

Sabine Dittmann (Ed.)

The Wadden Sea Ecosystem

Stability Properties and Mechanisms

With 68 Figures and 23 Tables

Springer

Contents

1	Introduction	1
2	ELAWAT: Goals and Conceptual Framework	5
	<i>S. Dittmann & V. Grimm</i>	
3	Study Area: The Backbarrier Tidal Flats of Spiekeroog	15
3.1	Description of the Spiekeroog Backbarrier System	15
	<i>A. Hild</i>	
3.2	Meteorological Conditions in the East Frisian Wadden Sea from 1994–1996	19
	<i>V. Niesel</i>	
3.3	Hydrographic Conditions in the Spiekeroog Backbarrier System	26
	<i>V. Niesel</i>	
3.4	Morphology and Sedimentology of the Spiekeroog Backbarrier System	31
	<i>A. Hild</i>	
	3.4.1 Origin of the Wadden Sea	31
	3.4.2 History of the Coastal Evolution	31
	3.4.3 Morphology and Morphodynamics	31
	3.4.4 Sedimentology	33
3.5	Biofacies in the Spiekeroog Backbarrier Tidal Flats	36
	<i>C.-P. Günther</i>	
	3.5.1 Introduction	36
	3.5.2 Horizontal and Vertical Aspects of Biofacies	38
	3.5.3 Case Study <i>Mytilus</i> Bed	39
	3.5.4 Effects of Ice Winters	41
3.6	Ecosystem Engineers: <i>Mytilus edulis</i> and <i>Lanice conchilega</i>	43
	<i>A. Hild & C.-P. Günther</i>	
	3.6.1 <i>Mytilus edulis</i>	43
	3.6.2 <i>Lanice conchilega</i>	46
4	Statistical Models and Techniques for the Analysis of Conditions of an Ecological System	51
	<i>U. Schleier</i>	
4.1	Introduction	51
4.2	Terminology	53

4.3	Statistical Methods for the Description and Measurement of Stability Properties	55
4.3.1	Description of Patterns and Processes	55
4.3.2	Analysis of Relations	69
4.3.3	Tests for Statistical Distinction Between States of a System	70
4.4	Statistics in ELAWAT	73
5	Spatial and Temporal Distribution Patterns and Their Underlying Causes	77
5.1	Distribution of Nutrients, Algae and Zooplankton in the Spiekeroog Backbarrier System..... <i>V. Niesel C.-P. Günther</i>	77
5.1.1	Introduction	77
5.1.2	Material and Methods	78
5.1.3	Tidal Variations	79
5.1.4	Seasonal Variability	82
5.1.5	Interannual Variability	86
5.1.6	Relations Between Phytoplankton and Copepods	87
5.1.7	Relations Between Phytoplankton and Mero-planktonic Larvae	88
5.1.8	Resuspension of Benthic Algae	91
5.2	Biogeochemical Processes in Tidal Flat Sediments and Mutual Interactions with Macrobenthos..... <i>M. Villbrandt, A. Hild & S. Dittmann</i>	95
5.2.1	Microbial and Geochemical Processes	96
5.2.2	Distribution of Macrofauna Along the Transect	118
5.2.3	Discussion	123
5.2.4	Conclusions	128
5.3	Settlement, Secondary Dispersal and Turnover Rate of Benthic Macrofauna	133
	<i>C.-P. Günther</i>	
5.3.1	Introduction	133
5.3.2	What Determines Year-Class Strength in Intertidal Soft Bottom Benthic Macrofauna?	134
5.3.3	Development of Spatial And Temporal Patterns by Initial Settlement and Secondary Dispersal	135
5.3.4	<i>In situ</i> Turnover Rates of Juvenile Macrofauna in Soft Sediments	141
5.3.5	Small-Scale Temporal Variability in Benthos Distribution Patterns: Patchiness vs. Mobility	142
5.3.6	<i>Lanice conchilega</i>	143
5.4	Modelling the Spatial and Temporal Distribution of <i>Lanice conchilega</i>	147
	<i>V. Grimm</i>	

5.5	Biotic Interactions in a <i>Lanice conchilega</i> -Dominated Tidal Flat	153
	<i>S. Dittmann</i>	
5.5.1	Introduction	153
5.5.2	Methods	154
5.5.3	Species Composition and Macrobenthos Abundances	155
5.5.4	<i>Lanice conchilega</i> : Density and Distribution	156
5.5.5	Benthos Associated with <i>Lanice conchilega</i>	157
5.5.6	Discussion	160
5.6	Size Frequency, Distribution and Colour Variation of <i>Carcinus</i> <i>maenas</i> in the Spiekeroog Backbarrier System	163
	<i>S. Dittmann & M. Villbrandt</i>	
5.6.1	Introduction	163
5.6.2	Material and Methods	164
5.6.3	Results	165
5.6.4	Discussion	169
6	Recolonization of Tidal Flats After Disturbance	175
	<i>S. Dittmann, C.-P. Günther & U. Schleier</i>	
6.1	Introduction	175
6.2	Material and Methods	177
6.3	Recolonization After Experimental Disturbances	178
6.3.1	The Course of Recolonization	178
6.3.2	Mode of Recolonization	183
6.4	Recolonization Following the Ice Winter 1995/96	185
6.5	Discussion	186
6.5.1	Recolonization in Dependence of the Sediment Chemistry	187
6.5.2	Temporal Development of Recolonization	188
6.5.3	Comparison of Recolonization After the Ice Winter and After Experimental Disturbances	189
7	Effects of the Ice Winter 1995/96	193
	<i>C.-P. Günther & V. Niesel</i>	
7.1	Introduction	194
7.2	The "Disturbing" Effects of the Ice Winter 1995/96	194
7.2.1	Mechanical Effects	194
7.2.2	Direct Effects of Low Temperatures	195
7.3	The Seasonal Development 1996 (Regeneration)	196
7.3.1	The Pelagic System	196
7.3.2	The Benthic System	197
7.4	The "Black Area Event" 1996	199
7.5	Comparison of Ice Winter Effects in Different Parts of the Wadden Sea	201

8	Grid-Based Modelling of Macrozoobenthos in the Intertidal of the Wadden Sea: Potentials and Limitations	207
	<i>V. Grimm, C.-P. Günther, S. Dittmann & H. Hildenbrandt</i>	
8.1	Introduction	208
	8.1.1 Theoretical Background	209
	8.1.2 Empirical Background	209
8.2	The First Model: A Demonstration	210
	8.2.1 Results of the First Model	212
8.3	Problems When Applying the Grid-Based Approach in the Wadden Sea	214
8.4	A Grid-Based Approach Tailored to the Wadden Sea: TOPOGRID	217
	8.4.1 Typical Results of TOPOGRID	221
8.5	Methodological Conclusions	223
8.6	Ecological Conclusions	224
9	Stability Properties in the Wadden Sea	227
	<i>V. Grimm, H. Bietz, C.-P. Günther, A. Hild, M. Villbrandt, V. Niesel, U. Schleier & S. Dittmann</i>	
9.1	Introduction	227
9.2	The Conceptual Framework: A Glossary	228
9.3	A Canon of Questions	232
9.4	The Abiotic Ingredients of the Wadden Sea	234
	9.4.1 Meteorological Boundary Conditions and Disturbance Regime	234
	9.4.2 Hydrography, Morphology and Sediments	236
	9.4.3 Chemistry of the Sediments	240
	9.4.4 Summary: Abiotic Ingredients of the Wadden Sea	242
9.5	The Biotic Ingredients of the Wadden Sea	243
	9.5.1 Bacteria	243
	9.5.2 Microphytobenthos and Phytoplankton	244
	9.5.3 Macrozoobenthos	246
	9.5.4 Migratory Birds	252
	9.5.5 Summary: Biotic Ingredients of the Wadden Sea	253
9.6	Conclusions	254
10	Assessing Stability Properties: How Suitable is this Approach for Ecosystem Research in the Wadden Sea?	261
	<i>S. Dittmann</i>	
11	Joint Research Projects: Experiences and Recommendations	267
	<i>S. Dittmann, A. Hild, V. Grimm, C.-P. Günther, V. Niesel, M. Villbrandt, H. Bietz & U. Schleier</i>	
11.1	Realization of ELAWAT	267
11.2	Problems and Potentials of Joint Projects	273

11.3	Gaps of Knowledge and Research Recommendations	275
11.4	Recommendations for the Realization of Joint Projects	277
12	Protection of Processes in the Wadden Sea	281
	<i>M. Villbrandt, C.-P. Günther & S. Dittmann</i>	
12.1	What is Protection of Processes?	281
12.2	Protection of Processes in the Wadden Sea	282
12.3	Arguments from ELAWAT for the Protection of Processes	284
12.4	Outlook	285
13	Summary	289
	Appendix	293
	Index	297
