# CONTENTS

Preface	xi
Chapter 1. Introduction	1
<b>Part 1. Logic</b>	
Chapter 2. Symbolic Logic and Boolean Algebra	9
2.1 <i>Symbolic Logic</i>	10
2.2 <i>Boolean Algebra</i>	17
2.3 <i>Boolean Polynomials and Functions</i>	18
2.4 <i>Finding Functions from Truth Tables</i>	20
2.5 <i>Physical Application: Switching</i>	22
2.6 <i>Physical Application: Computer Circuits</i>	25
2.7 <i>Summary</i>	27
<i>Problems</i>	28
Chapter 3. Logical Networks	31
3.1 <i>Component States and States of Nature</i>	32
3.2 <i>Symbols and Notation</i>	33
3.3 <i>Problem Formulation</i>	35
3.4 <i>System Evaluation from the Logical Network</i>	39
3.5 <i>Interdependence of Components</i>	42
3.6 <i>Sequential Logical Decisions</i>	44
3.7 <i>Summary</i>	46
<i>Problems</i>	47
Chapter 4. Case Study: Logical Decisions	49
4.1 <i>The Pennwood Case</i>	50
4.2 <i>The Analysis</i>	52
4.3 <i>Summary</i>	59
<b>Part 2. Probability</b>	
Chapter 5. Sets, Functions, and Combinatorial Analysis	63
5.1 <i>Sets</i>	63
5.2 <i>Operations on Sets</i>	65
5.3 <i>Elementary Set Algebra</i>	67
5.4 <i>Functions</i>	68
5.5 <i>Combinatorial Analysis</i>	70
5.6 <i>Permutations</i>	73
5.7 <i>Combinations</i>	75
5.8 <i>Binomial Coefficients</i>	76
5.9 <i>Summary</i>	77
<i>Problems</i>	77
Chapter 6. Probability	80
6.1 <i>Definitions and Basic Concepts</i>	83
6.2 <i>Conditional Probability</i>	89
6.3 <i>Bayes' Rule</i>	95
6.4 <i>Independence</i>	98
6.5 <i>Independent Trials</i>	99
6.6 <i>Continuous Probability Theory</i>	104
6.7 <i>Summary</i>	106
<i>Problems</i>	107
Chapter 7. Probability Functions	110
7.1 <i>Probability Functions as Models of Real Phenomena</i>	110
	vii

7.2	<i>Random Variables</i>	111
7.3	<i>Mathematical Expectation</i>	114
7.4	<i>Discrete Probability Distributions</i>	116
7.5	<i>Continuous Probability Distributions</i>	127
7.6	<i>Summary</i>	136
	<i>Problems</i>	137
<b>Chapter 8.</b>	<b>Probability Networks</b>	<b>139</b>
8.1	<i>Comparison of Logical Operations with Operations on Probabilities</i>	140
8.2	<i>Expected Value of Component States</i>	142
8.3	<i>Assignment of Probability Values to Network Components</i>	143
8.4	<i>Evaluation of a Probability Network</i>	144
8.5	<i>Dependencies and Conditional Probabilities</i>	146
8.6	<i>Summary</i>	149
<b>Chapter 9.</b>	<b>Case Study: Probabilistic Decisions</b>	<b>150</b>
9.1	<i>The Case</i>	150
9.2	<i>Analysis</i>	152
9.3	<i>Assignment of Probabilities</i>	154
9.4	<i>Summary</i>	158
<b>Part 3. Statistics</b>		
<b>Chapter 10.</b>	<b>Statistical Treatment of Data</b>	<b>161</b>
10.1	<i>Populations and Samples</i>	162
10.2	<i>Types of Data</i>	164
10.3	<i>Frequency Distributions</i>	165
10.4	<i>Histograms</i>	168
10.5	<i>Descriptive Measures: Location</i>	170
10.6	<i>Descriptive Measures: Variation</i>	174
10.7	<i>Chebyshev's Inequality</i>	179
10.8	<i>Coefficient of Variation</i>	180
10.9	<i>Summary</i>	181
	<i>Problems</i>	182
<b>Chapter 11.</b>	<b>Sampling and Sampling Distributions</b>	<b>184</b>
11.1	<i>Random Sampling</i>	185
11.2	<i>Sampling Distributions</i>	186
11.3	<i>Bias</i>	188
11.4	<i>Sampling from a Finite Population</i>	189
11.5	<i>Analysis of the Sampling Methods</i>	194
11.6	<i>The Use of Sampling Distributions in Parameter Estimation</i>	195
11.7	<i>The Law of Large Numbers</i>	195
11.8	<i>The Central-limit Theorem</i>	197
11.9	<i>Sampling Distribution of the Mean</i>	198
11.10	<i>Distribution of the Difference between Sample Means</i>	198
11.11	<i>Chi-square Distribution</i>	199
11.12	<i>Distribution of the Sample Variance from Normal Populations</i>	200
11.13	<i>Student's <math>t</math> Distribution</i>	201
11.14	<i>The F Distribution</i>	202
11.15	<i>Summary</i>	202
	<i>Problems</i>	203
<b>Chapter 12.</b>	<b>Statistical Estimation</b>	<b>205</b>
12.1	<i>The Estimation Problem</i>	206
12.2	<i>Estimators and their Properties</i>	207
12.3	<i>Maximum Likelihood Estimation</i>	211
12.4	<i>Point and Interval Estimates</i>	214
12.5	<i>One-sided and Two-sided Confidence Intervals</i>	220

12.6	<i>Estimation of Means</i>	221
12.7	<i>Estimation of the Difference between Two Means</i>	225
12.8	<i>Estimation of Proportions</i>	229
12.9	<i>Estimation of the Difference between Proportions</i>	231
12.10	<i>Estimation of Variances</i>	232
12.11	<i>Determination of Sample Size</i>	233
12.12	<i>Summary</i>	235
	<i>Problems</i>	236

## Chapter 13. Statistical Tests of Hypotheses 238

13.1	<i>The Rationale for Hypothesis Testing</i>	239
13.2	<i>The Null Hypothesis</i>	240
13.3	<i>Two Types of Errors</i>	242
13.4	<i>Decision Rules</i>	243
13.5	<i>Procedure for Hypothesis Testing</i>	244
13.6	<i>One-tailed and Two-tailed Tests</i>	244
13.7	<i>Selecting a Decision Rule</i>	247
13.8	<i>Balancing the Probabilities of Error</i>	252
13.9	<i>Hypotheses about Means</i>	255
13.10	<i>Hypotheses about the Difference between Two Means</i>	260
13.11	<i>Tests of Hypotheses about Proportions</i>	263
13.12	<i>Test of the Difference between Two Proportions</i>	268
13.13	<i>Tests of Variances</i>	269
13.14	<i>Test of Goodness of Fit</i>	273
13.15	<i>Statistical Estimation Versus Hypothesis Testing in Decision Situations</i>	275
13.16	<i>Summary</i>	279
	<i>Problems</i>	279

## Chapter 14. Correlation and Regression 282

14.1	<i>Simple Correlation</i>	282
14.2	<i>Statistical Inference about the Correlation Coefficient</i>	288
14.3	<i>Simple Linear Regression</i>	290
14.4	<i>Multiple Regression</i>	301
14.5	<i>Summary</i>	309
	<i>Problems</i>	309

## Part 4. Decision Theory

### Chapter 15. Risk and Uncertainty in Decision Making 315

15.1	<i>Certainty, Risk, and Uncertainty</i>	316
15.2	<i>States of Nature and Competitor's Acts</i>	317
15.3	<i>Measurement of Consequences: Payoff</i>	318
15.4	<i>Measurement of Consequences: Regret</i>	319
15.5	<i>Decision Functions</i>	320
15.6	<i>Utility</i>	324
15.7	<i>Summary</i>	330
	<i>Problems</i>	331

### Chapter 16. Decision Making under Uncertainty without Sampling 334

16.1	<i>Decision Criteria Based Solely on Economic Consequences</i>	335
16.2	<i>Probabilities and Decision Making</i>	339
16.3	<i>Objective Prior Probability Distributions</i>	340
16.4	<i>Subjective Prior Probability Distributions</i>	340
16.5	<i>Decision Criteria Based Solely on Probabilities</i>	342
16.6	<i>Expected Value as a Decision Criterion: A Bayes' Criterion</i>	343
16.7	<i>Two-action Problems with Linear Payoff Functions</i>	345
16.8	<i>Regret Functions</i>	347
16.9	<i>Multiaction Problems with Linear Payoff Functions</i>	348
16.10	<i>Summary</i>	349
	<i>Problems</i>	350

Chapter 17. Decision Making under Uncertainty with Sampling	355
17.1 <i>The Value of Information</i>	356
17.2 <i>Bayes' Theorem and the Revision of Probabilities</i>	358
17.3 <i>Preposterior Analysis: Analysis in the Extensive Form</i>	365
17.4 <i>Expected Value of Sample Information</i>	367
17.5 <i>Expected Net Gain from Sampling</i>	371
17.6 <i>Optimum Sample Size</i>	372
17.7 <i>Summary</i>	374
<i>Problems</i>	374
Chapter 18. Probability Distributions in Decision Analysis: The Beta Distribution	376
18.1 <i>Theoretical Distributions in Decision Theory</i>	376
18.2 <i>Conjugate Distributions</i>	377
18.3 <i>The Distributions in the Decision Problem</i>	378
18.4 <i>Binomial Sampling and the Beta Distribution</i>	379
18.5 <i>Estimating the Parameters of the Prior Beta Distribution</i>	384
18.6 <i>The Rectangular Distribution</i>	389
18.7 <i>Tables of the Incomplete Beta Function</i>	390
18.8 <i>Summary</i>	391
<i>Problems</i>	391
Chapter 19. Probability Distributions in Decision Analysis: The Normal Distribution	394
19.1 <i>The Normal Distribution in Decision Theory</i>	394
19.2 <i>Determining the Parameters of the Normal Prior Distribution</i>	395
19.3 <i>Decisions Based on a Normal Prior without Sampling</i>	398
19.4 <i>Multiaction Problems with Linear Payoff Functions</i>	401
19.5 <i>Parameters of the Posterior Normal Distribution</i>	402
19.6 <i>Preposterior Analysis and EVSI</i>	407
19.7 <i>Optimum Sample Size</i>	409
19.8 <i>Summary</i>	410
<i>Problems</i>	410
Chapter 20. Probability Distributions in Decision Analysis: The Gamma Distribution	413
20.1 <i>The Parameters of the Posterior Gamma Distribution</i>	414
20.2 <i>Specifying Parameters of the Prior Gamma Distribution</i>	415
20.3 <i>Relationship between Gamma and Poisson Probabilities</i>	415
20.4 <i>The Gamma Distribution in Decision Theory and An Example</i>	416
20.5 <i>Summary</i>	426
<i>Problems</i>	426
Chapter 21. Decision Trees and Sequential Decisions	428
21.1 <i>The No-sampling Case</i>	429
21.2 <i>The Single-sample Case</i>	431
21.3 <i>The Sequential Case</i>	435
21.4 <i>Summary</i>	440
<i>Problems</i>	440
Chapter 22. Case Study: Decision Analysis	442
22.1 <i>Analysis</i>	443
22.2 <i>Summary</i>	447
Suggested References	448
Appendix Tables	449
Index	471
