157 |
| 6.19. | Effect of Phosphorus on the Structure and Corrosion Behaviour of Electrodeposited Co-P Films <i>A. Krolkowski</i> | 1169 |
| 6.20. | Study of Titanium Anodization by Means of O ¹⁸ Tracing and Ion Beam Analysis Techniques <i>Chen Heming, Zhang Zuchun, Bai Xindee and Lee Wangpei</i> | 1177 |
| 6.21. | The Technology and Practice in Production of Hot Dip Galvanised Steel Pipes by the Slight Oxidation Reduction Process <i>Chen Houzai</i> | 1187 |
| 6.22. | A Study on Ni-P Amorphous Electrodepositing Process <i>Wang Xin Dong, Wang Kuong and Xiao Heng</i> | 1195 |
| 6.23. | The Water Content and Transport through Chlorinated Rubber Hydrophobic Free Films <i>A. Ruvalo-Filho and C.V. D'Alkaine</i> | 1199 |
| 6.24. | The Salt Content and Its Transport through Epoxy-Polyamide Hydrofobic Free Films <i>C.V. D'Alkaine, A. Ruvalo Filho and D. Ribeiro Da Silva</i> | 1207 |
| 6.25. | Electrochemical Measurements of Corrosion Beneath Organic Coatings <i>J.D.B. Sharman, H.E.M. Smith and J.M. Sykes</i> | 1213 |
| 6.26. | Some Aspects of the Application of Electrochemical Measurements for the Assessment and Selection of Zinc Rich Primers <i>Dulcinea Pereira, M.G.S. Ferreira and E. Almeida Padinha</i> | 1225 |
| 6.27. | Limitations and Possibilities of the Typical Electrochemical Impedance Measurements for Studying Anti-corrosive Paint Coatings <i>S. Feliu, J.C. Galvan and M. Morcillo</i> | 1235 |

| | | |
|-------|--|------|
| 6.28. | Studies on Corrosion of Electroless Nickel <i>K.S. Rajam and S.R. Rajagopalan</i> | 1243 |
| 6.29. | The Corrosion Behaviour of Low Alloyed Electroplated Zinc Layers <i>Wolfgang Paatsch</i> | 1257 |
| 6.30. | The Influence of Operating Conditions on the Behaviour of Coatings Exposed to Petroleum Fluids <i>Marcel Roche, Jean Pierre Sammaran and Emmanuel Larcher</i> | 1265 |
| 6.31. | Studies on Non-aqueous Phosphating <i>C. Rajagopal, Mrs. Venusubramanian, Mrs. Vijayalakshmi Ramakrishnan and K. Balakrishnan</i> | 1275 |
| 6.32. | Evaluation of Corrosion Resistance of Electrodeposited Chromium <i>G. Govindarajan, Mrs. Vijayalakshmi Ramakrishnan, Mrs. Venusubramanian and N.V. Parthasarthy</i> | 1285 |
| 6.33. | Corrosion Behaviour of Nitrided Steels in Sodium Chloride Solutions <i>J.P. Millet, S. Chechirlian, X.Z. Chen and H. Mazille</i> | 1299 |
| 6.34. | Electronoptical Investigations of the Inhibition of Corrosion of Mild Steel in the Presence of Paint Films Containing Zinc Chromate <i>C.A. Wright, J.D. Scantlebury, G.E. Thompson and S. Turgoose</i> | 1307 |
| 6.35. | The Effect of Laser Surface Treatment on High-Temperature Oxidation and Corrosion Resistance of Materials and Coatings <i>R. Streiff</i> | 1315 |
| 6.36. | Evaluation of Zinc Electrodeposits for Corrosion Resistance <i>Rm. Krishnan, S.R. Natarajan, V.S. Muralidharan and Gurdeep Singh</i> | 1325 |
| 6.37. | Effect of Anions of the Formation of Chromate Film on Zinc <i>C. Marikkannu, Vasanthi Sundaram, B. Venkataraman and K. Balakrishnan</i> | 1333 |
| 6.38. | Characteristics of Ni-Al ₂ O ₃ Electrodeposited Composites <i>Malathy Pushpavanam, K. Balakrishnan and L.R. Sharma</i> | 1343 |
| 6.39. | Corrosion Resistant Precoated Autobody Steel Sheets <i>S.R. Basu, P.K. Paul and B.N. Mukhopadhyay</i> | 1355 |
| 6.40. | Performance of Electroless Nickel-Tungsten Alloys <i>S. Syed Azim, V. Ganesa Sarma, K. Chandran and S. Guruviah</i> | 1371 |
| 6.41. | Electrodeposition of Acrylic Resin from Water Soluble Systems <i>S. Muthukrishnan, P. Jayakrishnan and S. Guruviah</i> | 1377 |
| 6.42. | Development of an Acrylic Coating for Corrosion Protection <i>S.M. Krishnan and S. Guruviah</i> | 1383 |
| 6.43. | Water Borne Coatings Based on Polyester for Corrosion Protection of Metals <i>K. Raghupathy and S. Guruviah</i> | 1389 |
| 6.44. | Evaluation of Organic Coatings by Impedance Studies <i>S. Syed Azim and S. Guruviah</i> | 1393 |
| 6.45. | Cathodic Electrocoatings from Epoxy Based Paints <i>P. Jayakrishnan, S. Muthukrishnan and S. Guruviah</i> | 1399 |
| 6.46. | Electrodeposition of Corrosionstable Zinc Alloyed with Aluminium <i>V.I. Korobov, L.Yu. Gnedenkov, V.M. Blinov, Yu. M. Loshkaryov and V.V. Trofimenko</i> | 1403 |
| 6.47. | Evaluation of Organic Coatings on Pretreated Aluminium Alloys <i>P.S. Mohan, V. Ganesa Sarma and S. Guruviah</i> | 1407 |
| 6.48. | Chromizing of Steel Reinforcement Bars <i>N. Karuppiah, G.T. Parthiban, S. Sreeveeraraghavan, N.S. Rengaswamy and K. R. Ramakrishnan</i> | 1413 |
| 6.49. | Hot Corrosion of NiCoCrAlYTa Coatings <i>M. Frances, M. Vilasi, M. Mansour-Gabr and J.P. Steinmetz</i> | 1419 |
| 6.50. | The Corrosion Behaviour of Titanium Nitride Coatings in Dilute Acid Solutions <i>M. Tavi, K. Knuutila, O. Forsen and S. Ylasaari</i> | 1429 |
| 6.51. | Studies of Aluminium Diffusion Treated Steel for Heat Exchanger Tubes <i>C. Aravindakshan, P. Prabhakaram, A. Sen Gupta, A.N. Mukherji, P.C. Srivastava, T.L. Sharma and P.K. Roy</i> | 1435 |
| 6.52. | Change of Structure and Chemical Composition of AlZn ₅ Mg ₃ Cu _{1.5} Alloy during the Process of Anodizing in Sulphuric Acid <i>Obrad Supic</i> | 1445 |

| | | |
|-------|--|------|
| 6.53. | Cadmium Deposition from Perchloric Acid Based Electrolyte <i>S. Sriveeraragavan, S.R. Natarajan, K. Balakrishnan and J.D. Sharma</i> | 1457 |
| 6.54. | Investigations on Cathodic Disbonding of Chlorinated Rubber Coating on Mild Steel <i>Ali Abulkrim Elbasir and J.D. Scantlebury</i> | 1467 |
| 6.55. | Investigations of the Factors Affecting the Adhesion of Chlorinated Rubber on Mild Steel Using Modified Blister Technique <i>Ali Abulkrim Elbasir, J.D. Scantlebury and L.M. Callow</i> | 1475 |
| 6.56. | The Influence of a Fluoride Film on the Corrosion Resistance of Aluminium Heat Exchangers Fabricated with a Fluoride Flux <i>D.E. Davies and R.M. Prigmore</i> | 1483 |

SESSION 7

CORROSION IN CONCRETE STRUCTURES

| | | |
|------|---|------|
| 7.1. | Corrosion Fatigue of Steels for Prestressing Concrete <i>V. Sanchez-Galvez and A. Martin</i> | 1493 |
| 7.2. | Electro-chemical Behaviour of Coated Reinforcement in Cement Concrete <i>B.T. Patil, M.R. Gajendragad, T. Ramchandran, G. Ranganna, and H.V. Sudhaker Nayak</i> | 1499 |
| 7.3. | Study of Metallic Corrosion of Tubing in Buildings. Evaluation by A.C. and D.C. Techniques <i>F. Huete and J.J. Royuela</i> | 1507 |
| 7.4. | Studies on Corrosion Resistance of Sulphur Concrete <i>G.T. Parthiban, S. Srinivasan, N.S. Rengaswamy and K. Balakrishnan</i> | 1521 |
| 7.5. | Application of Impedance Technique to Study the Corrosion Behaviour of Steel in Concrete <i>S. Srinivasan, G. Venkatachari, N.S. Rengaswamy and K. Balakrishnan</i> | 1525 |
| 7.6. | Deterioration of Concrete in Industrial Environments <i>T.M. Balasubramanian, S. Srinivasan, K. Balakrishnan and K. Saravanan</i> | 1533 |
| 7.7. | Corrosion of Steel in Concrete Studied by Electrochemical Impedance Measurements: Application to the Monitoring of Concrete Structures <i>F. Wenger, J. Zhang, J. Galland and L. Lemoine</i> | 1539 |
| 7.8. | Corrosion Processes at Concrete/Iron Electrode <i>M. Arpaia and Pernice</i> | 1547 |

SESSION 8

CORROSION RESISTANT ALLOYS

| | | |
|------|---|------|
| 8.1. | Accelerated Testing of Zirconium and Its Alloys Resistance for Specific Types of Corrosion <i>A.A. Barcov</i> | 1559 |
| 8.2. | Effect of Hydrochloric Acid Vapours at Room Temperature on the Oxide-Sulphide Scales on Fe-Cr-Ni Alloys <i>H.V. Sudhaker Nayak and H.J. Grabke</i> | 1567 |
| 8.3. | Aqueous Corrosion of U_3O_8 -Al Cermet Cores <i>Michelangelo Durazzo and Lalgudi V. Ramanathan</i> | 1577 |
| 8.4. | On the Corrosion Characteristics of Some Modified Aluminium Alloys in Sea Water with Different Pretreatments under Dynamic and Nearly Static Conditions <i>G. Venkateswaran, K.S. Venkateswarlu and E. Galow</i> | 1587 |
| 8.5. | A. Study of the Corrosion Processes of Low Alloy Steels in Artificial Sea Water <i>Wu Jixun, Ji Guiquan, Wu Wuifang and Ma Ruzhang</i> | 1601 |
| 8.6. | The Influence of Niobium on the Oxidation of All-Austenite Stainless Steels <i>Lalgudi V. Ramanathan and Angelo F. Padilha</i> | 1605 |
| 8.7. | Influence of Rare Earth Metals Y, Ce and La on the High Temperature Sulfidation of Fe-25Cr-40Ni Superalloy <i>Shi Shengtai (S.T. Shih), Huang Yuanwei and Han Yong</i> | 1617 |
| 8.8. | The Influence of Pb, Fe, Mg Alloying Impurities on the Corrosion Behaviour of Al-Brass Alloys <i>F. Mazza and S. Torchio</i> | 1627 |

| | | |
|-------|---|------|
| 8.9. | Corrosion of Molybdenum-containing Amorphous Iron Alloys <i>E. Angelini, F. Zucchi and C. Antonione</i> | 1637 |
| 8.10. | Selective Corrosion of Brasses <i>R.O. Toivanen, V. Navratil and V.K. Lindroos</i> | 1643 |
| 8.11. | Improvement of Corrosion Behaviour of Cast Iron for Sulfuric Acid Concentration Plants by Modification of Composition and Structure <i>Y. Cetre, P. Eichner and H. Mazille</i> | 1651 |
| 8.12. | Corrosion-resistant High-chromium, Titanium, Molybdenum, Ruthenium or Palladium Alloyed Steels <i>G.P. Chernova, L.A. Chigirinskaya, O.D. Agakishiev and N.D. Tomashov</i> | 1659 |
| 8.13. | Influence of Heat Treatments on the Corrosion Resistance of Cr-Co Dental Alloys <i>E. Angelini and F. Zucchi</i> | 1671 |
| 8.14. | Duplex Stainless Steels the Cost Effective Answer to Corrosion Problems of Major Industries <i>D.C. Agarwal</i> | 1677 |
| 8.15. | Corrosion Kinetics Study of Sintered Fe/8% wt Cu by Means of Electrochemical Methods <i>E. Otero, A. Pardo, M.C. Merino, M. Laguna and M.J. Cifuentes</i> | 1693 |
| 8.16. | Tarnishing and Corrosion of Semi-precious Alloys for Dental Applications <i>J. Brugirard, P. Guiraldeng and H. Mazille</i> | 1703 |
| 8.17. | Rapidly Quenched Pb-Sb, Pb-Sb-Sn Alloys Preparation and Their Physical and Corrosion Resistant Properties <i>D. Mukherjee and S. Guruviah</i> | 1711 |
| 8.18. | Effect of Aging on the Hardness and Corrosion Resistance Properties of Fe ₈₂ B ₁₀ Si ₈ Metallic-glass <i>D. Mukherjee, G.T. Parthiban and R. Mahalingam</i> | 1719 |
| 8.19. | The Behaviour of High-Alloy Steels in Flue Gases <i>R. Markovic, Z. Strbacki, A. Tasovac and I. Esih</i> | 1725 |
| 8.20. | Mathematical Modeling for Carbon Diffusion and Carbide Precipitation in NiCr-based Alloys <i>W.J. Quadackers, R. Schulten, K. Bongratz and H. Nickel</i> | 1737 |
| 8.21. | Corrosion Behaviour of Duplex Steel Obtained by Electron Beam Treatment of AISI 304 <i>A. Mignone, A. Labarbera, S. Martelli, M. Vittori and R. Festa</i> | 1747 |
| 8.22. | Studies on the Behaviour of Lead-Antimony-Silver Alloy under the Influence of A.C. Superimposition <i>R. Vijayavalli</i> | 1757 |

SESSION 9

ECONOMICS AND EDUCATION AND GENERAL ASPECTS

| | | |
|------|--|------|
| 9.1. | Analysis of Cost of Corrosion in Industry and Saving due to Adoption of Corrosion Control Measures <i>K.S. Rajagopalan</i> | 1765 |
| 9.2. | The NACE-NBS Corrosion Data Program <i>J.D. Trim, D.B. Anderson and G.J. Laverty</i> | 1781 |
| 9.3. | Mastering Process Industry Corrosion Problems: Anti-corrosion Measures as Part of Plant Maintenance System <i>Ylasaari, Seppo</i> | 1785 |

VOLUME III : SESSIONS 10 to 13

SESSION 10

ENVIRONMENT-ASSISTED CORROSION (EROSION, SCC, FATIGUE)

| | | |
|-------|--|------|
| 10.1. | On Loading Mode (I, III) Technique as a Means of Determination of Crack Growth Mechanism in Stress-corrosion Cracking <i>V.A. Marichev</i> | 1791 |
| 10.2. | Texture-based Computer Modelling of Environmentally Induced Cleavage in Hexagonal Close Packed Metals <i>K. Linga Murty, Brent L. Adams and David L. Baty</i> | 1799 |
| 10.3. | Stress Corrosion Test Method Using Self-restraint Small-size Specimens <i>Y.W. Shi, H.H. Li and F.C. Liu</i> | 1825 |

| | | |
|--------|--|------|
| 10.4. | Stress Corrosion Cracking in Steels Used for the Manufacture of Nonmagnetic Drill Collars <i>H. Kohl</i> | 1831 |
| 10.5. | Liquid Metal Corrosion under Constant and Cycling Stress <i>Hans U. Borgstedt and Gunter Frees</i> | 1843 |
| 10.6. | Effect of Temperature, Concentration of Medium and Potential on Intergranular Stress Corrosion Cracking of Mild Steel in NaNO_3 -solution <i>Zhao Keqing</i> | 1853 |
| 10.7. | Resistance of Aluminized Steel to Environmental Corrosion <i>P. Molera and P. Tierra</i> | 1863 |
| 10.8. | Relations between the Non-sensitized Intergranular Corrosion and the Potentials and Test Method of Its Susceptibility for 316L Stainless Steel <i>Yu Fuzhou, Wang Yueping and Cheng Hua</i> | 1867 |
| 10.9. | Electrochemical Conditions at the Crack Tip and Crack Propagation Rates during Corrosion Fatigue of Steel in Deaerated Sea Water <i>C.J. Van Der Wekken and J. Zuidema</i> | 1871 |
| 10.10. | Critical Conditions for High Alloys in Sour Gas Environments <i>Akihiro Miyasaka, Kozo Denpo and Hiroyuki Ogawa</i> | 1881 |
| 10.11. | Role of Microadditions of Boron in Intergranular Corrosion of Austenitic Stainless Steels <i>O.V. Kasparova, V.M. Milman, N.I. Khokhlov and Ya. M. Kolotyřkin</i> | 1891 |
| 10.12. | Effect of CaCl_2 Concentration on the Probability Distribution of Stress Corrosion Cracking Failure Time of Type 304 Stainless Steel <i>T. Shibata, S. Fujimoto, A. Asada and J. Nakata</i> | 1897 |
| 10.13. | Intergranular Stress Corrosion Cracking of Sensitized AISI 304 by Fluoride Ions and Its Inhibition <i>G. Trabanelli, F. Zucchi and G. Demertzis</i> | 1905 |
| 10.14. | The Relationship between CrNi 18-10 Austenitic Stainless Steel Intergranular Corrosion and the Linear Welding Energy <i>F. Bejan, V. Miclosi and V. Bratian</i> | 1913 |
| 10.15. | CO_2 and H_2S Oil Environments Resisting Steels <i>Liuba Damian, Nicolae Dragan and Silvia Jurubita</i> | 1919 |
| 10.16. | Evaluation of Resistance to Intergranular Corrosion of Stabilized Stainless Steels <i>Vladimir Cihal</i> | 1929 |
| 10.17. | The Surface Morphologies of Crack during Stress Corrosion Crack Propagation <i>Chu Youngchang and Yang Dazhung</i> | 1941 |
| 10.18. | Research on Acoustic Emission Characteristic and Mechanism of Stress Corrosion Cracking <i>Yang Dazhuang and Chu Youngchang</i> | 1949 |
| 10.19. | An Investigation into the Fretting-Corrosion-Fatigue of High Strength Steel Wire <i>M. Takeuchi and R.B. Waterhouse</i> | 1959 |
| 10.20. | The Fretting of Stainless Steels in Selected Corrosive Environments <i>B.R. Pearson and R.B. Waterhouse</i> | 1967 |
| 10.21. | Corrosion Fatigue Behaviour of Austenitic Stainless Steels in Chloride Solutions <i>T. Magnin, D. Desjardins and M. Puiggali</i> | 1979 |
| 10.22. | Effect of Some Extraneous Ions on the SCC Susceptibility of AISI 304 SS in Polythionic Acid <i>K. Ravindranath and S.N. Malhotra</i> | 1987 |
| 10.23. | Stress Corrosion Cracking of Mild Steel in a Cooling Water System due to Nitrobacteria <i>M. Izumiya, N. Shimizu and M. Yamamoto</i> | 2001 |
| 10.24. | Stress Corrosion Cracking of Soft Martensitic CrNi Steel Grade G-X5CrNi134 as a Function of Its Heat-treatment Condition <i>W. Gysel, H. Gathmann, S. Chandra and R. Stangel</i> | 2009 |
| 10.25. | Effect of Residual, Impurity Elements and Microstructure, on the Mechanical Properties and the Crack Growth Rate in Delayed Failure Test of Martensitic Fe-Ni Alloy <i>L. Larabi, M. Habashi, J. Galland, J. Barta and M. Turdy</i> | 2037 |
| 10.26. | Stress Corrosion Testing of Al-Zn-Mg Alloys <i>M.D. Sahu</i> | 2051 |
| 10.27. | The Intergranular Corrosion Resistance of 17% Cr Ferritic Stainless Steels When Overheated <i>F. Bejan, O. Radovici, D. Nuta and A. Banu</i> | 2063 |

| | | |
|--------|--|------|
| 10.28. | Electrochemical Study of the Corrosion Fatigue of Low Alloy Steels in Aqueous Solutions Containing Carbonate-bicarbonate Ions <i>Elida B. Castro, Liliana M. Gassa and Jorge R. Vilche</i> | 2071 |
| 10.29. | Stress Corrosion Cracking of High Strength Al-Cu-Mg-Si Alloys after Two-Step Aging <i>Chen Zailiang, Qian Yourong and Xing Shuyi</i> | 2081 |
| 10.30. | The Effects of Stress Ratio on Corrosion Fatigue Crack Growth of a High Strength Steel <i>Huang Shuju, Zhang Pingsheng, Quan Gaofeng and Song Yujiu</i> | 2089 |
| 10.31. | Effect of Environmental Media on Stress Corrosion Cracking of High Strength Steel 37SiMnCrMoV <i>Quyang Shewang, Li Renshun and Wu Rengeng</i> | 2097 |
| 10.32. | Stress Corrosion Cracking of Welded Joints in Caustic and Nitrate Solutions <i>Chen Zexin, Zhou Guangqi, Dong Junming, Qi Jigao, Xue Jin and Yang Hu</i> | 2103 |
| 10.33. | Subcritical Propagation of SC-crack of Welded Joints in Caustic and Nitrate Solutions <i>Chen Zexin, Zhou Guangqi, Dong Junming, Qi Jigao, Xue Jin and Yang Hu</i> | 2111 |
| 10.34. | Some Studies on Stress Corrosion Cracking in Plain Carbon Steels <i>U.K. Chatterjee, S. Bhattacharya and S.C. Sircar</i> | 2121 |
| 10.35. | Effect of Solution Concentration on Stress-corrosion Cracking of Mild Steel in Phosphate Medium <i>R. Raicheff, J. Marcheva and L. Fachikov</i> | 2133 |
| 10.36. | Constant Strain Rate Test of SCC of Type 18/8 Ti Austenitic Stainless Steel in Boiling 45wt% MgCl ₂ Solution <i>Chen Liangshi and Song Shuying</i> | 2143 |
| 10.37. | Effect of Microstructure on Electrochemical Polarization and SCC of Eutectoid Steels <i>Raj Narayan, Ashok Kumar and K.P. Singh</i> | 2157 |
| 10.38. | The Relation between Stress Corrosion Cracking and Hydrogen Embrittlement <i>Li Ming Hua</i> | 2165 |
| 10.39. | Stress Corrosion Cracking of Carbon Steel in Amine Units <i>K. Rintamaki and P. Kuusela</i> | 2177 |
| 10.40. | Corrosion Behaviour of an AISI 304 Stainless Steel Hip Treated <i>Gianni Rondelli, Alberto Cigada, Bruno Vicentini and Tommaso Pastore</i> | 2185 |
| 10.41. | Slow Strain Rate Test Applicability for Sulphide Stress Corrosion Cracking Study of High Alloyed Stainless Steels for Oil Wells <i>Alberto Cigada, Francesca Brunella, Bruno Vicentini and Leopoldina Galelli</i> | 2193 |
| 10.42. | Stress Corrosion Cracking of High Strength Prestressing Steel in 1N Na ₂ HPO ₄ Medium <i>S. Ramu and N.S. Rengaswamy</i> | 2205 |
| 10.43. | Investigation on Some Factors Influencing Propagation of SCC of 18-8 Austenitic Stainless Steel in the Medium Containing Cl ⁻ <i>Wei Baoming and Hao Ling</i> | 2209 |
| 10.44. | Significance and Integration of Creep Deformation Modeling in the Quantitative Evaluation of Intergranular SCC at Moderate Temperature <i>Y.S. Garud</i> | 2215 |
| 10.45. | Influence of Potential and pH on the Stress Corrosion Cracking of a Duplex Stainless Steel in Chloride Solution <i>S.K. Ghosal, P.K. De, H.S. Gadiyar and G.V. Prabhugaonkar</i> | 2223 |
| 10.46. | Influence of Externally Applied Stresses on Pure Nickel in a Dry, Sulphidizing Environment <i>E. Robin and S. Toesca</i> | 2237 |
| 10.47. | Effect of Ageing at 973K on the Stress Corrosion Cracking Behaviour of Type 304 Stainless Steel in Boiling MgCl ₂ Solution <i>P. Muraleedharan and J.B. Gnanamoorthy</i> | 2241 |
| 10.48. | Evaluation of Susceptibility to Stress Corrosion Cracking (SCC) in Sodium Chloride Solution of Weldments of Cold Rolled Type 316 Stainless Steel <i>H.S. Khatak, J.B. Gnanamoorthy, K.A. Padmanabhan and P. Rodriguez</i> | 2249 |
| 10.49. | Hot Salt Stress Corrosion Cracking of a Titanium Alloy: The Phenomenon in View of Aero Gas Turbine Operating Condition <i>R.K. Dinnappa</i> | 2255 |
| 10.50. | The Influence of Carburizing and Decarburizing Environments on the Creep Behaviour of Ni-22Cr-9Mo-12Co-1Al <i>W.J. Quadackers, R.V.D. Gracht, P.J. Ennis and H. Schuster</i> | 2273 |

| | | |
|--------|--|------|
| 10.51. | Effect of Strain Rate on the Stress Corrosion Crack Behaviour and Mechanical Properties of Stainless Steel in Hot Magnesium Chloride <i>D.E. Davies, J.P. Dennison and C. Price</i> | 2283 |
| 10.52. | Prediction of the Onset and Time-to-Failure for Hydrogen Stress Cracking of Line-pipe Steel <i>B.W. Cherry and B.M. Jenkins</i> | 2291 |
| 10.53. | Environmental Effects on High Temperature Crack Growth <i>K. Sadananda</i> | 2301 |

SESSION 11

HYDROGEN PERMEATION AND EMBRITTLEMENT

| | | |
|--------|--|------|
| 11.1. | Anomalous Isotope Effects during Hydrogen Embrittlement of Structural Materials in Electrolytes <i>V.A. Marichev</i> | 2321 |
| 11.2. | Hydrogen Pick-up During Corrosion of Steel : Influence of Inhibitors and Promoters <i>B.S. Chaudhari and T.P. Radhakrishnan</i> | 2327 |
| 11.3. | A Study of Alkali Embrittlement Cracking of Low Carbon Steel Welded Joints <i>Xue, Jin Wang, Yuwen Zhou, Lixia and Qi, Jigao</i> | 2337 |
| 11.4. | Hydrogen Induced Cracking Susceptibility of Low Strength Steels with Different Phosphorus Content in Acid Media <i>R.K. Dayal and H.J. Grabke</i> | 2347 |
| 11.5. | Hydrogen Embrittlement Behaviour of Ni-Nb-Cr and Ni-Nb-Al Amorphous Alloys <i>R.D.K. Misra and D. Akhtar</i> | 2355 |
| 11.6. | The Mechanism of Impeding the Hydrogenation of Cathodically Polarized Titanium by Anions of Hypochlorite and Chlorate <i>M. Kolotyrykin Ya, B. Skuratnik Ya, V.B. Torshin and I.V. Riskin</i> | 2363 |
| 11.7. | The Effect of Minor Additions Mn, Cr, Zr and Ti on the Hydrogen Embrittlement in Al-Zn-Mg-Cu Alloy <i>Zhaoqi Lin, Hongqiang Ru, Gang Zhao and Guijing Sun</i> | 2369 |
| 11.8. | Hydrogen Diffusivity Impure Aluminium by Using Electrochemical Hydrogen Permeation Technique <i>Chu Youngchang, Yin Heyun and R.M. Latanision</i> | 2379 |
| 11.9. | Effect of Hydrogen on Anodic Behaviour of 304 Stainless Steel <i>Li-Jie Qiao, Wu-Yang Chu, Chi-Mei Hsiac and Hua Huang</i> | 2389 |
| 11.10. | Study of Improving the Resistance of High Strength Steel to Hydrogen Embrittlement <i>Li Renshun and Wu Rengeng</i> | 2397 |
| 11.11. | Studies on Hydrogen permeation in Zinc Plating Baths <i>K.N. Srinivasan and S. Venkatakrishna Iyer</i> | 2409 |
| 11.12. | The Influence of Phase Content on Steel Hydrogen Stability at Elevated Temperatures and Pressures <i>Yu. I. Archakov and I.D. Grebeshkova</i> | 2421 |

SESSION 12

INDUSTRIAL CORROSION PROBLEMS

| | | |
|-------|--|------|
| 12.1. | Moist Hydrogen Sulphide Corrosivity <i>A.M. Al-Hashimi</i> | 2437 |
| 12.2. | Primary and Secondary Water Chemistry on PWR Nuclear Power Plant <i>A.M. Al-Hashimi</i> | 2443 |
| 12.3. | Corrosion on Steel Pipes by Potable Water <i>A.M. Shams El Din, E.A. El Sum and E.Y. El Roubi</i> | 2449 |
| 12.4. | Studies on Alkaline Cooling Water Treatment <i>K.M. Verma, M.P. Gupta, B.B. Sinha and J.S. Rai</i> | 2461 |
| 12.5. | Corrosion of Equipment in the Steam Circuit of a Fertilizer Plant <i>K.M. Verma, H. Ghosh, S.C. Verma, A.K. Sinha and K.C. Pattnaik</i> | 2467 |
| 12.6. | Stress Corrosion and Corrosion Fatigue Cracking Occurring in a Refinery Unit <i>Y.W. Shi, P.L. Fan, Y.X. Dang and J.Z. Li</i> | 2479 |
| 12.7. | A Study of Surface Film Formed on 316L Stainless Steel in Industrial Urea Media <i>Sun Yan-Fie and Han Wen-An</i> | 2485 |
| 12.8. | Investigation of Corrosion Protection in the Fertilizer Industry <i>Ljubomir Dukić</i> | 2493 |

| | | |
|--------|---|------|
| 12.9. | Corrosion Behaviour of Boiler Steel EN-24 in Sugarcane Ash <i>S. Kameswari and M. Vijayakumar</i> | 2501 |
| 12.10. | Diagnosis of Mechanical and Corrosion Wear in Sugar Industry <i>L. Uller, S.M. Bastos, O.F. Ferreira, M.V. de Oliveira, I.C. Abud and R.U. Centeno</i> | 2509 |
| 12.11. | A Study of Steel Corrosion in Bleaching Environment of Pulp and Paper Industry <i>A.K. Singh, B. Gaur, S. Kumar, N.J. Rao and V.K. Tewari</i> | 2519 |
| 12.12. | Corrosion in Coal Gasification Quench System : A Selected Review <i>Subrata Bhattacharyya</i> | 2529 |
| 12.13. | Selection of Materials of Construction for Carboxylic Acids Mixture in the Waste Liquors and Corrosion Control by Anodic Protection <i>G.H. Thanki, M.H. Mehta and V.A. Sanghani</i> | 2553 |
| 12.14. | Electrochemical Behaviour and Field Performance of Stainless Steels in Urea Synthesis Environment <i>F. Mancía and A. Tamba</i> | 2559 |
| 12.15. | Behaviour of Niobium in the Chlorine-alkali Industry <i>L.O.S. Bulhoes, M.A.B. Gomes, A.A. Huss, R. Guimaraes</i> | 2575 |
| 12.16. | Titanium, Tantalum, Zirconium and Niobium to Combat Corrosion in Chemical Industry <i>R. Thangappan</i> | 2581 |
| 12.17. | Pitting of Carbon Steel in Sweet Crude Oil Service <i>A.K. Dunlop and R.S. Treseder</i> | 2585 |
| 12.18. | Stress Corrosion Cracking of Equipment in Chemical Process Industries <i>K.N. Goswami, K.K. Shyam and P.K. Mukhopadhyay</i> | 2593 |
| 12.19. | Corrosion Problems in Steam Turbines at Fossil and Nuclear Power Stations <i>R. Viswanathan, R.I. Jaffee and B.C. Syrett</i> | 2601 |
| 12.20. | Design of Anodic Protection System for Stainless Steel Heat Exchangers in Sulphuric Acid Industry <i>B. Sathianandham, K.R. Ramakrishnan, Y. Mahadeva Iyer and K. Balakrishnan</i> | 2617 |
| 12.21. | The Effect of Elemental Constituents of Steel on Corrosion and Hydrogen Evolution in Pickling Bath <i>K. Ravindranath and V.P. Sastry</i> | 2629 |
| 12.22. | Lowering General and Preventing Local Kinds of Corrosion of Process Equipment by Anodic and Cathodic Protection <i>V. Kuzub, V. Novitsky, V. Krikun and U. Nikhayenko</i> | 2645 |
| 12.23. | Use of Special Stainless Steels in Indian Chemical Process Industries <i>K. Elaya Perumal</i> | 2655 |

SESSION 13 INHIBITORS

| | | |
|-------|---|------|
| 13.1. | Electrochemical Mechanism of Inhibiting the Corrosion of Metals with Oxyanions <i>Yu. Mikhailovsky, P. Strekalov and G. Berdzenishvili</i> | 2669 |
| 13.2. | Effect of Various Substituents in furan on the Inhibitor Efficiency <i>A.S. Fouada</i> | 2697 |
| 13.3. | Discussion on Corrosion Rate of High Concentration of Chloride Water and the Evaluation of Corresponding Inhibitors <i>Lu Zhu, Chen Chon-Shin and Hu Rong</i> | 2703 |
| 13.4. | An Investigation into Plant Materials as Corrosion Inhibitor for Hydrochloric Acid <i>Peng Keru, Pei Yulian, Huang Qiulong and Wang Xinqin</i> | 2709 |
| 13.5. | Corrosion Inhibition of Alkyl Amines in Acid Solution <i>Zhang Jiuyuan, Zhang Yuqin, Zhang Bohou and Wang Xucheng</i> | 2715 |
| 13.6. | Study of the Mechanism of Inhibition of 3, 5-Diaminobenzoic Acid towards the Corrosion of Mild Steel in Hydrochloric Acid <i>Ibrahim H. Omar, G. Trabanelli and F. Zucchi</i> | 2723 |
| 13.7. | Inhibition of the Corrosion of Iron and Steel in Acid Pickling Media by Nitrogen Containing Compounds <i>S.L. Granese and B.M. Rosales</i> | 2733 |
| 13.8. | SERS and Impedance Study on Inhibition of Copper Corrosion in Sulfate Solutions by Benzotriazole and Its Derivatives <i>Kunitsugu Aramaki, Rinju Youda and Hiroshi Nishihara</i> | 2747 |

| | | |
|--------|--|------|
| 13.9. | Adsorption and Corrosion Inhibition Effect of Polar Organic Compounds on Iron in HCl-HClO ₄ Solutions <i>Kunitsugu Aramaki, Tsuyoshi Mochizuki and Hiroshi Nishihara</i> | 2759 |
| 13.10. | Corrosion Inhibition of Mild Steel in Pickling Acids by Ethoxylated Unsaturated Fatty Acids <i>F. Hanna, G.M. Sherbini and Y. Barakat</i> | 2771 |
| 13.11. | Adsorption of Aliphatic Amines on Iron Surface from Acidic Solutions <i>Cao Chu-Nan and Zhou Shengqi</i> | 2777 |
| 13.12. | Corrosion Inhibition of 304 Stainless Steel in H ₃ PO ₄ /Cl-solutions by Metallic Cations <i>A.A. El-Hosary, M.M. Badran, R.M. Saleh and H.A. El-Dahan</i> | 2787 |
| 13.13. | The Synergetic Effect of Ethanolamine and Benzotriazole on the Corrosion Inhibition of Copper <i>Wang Xingqing and Zhang Yufu</i> | 2799 |
| 13.14. | Effect of Structure Parameters of Organic Inhibitors on Their Efficiency in Inhibiting Corrosion of Steel in Hydrocarbon/Electrolyte System <i>A.V. Fokin, M.V. Pospelov, Yu. N. Shekhter, Ye. S. Churshukov, L.P. Maiko and A. Ya. Sergeykin</i> | 2807 |
| 13.15. | Factors of Corrosion Inhibition of Stainless Steels and Fe-Ni Alloys by Chloride in H ₂ SO ₄ <i>F. Bourelrier and K. Vu Quang</i> | 2813 |
| 13.16. | Inhibiteurs de la corrosion du cuivre par l'eau de gâbes "Sud Tunisien"; leur mode d'action <i>E. Triki, J.P. Labbe, M. Delamar, H. Chelli and J. Ledion</i> | 2819 |
| 13.17. | Study of the Kinetics and Mechanisms of Pitting Inhibition by Chromate of 304 Stainless Steel in Chloride Solutions <i>C. Lemaitre, B. Baroux and G. Beranger</i> | 2834 |
| 13.18. | Inhibition of Corrosion of Mild Steel in Sea Water Using Gluconates <i>R.P. Pandya, J.K. Langalia, P.R. Mehta, G.D. Bhat and M.M. Taqui Khan</i> | 2849 |
| 13.19. | Plastics Containing Corrosion Inhibitors <i>V.A. Goldade, L.S. Pinchuk and V.A. Struk</i> | 2861 |
| 13.20. | Corrosion Protection I <i>C. Vogtlin</i> | 2871 |
| 13.21. | Corrosion Protection II <i>C. Vogtlin</i> | 2875 |
| 13.22. | Triazole Derivates and Similar Compounds as Corrosion Inhibitors <i>J. Penninger, K. Wippermann and J.W. Schultze</i> | 2881 |
| 13.23. | The Influence of Benzotriazole on the Resistance of Mild Steel to Localized Attack in Chloride Solutions <i>M.A. Barbosa</i> | 2883 |
| 13.24. | Investigations on Copper Corrosion Inhibitors <i>O.P. Agrawal, I.K. Bhatnagar and Virendra Kumar</i> | 2895 |
| 13.25. | Effect of S-Benyl Thiouronium Chloride on the Corrosion of Mild Steel in HCl Solution <i>K. Chandrasekara Pillai and R. Narayan</i> | 2901 |
| 13.26. | Acetylinic Alcohols as Inhibitors for Nickel in Hydrochloric Acid Solutions <i>V.S. Muralidharan and B. Dhandayuthapani</i> | 2911 |
| 13.27. | Impedance Studies in Neutral Inhibitive Media <i>S. Srinivasan and K. Balakrishnan</i> | 2921 |
| 13.28. | The Effect of Some Inhibitors on Mechanical Relationships of Metals and Their Corrosion in Acids <i>I.P. Anoshchenko, G.I. Lukyanova (Mrs.), F.I. Anoshchenko and A.I. Reznichenko</i> | 2931 |
| 13.29. | Synergistic Effect of Dicyclo Hexylamine—with Halide Ions on the Corrosion of Mild Steel in Sulphuric Acid Medium <i>S. Syed Azim and S. Venkatakrishna Iyer</i> | 2935 |
| 13.30. | Non-heavy Metallic Inhibitor for Control of Corrosion and Fouling in an Ammonia Cooling Water System <i>G.S. Bhattacharyya</i> | 2939 |
| 13.31. | Synergistic Effects of Halide Ions and Benzyl Amine on Electrochemical Behaviour of Mild Steel in Dilute Sulfuric Acid <i>N.S. Rawat and G. Udayabhanu</i> | 2963 |
| 13.32. | On the Nature of Surface Compounds Using Sulphurated Inhibitors <i>D. de Filippo and A. Rossi</i> | 2971 |
| 13.33. | The Effect of the Inhibitor DEDC on the Sulphide Induced Attack on Aluminium Brass and Cupronickel | |

| | | |
|--------|--|------|
| | Alloys in Flowing Synthetic Sea Water | 2985 |
| | <i>T.R. Jayaraman, Y. Kalpana and K. Venugopal</i> | |
| 13.34. | Hydrazine and Substituted Hydrazines as Corrosion Inhibitors for Mild Steel in Alkaline Mine Water | 3007 |
| | <i>N.C. Subramanyam, B.S. Seshadri and S.M. Mayanna</i> | |
| 13.35. | Acridine and Quinolines as Acid Corrosion Inhibitors for Copper | 3023 |
| | <i>N.C. Subramanyam, B.S. Seshadri and S.M. Mayanna</i> | |
| 13.36. | Inhibitors Study against Corrosion in Hydrocarbon Mixtures | 3039 |
| | <i>N.B. Petkova and V.L. Tasseva</i> | |

VOLUME IV : SESSIONS 14 to 19

SESSION 14

LOCALIZED CORROSION

| | | |
|--------|---|------|
| 14.1. | A Theoretical Approach to the Mechanism of Pitting Initiation I. The Thermodynamics of Pitting Initiation | 3047 |
| | <i>Wei Baoming and Hao Ling</i> | |
| 14.2. | A Theoretical Approach to the Mechanism of Pitting Initiation II. The Kinetics of Pitting Initiation | 3053 |
| | <i>Wei Baoming and Hao Ling</i> | |
| 14.3. | Research on Knife-line Attack Resisting Properties of Cr17Ni2 Steel Weld Joint | 3057 |
| | <i>Xue, Jin Wang, Yuwen and Qi Jigao</i> | |
| 14.4. | The Relationship between the Propagation Rate of Localized Corrosion and the Electrode Potential of Local Anode of Steels for Offshore Platform | 3063 |
| | <i>Du Yuan-Long and Zou Chun-Xian</i> | |
| 14.5. | Crevice Corrosion of Stainless Steel in High Temperature Chloride Solutions | 3071 |
| | <i>K. Tanno and H. Yashiro</i> | |
| 14.6. | Stainless Steels Crevice Corrosion in Geothermal Waters | 3081 |
| | <i>Gh. Popescu, F. Bejan and A. Banu</i> | |
| 14.7. | Electrochemical Aspects of the Growth of Corrosion Pits in Stainless Steels | 3087 |
| | <i>Tero Hakkarainen</i> | |
| 14.8. | The Relative Susceptibility of P/M and A/M Al-Zn-Mg Alloys to Pitting Corrosion and Stress Corrosion Cracking in 3.5% NaCl | 3097 |
| | <i>E. Lunarska, Z. Szklarska-Smialowska and M. Elzeky</i> | |
| 14.9. | Pitting Corrosion of Austenitic Stainless Steels with Chemically Treated Surfaces | 3107 |
| | <i>Jaroslav Bystriansky and Milan Gottwald</i> | |
| 14.10. | Investigation on the Crevice Width Influencing Chemical and Electrochemical Parameters of the Solution in the Crevice | 3119 |
| | <i>Li Li, Wang Kuang, Kong Qin and Wang Shujuan</i> | |
| 14.11. | Some Aspects of the Initiation Phase of Crevice Corrosion of Stainless Steel in Chloride Solution | 3125 |
| | <i>A.M.P. Simoes and M.G.S. Ferreira</i> | |
| 14.12. | The Influence of the Fresh Cooling Water Component on the Pitting Corrosion of Brass Tubes | 3129 |
| | <i>Xu Chongwu, Gong Xinjie, Li Jinye and Jaing Hanhong</i> | |
| 14.13. | Stability of Localized Corrosion Processes | 3139 |
| | <i>H. Bohni</i> | |
| 14.14. | Correlation between Solvation Effects and Pitting Corrosion of Ti6Al4V in Methanolic Media | 3147 |
| | <i>M.B. Deshmukh, Iqbal Akhtar and K.M. Joshi</i> | |
| 14.15. | Corrosion Behaviour of Conductive Lines of Al-Cu on Oxidized Silicon Wafers | 3157 |
| | <i>J. Zahavi, M. Rotel, H.C.W. Huang, P.A. Toita and G. Schwartz</i> | |
| 14.16. | Prevention of Pitting Corrosion of Aluminium Easy-Open Ends on TFS Cans | 3167 |
| | <i>S. Furuya, M. Miyamoto, T. Masato and T. Yoshida</i> | |
| 14.17. | A New Method of Pitting Potential Determination | 3177 |
| | <i>P.K. Mitra and S.C. Sircar</i> | |
| 14.18. | Corrosion Behaviour of the 8090 Aluminium Lithium Alloy in Chloride Solutions | 3183 |
| | <i>S. Schnuriger, G. Mankowski, Y. Roques, G. Chatainier and F. Dabosi</i> | |
| 14.19. | Correlation between Long Time and Short Time Tests to Detect Pitting and Exfoliation Corrosion in Al- | |

| | | |
|--------|---|------|
| | Li (8090) Alloy | 3193 |
| | <i>J. Garcia, P. Ponthiaux, M. Habashi and J. Galland</i> | |
| 14.20. | Pitting, Crevice and Intergranular Corrosion Resistances of Titanium Modified Austenitic Stainless Steels | 3203 |
| | <i>U. Kamachi Mudali, R.K. Dayal, V. Seetharaman and J.B. Gnanamoorthy</i> | |
| 14.21. | Influence of Carbon Content on the Pitting Corrosion Behaviour of Thermally Aged Type 316 Stainless Steel Welds | 3213 |
| | <i>T.P.S. Gill, N. Parvathavarthini and J.B. Gnanamoorthy</i> | |
| 14.22. | Pitting Nucleation in Austenitic Stainless Steels | 3225 |
| | <i>M.B. Ives, Guo Ruijin and S.C. Srivastava</i> | |
| 14.23. | On the Origin of Pitting Induction Time | 3235 |
| | <i>M.B. Ives, Guo Ruijin and S.C. Srivastava</i> | |

SESSION 15 MARINE CORROSION

| | | |
|-------|---|------|
| 15.1. | Corrosion Behaviour of Cu-Ni Alloys in Sea Water at Different Hydrostatic Pressures | 3245 |
| | <i>Anna Maria Beccaria, Gildo Poggi and Gianrico Castello</i> | |
| 15.2. | Seawater Corrosion Behaviour of Steels with Varying Amounts of Copper | 3255 |
| | <i>R. Krishnan and M.B. Deshmukh</i> | |
| 15.3. | Effects of Variations in Biofouling Assemblage and Exposure Conditions on the Corrosion of Mild Steel | 3265 |
| | <i>M. Eashwar, P. Chandrasekaran, G. Subramanian and S. Venkatakrishna Iyer</i> | |
| 15.4. | Corrosion Characterization of Tungsten Alloys in Marine Environments | 3275 |
| | <i>K.L. Vasanth and C.M. Dacres</i> | |

SESSION 16 NON-AQUEOUS CORROSION AND LIQUID METAL EMBRITTLEMENT

| | | |
|-------|---|------|
| 16.1. | Corrosion Behaviour of SUS 329J1 Stainless Steel in Acetic Acid Solutions | 3289 |
| | <i>Isao Sekine and Kazumitsu Momoi</i> | |
| 16.2. | Sulphidation of Monocrystalline Cu-6.5% Al Alloy in Liquid Sulphur at 717°K | 3299 |
| | <i>Z. Zurek</i> | |
| 16.3. | Corrosion of Copper by Food Acids Containing Colourants and Sweetening Agents. Part V. Corrosion by Acetic Acid | 3305 |
| | <i>J.D. Talati and A.S. Patel</i> | |
| 16.4. | Corrosion of Austenitic Stainless Steel by Liquid Sodium and by Reactor Fuel in Fast Breeder Reactors | 3317 |
| | <i>C.K. Mathews</i> | |
| 16.5. | Anodic Dissolution of Iron in Organic Solvents | 3335 |
| | <i>G. Capobianco and F. Bellucci</i> | |

SESSION 17 OXIDATION/HOT CORROSION

| | | |
|-------|--|------|
| 17.1. | Studies of Some Solid State Reactions Relevant to Hot Corrosion | 3345 |
| | <i>A.U. Malik and M. Mobin</i> | |
| 17.2. | The Effect of Niobium on the Hot Corrosion Behaviour of Nickel-base Superalloy | 3367 |
| | <i>Zeng Kejun, Jin Zhanpeng and Huang Peiyun</i> | |
| 17.3. | The Stresses of Oxide Scale of Nb and Nb Alloy during High Temperature Oxidation | 3379 |
| | <i>Li Tieshan and Qu Yingzhe</i> | |
| 17.4. | Influence of Reactive Element Addition on the Protectivity of Al ₂ O ₃ Scales Formed on Fe-Cr-Al Base Alloys | 3385 |
| | <i>Shigeji Taniguchi and Toshio Shibata</i> | |
| 17.5. | Bistability in High Temperature Corrosion Processes | 3395 |
| | <i>J.P. Larpin, M. Lallemand and G. Bertrand</i> | |
| 17.6. | Oxidation of Copper in SO ₂ + O ₂ Atmosphere at 1100-1230°K | 3405 |
| | <i>J. Gawel</i> | |

| | | |
|--------|--|------|
| 17.7. | Sodium Sulphate Induced Hot Corrosion of Pure Fe, Mn and Cr in Combustion Gas <i>P. Nanni, V. Buscaglia, C. de Asmundis and S.K. Roy</i> | 3413 |
| 17.8. | Effect of Sulphate Anion on Anodic Breakdown of Oxidized Fe, Ni and Cr in Fused NaCl-KCl Eutectic at 700°C <i>Masaru Okuyama, Yasuhiko Itoi, Masahiro Kawakami and Koin Ito</i> | 3423 |
| 17.9. | The Corrosion and Abrasion Attack of Molten Zinc on the Bath Wall during Hot-dipping <i>Tamas Torok</i> | 3433 |
| 17.10. | Application of Acoustic Emission Technique in High Temperature Oxidation Studies <i>A.S. Khanna, B.B. Jha and Baldevraj</i> | 3443 |
| 17.11. | Effect of Various Heat-treatments on the Oxidation Behaviour of 2 1/4 Cr-1 Mo Steel <i>A.S. Khanna, R.K. Singh Raman and J.B. Gnanamoorthy</i> | 3453 |
| 17.12. | Effect of Cold Work on the Oxidation Resistance of Ferritic Steels <i>A.S. Khanna, J.B. Gnanamoorthy and P. Rodriguez</i> | 3463 |
| 17.13. | Corrosion Behaviour of Pure Titanium and Ti-6.6Al-2.9Mo-1.7Zr-0.23Si Alloy in NaCl and Na ₂ SO ₄ <i>S. Kameswari and R.D.K. Misra</i> | 3475 |
| 17.14. | Oxidation Kinetics of Cu-Zr Alloys <i>R.O. Toivanen, T.M. Lindholm, L. Laakso and V.K. Lindroos</i> | 3485 |
| 17.15. | Sulphidation Studies of Fe-15, Cr-4Al Alloy with Y and Zr Additions at 850°C <i>Deepak Saxena, Satya Prakash, M.L. Mehta and I.P. Saraswat</i> | 3495 |
| 17.16. | Effect of Zirconium on Isothermal and Cyclic Oxidation of Fe-15 wt%Cr-4 wt%Al Alloy in the Temperature Range of 1000-1300°C <i>J.L. Pandey, S. Prakash and M.L. Mehta</i> | 3507 |
| 17.17. | Oxidation of Pure Zirconium in Pure Oxygen in Temperature Range 400-850°C <i>Chen Heming and Ma Chunlai</i> | 3523 |
| 17.18. | Hot Corrosion of Nickel and Cobalt Base Alloys at Intermediate Temperatures <i>Ajay K. Misra</i> | 3533 |
| 17.19. | Combined or Successive Effect of a Strain and of Oxidation of an NiCr-16 Fe-8 Alloy <i>A.M. Huntz, J. Rousselet, C. Quesne and G. Moulin</i> | 3555 |
| 17.20. | Oxidation Behaviour of Superalloys Protected by Plasma Sprayed MCrAlYTa Coatings <i>A.M. Huntz, A. Boumaza, G. Moulin and J.L. Lebrun</i> | 3565 |
| 17.21. | Improvement of Oxidation Resistance of Heat-Resistant Steel by Ion Beam Mixing <i>Liu Xiang-huai, Zheng Zhi-hong, Jiang Bing-yao and Tsou Shih-chang</i> | 3577 |
| 17.22. | Study on Corrosion Products of IN657 Alloy in Molten Salts <i>E. Otero, M.C. Merino, A. Pardo, M.V. Biezma and G. Buitrago</i> | 3583 |
| 17.23. | Fireside Corrosion Phenomena in Superheaters of Coextruded Materials with 18, 25, 35 and 50% Cr at Metal Temperatures of up to 700°C <i>N. Bolt and N.V. Kema</i> | 3593 |
| 17.24. | Studies on Non-isothermal Oxidation Behaviour of Iron and Iron-chromium Alloys <i>S.K. Roy and S.K. Bose</i> | 3603 |
| 17.25. | Effect of Interrupted and Uninterrupted Impressed Direct Current on the Oxidation Behaviour of Copper at High Temperatures <i>S.K. Bose, V. Ananth and S.C. Sircar</i> | 3615 |
| 17.26. | The Properties of Protective Scales on Surface Modified Stainless Steel towards Sulphidation at High Temperatures <i>E.A. Polman, T. Fransen and P.J. Gellings</i> | 3631 |
| 17.27. | Study of Oxidation Behaviour of Modified 9Cr-1Mo Ferritic Steel at Elevated Temperatures and Pressures <i>Ashok Kumar, P. Somanathan, M.N. Mungole and K.P. Singh</i> | 3641 |
| 17.28. | High Temperature Hot Corrosion Control by Fuel Additives (Contaminated Fuels) <i>Dasara V. Rathnamma and R. Nagarajan</i> | 3651 |
| 17.29. | High Temperature Corrosion of a Ni-base Superalloy by Vanadium <i>S. Ramakrishna Iyer, K.J.L. Iyer and V.M. Radhakrishnan</i> | 3665 |
| 17.30. | Laser Surface Alloying or Coating of Metals to Protect against High Temperature Corrosion <i>Alain Galerie, Marcel Caillet and Michel Pons</i> | 3671 |
| 17.31. | Co-deposition of Cr and Al by Pack Cementation and the Resistance of Such Coatings against Oxidation and Hot Corrosion <i>S.T. Shih, H.E. Chu and T.L. Cao</i> | 3681 |

| | | |
|--------|--|------|
| 17.32. | Corrosion and Oxidation Resistance of Zinc Composite Materials <i>D. Mukherjee, B. Venkataraman, N. Palaniswamy, M. Natesan and K. Balakrishnan</i> | 3689 |
| 17.33. | Corrosion Behaviour of Steel and Stainless Steel in Hot Carbonate Solutions <i>R. Meenakshisundaram, P. Subramanian, Vishalakshi Raveendran and K. Balakrishnan</i> | 3695 |
| 17.34. | Hot Corrosion Behaviour of Platinum Modified Coatings <i>R. Streiff and D.H. Boone</i> | 3699 |
| 17.35. | The Influence of Implanted Yttrium and Lanthanum on Morphology of Alumina Scale Grown on Beta-NiAl Intermetallic Compound <i>J. Jedlinski</i> | 3709 |
| 17.36. | Anodic Polarization of Iron, Chromium and Steel 15 × 28 in Molten Alkali Carbonates at 1073 K <i>I.N. Ozeryanaya, O.P. Penyagina and N.D. Shamanova</i> | 3719 |
| 17.37. | Influence of Sulphur on Oxidation of Ni ₆₆ Cr ₃₄ and Ni ₈₀ Cr ₂₀ Alloys <i>A.M. Huntz, G. Moulin and G. Ben Abderrazik</i> | 3723 |
| 17.38. | The Effect of Superficial Aluminization on the Corrosion of the Steel Fe 2.25 Cr 1 Mo in Different Oxidizing and/or Sulphidizing Atmospheres <i>Marcel Caillet, Alain Galerie and Abdellatif Skalli</i> | 3735 |
| 17.39. | Corrosion and Electrochemical Study on 316L (Urea Grade) Stainless Steel in Urea Solution under High Temperature and Pressure <i>Zhang Wu</i> | 3743 |
| 17.40. | Beneficial and Detrimental Effects of Silica in the High Temperature Oxidation of 20Cr/25Ni/Nb Stainless Steel <i>M.J. Bennett</i> | 3761 |
| 17.41. | Reaction of Stainless Steel with Liquid Potassium Containing Dissolved Oxygen <i>D. Krishnamurthy, N.P. Bhat and C.K. Mathews</i> | 3771 |
| 17.42. | The Behaviour of Some Super Alloys in Different High Temperature Atmospheres <i>A. Pekkonen, M.H. Tikkanen, S. Ylasaari, O. Forsen</i> | 3781 |
| 17.43. | Some Thermodynamic Investigations on the Ternary Oxygen Compounds of Relevance in the Corrosion of Sodium-steel Systems <i>T. Gnanasekaran, R. Sridharan, G. Periaswami and C.K. Mathews</i> | 3789 |
| 17.44. | Carburization of Steel in Liquid Sodium and the Nature of the Carbon-bearing Species <i>S. Rajendran Pillai, R. Ranganathan and C.K. Mathews</i> | 3799 |

SESSION 18 PASSIVATION AND SURFACE FILMS

| | | |
|-------|---|------|
| 18.1. | Anodic Behaviour of Titanium and Titanium Alloys in H ₂ SO ₄ Solutions—Influence of Some Inhibitors <i>Pu Suyun and Ji Shuda</i> | 3815 |
| 18.2. | Influence of the Structure of Protective Films on the Mechanical Breakdown of Passivity <i>R. Oltra, G.M. Indrianjafy, J.C. Colson and M. Keddam</i> | 3823 |
| 18.3. | The Passivation of Chromium <i>J.H. Gerretsen, J.J.M. Elemans, G. Bakker and J.H.W. de Wit</i> | 3829 |
| 18.4. | "In-situ" Laser Raman Spectroscopy Studies of Corrosion Films on Metals in High-temperature Aqueous Environments <i>C.A. Melendres, W. Ruther and J.J. McMahon</i> | 3841 |
| 18.5. | Ellipsometric Investigation of Passive Films Formation on Two Iron-Nickel Alloys <i>N.D. Totir</i> | 3849 |
| 18.6. | Effects of Calcium Ions on the Morphology and Corrosion Resistance of Zinc-phosphated Steel <i>G.N. Dhar, N.C. Debnath and Sandip Roy</i> | 3853 |
| 18.7. | Etching Properties of the Indium Tin Oxide <i>P. Pokela, R.O. Toivanen and V.K. Lindroos</i> | 3863 |
| 18.8. | Deterministic Models for the Distributions in Passivity Breakdown Parameters <i>Digby D. McDonald and Mirna Urquidi-McDonald</i> | 3875 |
| 18.9. | Potentiodynamic and Galvanostatic Passivity Measurements. A General Quantitative Interpretation: The Niobium Case <i>C.V. D'Alkaine and F.C. Nart</i> | 3895 |

| | | |
|--------|---|------|
| 18.10. | The Secondary Passivating Film on Tin in Sodium Perchlorate Solutions. Its Reduction Peak <i>C.V. D'Alkaine and S.R. Biaggio</i> | 3905 |
| 18.11. | The Reduction of Sn(II) Passivating Film on Tin Before and After the Growth of the Sn(IV) Passivating Film <i>S.R. Baiggio and C.V. D'Alkaine</i> | 3913 |
| 18.12. | Passivation and Stability of Passive State of Chrome-Nickel Austenitic Steels Depending on Molybdenum Content and MnS Inclusions <i>I.I. Reformatskaya, L.I. Freiman, Ya. M. Kolotyркиn, Yu. P. Konnov and A.E. Volkov</i> | 3919 |
| 18.13. | Kinetics of Passivation of Stainless Steels in Chloride Solutions <i>Ying-yang Zhu, Ri-zhang Zhu, Kuang Wang and Wen-qi Zhang</i> | 3927 |
| 18.14. | The Passivating Films of Zinc in Alkaline Solution <i>N. Bocchi, M.R. da Cunha and C.V. D'Alkaine</i> | 3941 |
| 18.15. | Breakdown of the Passive Film on Nickel and Nickel Alloys Induced by Sulphur <i>P. Marcus, H. Talah and J. Oudar</i> | 3947 |
| 18.16. | Application of Impedance Technique to the Interpretation of the Role of Alloying Tungsten on the Passivity of Stainless Steels <i>A. Irhzo, M. El. Safty, N. Bui and F. Dabosi</i> | 3953 |
| 18.17. | Ellipsometric Study of Passive Films Formed on a Duplex Stainless Steel in Chloride Solution <i>Zhou Qingchu, Xu Naixin and Shih Shengtai</i> | 3961 |
| 18.18. | Electrochemistry of Chromium <i>L.O.S. Bulhões, E.C. Pereira de Souza, P.C. Camargo and A.J. Damiao</i> | 3969 |
| 18.19. | Influence of Alloying Components on Passivation of Titanium and Aluminium Alloys in Molten Alkali Carbonates <i>I.N. Ozeryanaya, T.I. Manukhina and W.I. Sannikov</i> | 3975 |
| 18.20. | Study of the Passivation Kinetics of Zircaloy 4 in Chloride Containing Aqueous and Hydroorganic Solutions <i>Y. Roques, G. Mankowski, G. Chatainier and F. Dabosi</i> | 3983 |
| 18.21. | ESCA and Impedance Study of Passive Films on Mo-containing Stainless Steels <i>A. Irhzo, L. Gengembre, N. Bui and F. Dabosi</i> | 3991 |
| 18.22. | The Role of Silicon in the Corrosion of Stainless Steels in Nitric Acid Solutions <i>A.J. Gardner and J.S.L. Leach</i> | 3999 |

SESSION 19 TESTING, MONITORING AND STANDARDS

| | | |
|-------|---|------|
| 19.1. | The Inflection Point Method with Inter I Code <i>G. Rocchini</i> | 4009 |
| 19.2. | A Technique for Measurement of Differential Polarization Resistance <i>Cao Chu-Nan, Song Chizhe and Wang You</i> | 4017 |
| 19.3. | Development of a Field Monitoring Method for the Protective Properties of Rust and Paint Films on Steel Structures <i>Hiroshi Kihira, Satoshi Ito and Tomomi Murata</i> | 4023 |
| 19.4. | AC Impedance of Iron in Sulfuric Acid Medium Measured by Laplacian Transformation Method <i>Lu-an Yao and Xi-che Hu</i> | 4031 |
| 19.5. | Applicability of EPR Technique for Assessing Intergranular Corrosion Susceptibility of Cold Worked Type 304 SS <i>N. Parvathavarthini, R.K. Dayal, S.K. Seshadri and J.B. Gnanamoorthy</i> | 4039 |
| 19.6. | Erosion of Metals in High Speed Mist Flow Evaluation of Threshold Velocity by Acoustic Emission System <i>T. Shinogaya, T. Shinohara and M. Takemoto</i> | 4047 |
| 19.7. | The Determination of Corrosion Rates by Analysis of Inflection Point Data <i>D.M. Dražić, V. Vašćić and J. Popić</i> | 4055 |
| 19.8. | Electrochemical Noise Corrosion Monitoring Method in Laboratory Use <i>Ciril Zevnik and Iskra Kibernetika</i> | 4061 |

| | | |
|--------|---|------|
| 19.9. | Relaxation Techniques for Measurement of Corrosion Rate <i>V. Lakshminarayanan and S.R. Rajagopalan</i> | 4075 |
| 19.10. | A New Three Electrode Direct Reading Digital Corrosion Meter <i>P.E. Sankaranarayanan, Mrs. Venusubramanian, P. Sudhakara Rao, Mrs. Vijayalakshmi Ramakrishnan and Mrs. K. Meenakshi</i> | 4085 |
| 19.11. | A Technique for Measuring Adsorption of Gases on Flat Surfaces <i>Leo Volpe</i> | 4091 |
| 19.12. | Corrosion of Nickel in Acids—An Accelerated Tafel Plot Study <i>V. Yegnaraman and G. Prabhakara Rao</i> | 4099 |
| 19.13. | Evaluation of Faradaic Distortion Method for Corrosion Rate Measurements <i>G. Venkatachari and K. Balakrishnan</i> | 4107 |
| 19.14. | Atmospheric Corrosion Monitoring by Hydrogen Permeation Technique <i>P.L. Joseph, T.P. Madhavan, C.J. Indira, K.V. Prasad and M.E.K. Janaki</i> | 4111 |
| 19.15. | Monitoring of Corrosion and Wear Debris for Better Management of Equipment <i>D. Short and T.V. Krishnamurthy</i> | 4123 |
| 19.16. | A.C. Impedance Measurements for Characterizing the Electrochemical Behaviour of AA 3003 in Engine Coolants <i>A.M. Merillon, P. Gimenez, G. Monteil and C. Roques-Carnes</i> | 4131 |
