# Ring Enlargement in Organic Chemistry

Weinheim · New York · Basel · Cambridge

# Contents

<b>I.</b>	<b>Introduction</b> .....	1
<b>II.</b>	<b>One-Atom Insertion Procedures</b> .....	5
II.1.	The One-Carbon Atom Ring Insertion .....	5
	Pinacol and Related Rearrangements .....	7
	Wagner-Meerwein Rearrangements .....	8
	Tiffeneau-Demjanow Rearrangements .....	9
	Dienone Phenol Rearrangements .....	16
	$\alpha$ -Ketol Rearrangements .....	16
	Wittig-Prevóst Method .....	16
II.2.	Nitrogen Insertion Reactions of Ring Compounds .....	20
	The Schmidt Reaction .....	20
	The Beckmann Rearrangements .....	24
II.3.	Oxygen Insertion Reaction .....	32
	References .....	34
<b>III.</b>	<b>The Three-membered Ring – a Building Element for Ring Enlargement Reactions</b> .....	39
	Aziridine Derivatives .....	39
	Cyclopropane and its Derivatives .....	45
	References .....	51
<b>IV.</b>	<b>Ring Expansion from Four-membered Rings or via Four-membered Intermediates</b> .....	53
IV.1.	Ring Expansion from Four-membered Rings .....	53
IV.2.	Benzocyclobutene Derivatives as Intermediates .....	67
	References .....	71

<b>V.</b>	<b>The Cope Rearrangement, the [1.3] Sigmatropic Shift, the Sommelet-Hauser Reaction, and Sulfur-Mediated Ring Expansions</b> .....	73
V.1.	The Cope Rearrangement .....	73
V.2.	[1.3] Sigmatropic Shift – A Method of Ring Enlargement ...	81
V.3.	Sommelet-Hauser Rearrangement and Sulfur-Mediated Ring Expansion .....	83
	References .....	94
<b>VI.</b>	<b>Transamidation Reactions</b> .....	97
VI.1.	Transamidation Reactions .....	97
VI.2.	$\beta$ -Lactams as Synthons for Ring Enlargement .....	111
	N-Substituted $\beta$ -Lactams .....	111
	$\beta$ -Lactams Substituted at Position 3 .....	114
	$\beta$ -Lactams Substituted at Position 4 .....	116
	Other Types of $\beta$ -Lactam Rearrangements .....	116
VI.3.	Cyclodepsipeptides .....	119
	References .....	122
<b>VII.</b>	<b>Ring Enlargement by Side Chain Incorporation</b> .....	125
VII.1.	Ring Expansion Reactions Leading to Carbocycles .....	127
VII.2.	Ring Enlargement by Side Chain Incorporation with Lactam Formation .....	142
VII.3.	Lactone Formation by Side Chain Incorporation .....	145
VII.4.	Discussion of the Auxiliary Groups .....	157
	References .....	158
<b>VIII.</b>	<b>Ring Expansion by Cleavage of the Zero Bridge in Bicycles</b> .	163
VIII.1.	Cleavage of the Zero Bridge in Bicycles by Fragmentation Reactions .....	163
VIII.2.	Cleavage of Zero Bridged Single Bonds in Bicycles .....	177
	Reduction and Hydrolysis of Cyclic Diaminoacetals and Aminoacetals .....	177
	Reduction of Hydrazines .....	182
	The Retro Mannich and the Retro Aldol Reaction .....	183
VIII.3.	Cleavage of the Zero Bridge in Bicycles by Retro Diels-Alder Reaction .....	186

Contents	XI
VIII.4. Oxidative Cleavage of the Zero-Ene-Bridge in Bicycles . . . . .	187
References . . . . .	196
<b>IX. Cleavage of the One-Atom-Bridge in Bicycles and Transesterification . . . . .</b>	<b>199</b>
IX.1. Cleavage of the One-Atom-Bridge in Bicycles . . . . .	199
IX.2. Transesterification . . . . .	207
References . . . . .	210
<b>Compound Index . . . . .</b>	<b>213</b>
<b>Subject Index . . . . .</b>	<b>229</b>
