Bibliothek
Inv.-Nr. B 18023

Springer-Verlag
Berlin Heidelberg New York 1979

CONTENTS

List of Symbols 8

Summary of Assumptions 10

Chapter 1 Basic Concepts 11
1.1 Directed Graphs and Activity Networks 11
1.2 GERT Networks 18
1.3 Assumptions Required for GERT Networks 25
1.4 Evaluation of GERT Networks 30
1.5 Subnetworks of GERT Networks 37

Chapter 2 STEOR Networks 45
2.1 Stochastic Processes Connected with STEOR Networks 45
2.1.1 STEOR Networks and MARKOV Renewal Processes 45
2.1.2 GERT Networks with Only EOR Nodes 49
2.2 The MRP Method for the Evaluation of STEOR Networks 53
2.2.1 The Activation Functions and Activation Numbers 53
2.2.2 Special Cases and Examples 59
2.3 The Numerical Implementation of the MRP Method 65
2.4 The MASON Rule 75
2.5 Earliest and Latest Times in STEOR Networks 82
2.6 Applications 93
2.6.1 Time Planning for R&D Projects 94
2.6.2 Production Planning 98
2.6.3 Legislation and Administration of Justice 101
2.6.4 Evaluation of Linear Transmission Systems 103
2.6.5 Description and Analysis of Queueing Models 108

Chapter 3 GERT Networks with Basic Element Structures 116
3.1 Nodes Which Belong Together 117
3.2 Basic Elements 120
3.3 Basic Element Structures 124
3.3.1 Definition and Properties of a Basic Element Structure 124
3.3.2 BES Networks 129
3.3.3 Examples 137
3.4 Evaluation of Admissible Basic Element Structures 140

3.5 Determination of Admissible Interior Basic Element Structures 146
3.5.1 Determination of Nodes Belonging Together (Labeling Process) 147
3.5.2 Construction of a Possible Interior Basic Element Structure 149
3.5.3 Testing of a Possible Interior Basic Element Structure 153
3.5.4 The BES Method 156
3.6 Applications 160
3.6.1 Rendezvous of Two Space Vehicles 161
3.6.2 Production of a Television Program 161
3.6.3 Introduction of a New Industrial Product 167
3.6.4 Reliability Problems 169

Chapter 4 Evaluation of General GERT Networks 172
4.1 Cycle Reduction 172
4.2 Evaluation of an Acyclic GERT Network N 175
4.2.1 Construction of the Sequence (N^{μ}) of Subnetworks of N 177
4.2.2 Determination of the Conditional Probabilities in (4.2.2) 180
4.2.3 Test of the Assumptions A6 and A7 186
4.2.4 Example 187
4.3 Applications 193
4.3.1 Construction of a Turbine 193
4.3.2 Development of a Camera 196
4.4 Replacement of Non-genuine IOR Nodes 199

Chapter 5 Multiple Activations of Non-STEOR Nodes 204
5.1 Generalized GERT Networks and Closed Subnetworks 204
5.2 Assumptions Required for Generalized GERT Networks 208
5.3 Evaluation of Generalized GERT Networks 212
5.3.1 A Method for Evaluating Admissible Generalized GERT Networks 212
5.3.2 Test of the Assumptions for a Generalized GERT Network 214
5.4 Applications 215
5.4.1 Introduction of a New Product 215
5.4.2 Overhaul of a Generator 218

Chapter 6 GERT Networks with Time-dependent Arc Weights 220
6.1 Basic Concepts 220
6.2 STEOR Networks 222
6.3 GERT Networks with Basic Element Structures 225
6.4 General GERT Networks 231

Chapter 7 Simulation 233
7.1 GERTS Networks and Equivalent GERT Networks 233
7.2 GERTS Networks Which Do Not Have Corresponding GERT Networks 236
7.3 Simulation of GERTS Networks 238
7.4 Generalized GERTS Networks 242
7.5 A Universal Method for Evaluating Admissible GERT Networks 244

Appendix 250
A.1 Some Formulas from Probability Theory 250
A.2 Stochastic Processes 252
A.3 Precise Formulation of Assumption A3 257
