

# ANALYSIS OF ORDINAL CATEGORICAL DATA

**ALAN AGRESTI**  
*University of Florida*

**JOHN WILEY & SONS**

**New York • Chichester • Brisbane • Toronto • Singapore**

# Contents

<b>1. Introduction</b>	<b>1</b>
1.1. Ordinal Categorical Scales, 1	
1.2. Advantages of Using Ordinal Methods, 2	
1.3. Organization of This Book, 4	
<b>2. Basic Results for Cross-Classification Tables</b>	<b>5</b>
2.1. Cross-Classification Tables, 5	
2.2. Chi-Squared Statistics, 8	
2.3. Partitions of Chi-Squared, 12	
2.4. Odds Ratios, 15	
2.5. Measuring Association, 23	
2.6. Loglinear Models for Two Dimensions, 25	
Notes, 27	
Complements, 29	
<b>3. Associations in Multidimensional Tables</b>	<b>31</b>
3.1. Partial Association, 31	
3.2. Association and Interaction Structure, 34	
3.3. Loglinear Models for Three Dimensions, 39	
3.4. Loglinear Models for Higher Dimensions, 43	
Notes, 44	
Complements, 45	
<b>4. Data Analysis Using Loglinear Models</b>	<b>47</b>
4.1. Fitting Models for Three Variables, 47	
4.2. Comparison of Models, 54	
4.3. Model-Building, 60	

4.4.	Iterative Proportional Fitting, 64	
4.5.	Loglinear Models and Ordinal Information, 66	
	Notes, 69	
	Complements, 71	
<b>5.</b>	<b>Loglinear Models for Ordinal Variables</b>	<b>75</b>
5.1.	Loglinear Model for Ordinal-Ordinal Tables, 76	
5.2.	Loglinear Model for Ordinal-Nominal Tables, 84	
5.3.	Ordinal Loglinear Models for Higher Dimensions, 89	
5.4.	Interaction Models, 94	
	Notes, 98	
	Complements, 99	
<b>6.</b>	<b>Logit Models</b>	<b>104</b>
6.1.	Logistic Regression, 104	
6.2.	Logit Models and Loglinear Models, 108	
6.3.	Logits for an Ordinal Response, 112	
	Notes, 116	
	Complements, 117	
<b>7.</b>	<b>Logit Models for an Ordinal Response</b>	<b>120</b>
7.1.	Logit Model for Ordinal-Ordinal Tables, 120	
7.2.	Logit Model for Ordinal-Nominal Tables, 124	
7.3.	Ordinal Logit Models for Higher Dimensions, 127	
	Notes, 131	
	Complements, 132	
<b>8.</b>	<b>Other Models for Ordinal Variables</b>	<b>138</b>
8.1.	Log-Multiplicative Models, 138	
8.2.	Global Odds Ratio Models, 147	
8.3.	Mean Response Models, 148	
8.4.	Proportional Hazards Models, 150	
8.5.	Other Model-Building Approaches, 151	
	Notes, 153	
	Complements, 154	
<b>9.</b>	<b>Measures of Association for Ordinal Variables</b>	<b>156</b>
9.1.	Concordance and Discordance, 156	
9.2.	Ordinal-Ordinal Measures of Association, 159	

9.3.	Ordinal-Nominal Measures of Association, 165	
9.4.	Partial Association Measures, 170	
9.5.	Category Choice for Ordinal Variables, 172	
	Notes, 175	
	Complements, 177	
<b>10.</b>	<b>Inference for Ordinal Measures of Association</b>	<b>179</b>
10.1.	Testing for Association: Ordinal-Ordinal Tables, 179	
10.2.	Testing for Association: Ordinal-Nominal Tables, 181	
10.3.	Confidence Intervals for Measures of Association, 184	
10.4.	Comparing and Pooling Measures, 189	
10.5.	Testing for Partial Association, 192	
	Notes, 196	
	Complements, 197	
<b>11.</b>	<b>Square Tables with Ordered Categories</b>	<b>201</b>
11.1.	Models for Square Tables, 201	
11.2.	Marginal Homogeneity, 207	
11.3.	A Final Example, 210	
	Note, 214	
	Complements, 214	
<b>12.</b>	<b>Comparison of Ordinal Methods</b>	<b>218</b>
12.1.	Summary of Methods and Results, 218	
12.2.	Comparison of Strategies, 222	
<b>Appendixes</b>		<b>228</b>
A.	Weighted Least Squares, 228	
B.	Maximum Likelihood Estimation, 235	
C.	Delta Method, 247	
D.	Computer Packages for Cross-Classification Tables, 251	
E.	Chi-Squared Distribution Values for Various Right-Hand Tail Probabilities, 261	
<b>Bibliography</b>		<b>263</b>
<b>Indexes</b>		<b>275</b>
