Contents

Foundations of Knowledge Representation and Reasoning <i>Gerhard Lakemeyer, Bernhard Nebel</i>	1
Collective Entities and Relations in Concept Languages <i>Jürgen Allgayer, Enrico Franconi</i>	13
Computing Extensions of Terminological Default Theories <i>Franz Baader, Bernhard Hollunder</i>	30
A Formalization of Interval-Based Temporal Subsumption in First Order Logic <i>Claudio Bettini</i>	53
Normative, Subjunctive and Autoepistemic Defaults <i>Craig Boutilier</i>	74
Abductive Reasoning with Abstraction Axioms <i>Luca Console, Daniele Theseider Dupré</i>	98
Queries, Rules and Definitions as Epistemic Sentences in Concept Languages <i>Francesco M. Donini, Maurizio Lenzerini, Daniele Nardi, Werner Nutt, Andrea Schaerf</i>	113
The Power of Beliefs or Translating Default Logic into Standard Autoepistemic Logic <i>Georg Gottlob</i>	133
Learning an Optimally Accurate Representation System <i>Russell Greiner, Dale Schuurmans</i>	145
Default Reasoning via Negation as Failure <i>A.C. Kakas</i>	160
Weak Autoepistemic Reasoning and Well-Founded Semantics <i>Jürgen Kalinski</i>	179
Forming Concepts for Fast Inference <i>Henry Kautz, Bart Selman</i>	200
A Common-Sense Theory of Time <i>Yuen Q. Lin</i>	216

Reasoning with Analogical Representations <i>Karen L. Myers, Kurt Konolige</i>	229
Asking About Possibilities – Revision and Update Semantics for Subjunctive Queries <i>Wolfgang Nejdl, Markus Banagl</i>	250
On the Impact of Stratification on the Complexity of Nonmonotonic Reasoning <i>Ilkka Niemelä, Jussi Rintanen</i>	275
Logics of Mental Attitudes in AI <i>Yoav Shoham, Steve B. Cousins</i>	296
Hyperrational Conditionals – Monotonic Reasoning About Nested Default Conditionals <i>Emil Weydert</i>	310
Revision by Expansion in Logic Programs <i>Cees Witteveen, Catholijn Jonker</i>	333
