

# **METHODS FOR DETERMINING METAL ION ENVIRONMENTS IN PROTEINS: Structure and Function of Metalloproteins**

---

*Editors:*

DENNIS W. DARNALL and RALPH G. WILKINS

*Department of Chemistry, New Mexico State University, Las Cruces,  
New Mexico, U.S.A.*

ELSEVIER/NORTH-HOLLAND  
NEW YORK • AMSTERDAM • OXFORD

## Contents

PREFACE	ix
CONTRIBUTORS	xi
Chapter 1	
ELECTRONIC ABSORPTION SPECTROSCOPY	
Harry B. Gray	
I. Introduction	1
II. Principles and Examples	3
References	23
Chapter 2	
CIRCULAR DICHROISM AND MAGNETIC CIRCULAR DICHROISM	
Bert L. Vallee and Barton Holmquist	
I. Introduction and Overview	27
II. Experimental Techniques for CD and MCD	31
III. Circular Dichroism (CD)	37
IV. Magnetic Circular Dichroism (MCD)	54
V. Conclusion	71
References	72
Chapter 3	
METAL IONS AS DONORS AND ACCEPTORS OF FLUORESCENCE	
Barton Holmquist	
I. Introduction	75
II. Radiationless Resonance Energy Transfer	76
III. Metals as Energy Acceptors	78
IV. Metal $\rightarrow$ Metal Energy Transfer	80
V. Fluorescence Lifetime Probes	86
VI. Circularly Polarized Luminescence	89
VII. Conclusion	90
References	92

## Chapter 4

## INFRARED SPECTROSCOPY

Winslow S. Caughey

I. Introduction	95
II. Experimental Measurements	96
III. Analysis of Spectra	106
IV. Perspectives	114
References	114

## Chapter 5

## RAMAN SPECTROSCOPY

D. F. Shriver

I. Introduction	117
II. Principle of the Method	118
III. Experimental Techniques	126
IV. Comparison of Infrared and Raman Spectroscopy	134
V. Applications	135
VI. Trends and Future Developments	145
References	148

## Chapter 6

## ELECTRON PARAMAGNETIC RESONANCE

Graham Palmer

I. Introduction	153
II. Principles and Applications	158
III. Considerations in the Use of the Technique	178
IV. Future Directions	180
References	181

## Chapter 7

## HIGH RESOLUTION NMR

Lana Lee and Brian D. Sykes

I. Introduction	183
II. Principle of the Method	188
III. Applications	193
IV. Trends and Future Developments	200
References	208

## Chapter 8

## NUCLEAR MAGNETIC RELAXATION RATES

Albert S. Mildvan, Joseph Granot, Gary M. Smith and  
Michael N. Liebman

I. Introduction	211
II. Principles of the Method	212
III. Experimental Techniques	216
IV. Advantages, Disadvantages and Future Trends in the Paramagnetic Probe- $1/T_1$ -Method	232
V. Summary	234
References	235

## Chapter 9

## KINETIC APPROACH

Gordon G. Hammes

I. Introduction	237
II. Elementary Reactions of Metal Ions	238
III. Experimental Techniques	240
IV. Applications	248
V. Conclusion	261
References	262

## Chapter 10

## X-RAY DIFFRACTION

William N. Lipscomb

I. Introduction	265
II. The X-Ray Diffraction Method	266
III. Protein Structures Containing Metal Ions and Clusters	273
IV. General Comments	297
References	299

## Chapter 11

ON THE RESOLUTION OF METAL-LIGAND DISTANCES IN METALLOPROTEINS  
BY EXAFS

303

B. M. Kincaid and R. G. Shulman

## INDEX

311
