

IABSE CONFERENCE

HELSINKI 2008

*Information and Communication
Technology (ICT) for Bridges,
Buildings and Construction Practice*

REPORT

RAPPORT

BERICHT

Organized by
Finnish Group of IABSE,
Finnish Association of Civil Engineers RIL and
Helsinki University of Technology

ULB Darmstadt

17066455

Table of Contents

Keynote Lectures

<i>Use of Building Information Models: a Contractor's Point of View</i> C. DUMOULIN, P. BENNING, France	2
<i>Use of Integrated Shop Drawings for the San Francisco Oakland Bay Bridge</i> J. DUXBURY, M. NADER, United States.....	10
<i>Parametric Description of Bridge Structures</i> C. KATZ, Germany.....	18

THEME Building Information Modeling (BIM)

<i>Structural Building Information Modelling in Use</i> C. ROBINSON, United Kingdom.....	30
<i>Managing the Quality of Structural Steel BIM Data</i> M. REIFSCHNEIDER, P. CARRATO, United States	32
<i>BIM and Advanced Post-Tensioning Design Methods</i> J. JAUHAINEN, Finland	34
<i>Approaches to University Level BIM Education</i> J. HIETANEN, R. DROGEMULLER, Finland; Australia	36
<i>Electronic Data Interchange and Interoperability in the Power Industry</i> R. KRUMPEN, F. BOBADILLA, United States.....	38
<i>New Approaches to Topological Search for Structural Engineering</i> J. MILES, K. WANG, H. CHEN, United Kingdom	40
<i>Structured Wikis for Architecture, Engineering and Construction</i> O. KALNY, United States	42
<i>A Context-Adaptive Building Information Model for Disaster Management</i> U. WALDER, Austria	44
<i>Product Modeling in Residential Renovation</i> J. SALIN, Finland	46

THEME Bridge Management

<i>The Bridge Management System as a Tool for Bridge Maintenance Steering</i> M. SÖDERQVIST, Finland.....	50
<i>Maintenance management of infrastructure assets with SMART</i> B. N. LASSEN, L. T. HELBO, P. HUKKANEN, I. KEROLA, M. FRANDBEN, Denmark; Finland; Faroe Islands.....	52
<i>DANBRO+ Web Based Management of Major Bridges and Tunnels</i> J. BJERRUM, B. N. LASSEN, Denmark.....	54
<i>Risk Assessment and Management System for Bridge Construction</i> X. RUAN, D. XU L. LI, Z. ZHANG, China.....	56

THEME Large Structures

<i>Some Key Mechanics Problems of Multi-pylon Suspension Bridge</i> D. WANG, China.....	60
<i>Haji Shariatullah Bridge - A Structure That Blended Technology With The Nature</i> M. A. AZIZ, India.....	62
<i>A new concept of overhaed movable scaffolding system for bridge construction</i> P. PACHECO, A. ADÃO DA FONSECA, H. COELHO, M. JENTSCH, Portugal; Austria.....	64

THEME Optical

<i>5D-Bridge - Development of 5D - Process and Tools for Bridge Engineering</i> P. PULKKINEN, A. KARJALAINEN, R. HEIKKILÄ, Finland.....	68
<i>Detecting the Deterioration of Building Facades Using Terrestrial Laser Scanning Technique</i> F. AL-NESHAWY, Finland.....	70
<i>Automated Measurement Extraction from Laser Scanned Point Clouds to Support Bridge Inspection</i> P. TANG, B. AKINCI, United States.....	72
<i>Image Processing Techniques for Detection of Pavement Cracks using Parallel Image-filters</i> T. NISHIKAWA, J. YOSHIDA, Y. FUJINO, Japan.....	74

THEME Actions

<i>Standard Developments of Vehicle Collision Loading on Bridge Piers</i> T. DONCHEV, E. DJELEBOV, United Kingdom	78
<i>Review of Airborne Chlorides at Seashore in Korea</i> J. S. LEE, G. H. AHN, W. S. CHOI, J. H. LEE, South Korea.....	80
<i>Product Model in Fire Safety Concept, Effect of Grid Size and Obstacles</i> M. HEINISUO, M. LAASONEN, T. HYVÄRINEN, T. BERG, Finland.....	82
<i>Modeling of Combined Deterioration of Concrete Structures by Competing Hazard Model</i> K. KAITO, K. SUGISAKI, K. KOBAYASHI, Japan	84
<i>Control Strategy for Seismic Pounding Mitigation of Bridge Structures</i> S. E. ABDEL RAHEEM, T. HAYASHIKAWA, Japan.....	86

THEME Damages

<i>Pounding and Deck Unseating Damage in Curved Highway Viaducts</i> C. MENDEZ GALINDO, T. HAYASHIKAWA, Japan	90
<i>Seismic Damage of Existing Simply Supported RC Bridges</i> M. GRENDENE, M. TORBOL, P. FRANCHETTI, C. MODENA, Italy	92
<i>Application of a Traffic Vibration Simulation to Damage Detection for Bridge Maintenance</i> A. YABE (NAGAI), H. ARAKI, A. MIYAMOTO, Japan	94

THEME Modeling

<i>Networked Sensing Platform for Civil Structures and its Prototype</i> Y. MIZUNO, Y. FUJINO, T. NAGAYAMA, T. NISHIKAWA, Japan	98
<i>Bridging the Gap – A Design Process Case Study for an “Intelligent” Footbridge</i> K. CREWS, D. ANDERSON, Australia.....	100
<i>Parametric and Associative Strategies for Engineering</i> J. COENDERS, Netherlands.....	102
<i>Execution Strategy Investigation Using Soft Constraint-Based Simulation</i> U. BEISSERT, M. KOENIG, H. BARGSTÄDT, Germany.....	104
<i>Capturing the Real Time State of Construction for Simulation</i> H. BARGSTÄDT, K. AILLAND, Germany	106
<i>Benefits of Modelling - the Structural Engineer's Perspective</i> A. MÖTTÖNEN, Finland	108

<i>A Knowledge Model for Performance Estimation of Windows for CE-Mark</i> A. N. SURMELI, J. KUILEN, R. VAN DE BEHESHTI, S. ÖZSARIYILDIZ, W. GARD, Netherlands	110
<i>Collaborative Design of High-speed Railway Lines using 3D Information Models</i> K. LEE, W. SON, Jue. MOON, C. SHIM, Korea (Rep.)	112
<i>The Prediction of Damage Condition for Light Structures with Hybrid Artificial Intelligence Technique</i> N. Y. OSMAN, Australia.....	114
<i>Probability Recipes</i> S. LEHTINEN, J. LAITINEN, Finland	116
THEME Construction	
<i>Application of Digital Mock-Up Technology to Design and Construction of Precast Segmental Bridges</i> Y. LEE, K. LEE, H. SHIN, K. PARK, South Korea	120
<i>Presentation of Solutions for Automated Issue of Working Drawings</i> A. STESHOV, Russian Federation.....	122
<i>Logistic Strategies for Construction Processes</i> J. VOIGTMANN, H. BARGSTÄDT, Germany.....	124
<i>Collaborative Best Practices for Construction Projects</i> A. HODGKINSON, J. KAELIN, H. SCHMITT, Switzerland; Iceland	126
<i>Knowledge Management for Construction Scheduling</i> E. MIKULAKOVA, M. KOENIG, E. TAUSCHER, K. BEUCKE, Germany	128
<i>4D POP Model Support for Lean Construction</i> M. BREIT, F. HÄUBI, F. MÄRKI, Switzerland.....	130
THEME Monitoring	
<i>Wireless Strain and Acceleration Measurement Devices used for Bridge Testing</i> P. VAN BOGAERT, H. DE BACKER, B. DE PAUW, A. OUTTIER, C. DELESIE, L. VERBERCKMOES, Belgium	134
<i>Simulation of Heavy Load Traffic Based on Actual Traffic Measurements</i> S. BOENING, U. FREUNDT, Germany	136
<i>Monitoring Railway Bridges under Rolling Stock Conditions – A New Tool for Construction Supervisors</i> I. RETZEPIS, M. HELLMICH, B. ROEGENER, Germany.....	138

<i>Wavelet Based Approach to Structural Dynamic Identification: the Case of the Main Vara Viaduct</i> M. L. BECONCINI, P. CROCE, M. LUISE, M. MENGOZZI, Italy.....	140
<i>Remote Structural Health Monitoring with Special Focus on End-User Needs</i> G. MOOR, T. SPULER, C. O'SUILLEABHAIN, Switzerland.....	142
<i>Health Assessment of Prestressed Girder by Deterioration Processes Evaluation</i> M. KALICKA, Poland	144

THEME Wind

<i>Simulation of the Flow Past of Bridge Box Girders in Turbulent Flow by Large Eddy Simulation</i> A. CHEN, H. AI, R. MA, China	148
<i>Buffeting Analysis of Stay Cables of Cable Stayed Bridges Based on the Database from Wind Tunnel Testing</i> R. MA, C. LAN, A. CHEN, X. HU, China.....	150
<i>Evaluation of Dynamic Wind Speed Measurements</i> A. KRECAK, P. SESAR, M. MASALA-BUHIN, Croatia.....	152
<i>Stress and Noises of Cable-Tower Anchorage Zone for Sutong Bridge</i> N. ZHANG, Q. WANG, J. HOU, T. XUE, S. QI, China.....	154
<i>Vibration and Damping Characteristics of Cable-Stayed Bridges Tower Control</i> S. E. ABDEL RAHEEM, T. HAYASHIKAWA, Japan.....	156
<i>Wireless Sensors in Prestressed Concrete Piles - Combining Driving Control with Long Term Monitoring</i> S. SZYNISZEWSKI, H.R. HAMILTON, Y. CHIH-TSAI, United States	158

THEME Monitoring Case Studies

<i>Dynamic Geometry Monitoring System in Sutong Bridge Construction</i> H. ZHANG, B. YANG, S. HUANG, X. YOU, China.....	162
<i>Offline Data Mining from First Year Health Monitoring Measurement of Donghai Bridge</i> Z. SUN, China.....	164
<i>Monitoring of Kirjansalmi Bridge</i> P. TOIVOLA, P. HASSINEN, M. LAMPI, Finland.....	166
<i>Long-term Monitoring of a Eighty Meters High Wind Turbine Steel Tower</i> C. REBELO, J. HENRIQUES, R. SIMOES, L. SIMOES SILVA, Portugal.....	168
<i>Hardware and Software Solutions for Continuous Near Real-Time Monitoring of the School of Engineering Main Building in Naples</i> G. FABBROCINO, C. RAINIERI, Italy.....	170

<i>Remote Monitoring of Fengjie Yangtze River Bridge Based on SMS</i> G. XIAO, China	172
 THEME Special Monitoring Technologies	
<i>Applications of Wireless Sensors in Concrete Structures</i> C. V. NIELSEN, H. E. SØRENSEN, A. KNUDSEN, P. H. MØLLER, P. LUNDHUS, Denmark	176
<i>Remote Acoustic Monitoring to Detect Breaks of Prestressing Wires</i> T. VOGEL, Switzerland	178
<i>Application of MEMS-based Technologies to Bridge Monitoring</i> T. MIYASHITA, N. MASATSUGU, Japan.....	180
<i>Short term Automated Monitoring of the Danube Bridge in Sinzing</i> C. O'SUILLEABHAIN, G. MOOR, T. SPULER, Switzerland.....	182
 THEME Software Tools	
<i>Simulation of Fire Tests in Road Tunnels</i> J. KRIEGER, B. STEINAUER, G. MAYER, Germany	186
<i>FE Substructures for Sectional Analysis</i> C. KATZ, Germany	188
<i>Bridge Solution Instead of Bridge Design FEM Software</i> D. JANJIC, G. NORONA, R. LOVE, R. AMAYA, H. BOKAN, Austria; United States	190
<i>Hybrid Models for Efficiently Analysing Overall and Local Stability Problems in the Bridge Design Process</i> D. JANJIC, J. STAMPLER, H. BOKAN, Austria	192
<i>The Effect of Nonlinearities on the Dynamical Behaviour of Structures</i> D. OSTERMANN, Germany.....	194
 THEME Applied Finite Element Model (FEM)	
<i>Vertical Prestress Influence on Shear Behaviors of Continuous-rigid-frame Box-girder Bridge</i> F. LI, G. LI, China	198
<i>Three-Dimensional Finite Element Model Analysis of An Arch Bridge</i> Y. SHEN, G. LI, China.....	200
<i>Finite Element Analysis of Cable-Stayed Bridge with QLJC</i> C. KE, J. LU, China.....	202

THEME Steel

Progressive Collapse Simulation of Steel Frame Structures – Accomplishments and Validation Challenges

S. SZYNISZEWSKI, T. KRAUTHAMMER, United States 206

Inelastic Compressive Buckling Behaviors of Steel-Plate Concrete Column

B. J. CHOI, W. KIM, S. J. LEE, M. J. LEE, W. B. KIM, Korea (Rep.) 208

Finite Element Modeling of Fibre Reinforced CFT Columns

K. ABEDI, Iran (Islamic Rep.) 210

Fatigue Analysis Using Finite Element Method for the 4.8 m Diameter Pulleys Calculation of Strépy-Thieu Boat Lift

D. PORTUGAELS, Belgium 212

Final Element Modelling for Heat-Curved Steel Girders

A. GERGESS, R. SEN, Lebanon; United States 214

THEME Concrete

Parametric Objects to Represent Concrete Blocks

C. AYRES, F. AZUMA, S. SCHEER, Brazil 218

Evaluation of Test Specimen Geometry on Compressive Strength

U. BEZERRA, N. BARBOSA, S. ALVES, S. TORRES, Brazil 220

The Case for Equilibrium Models in FEM with Application to Slab Design

E. MAUNDER, A. RAMSAY, United Kingdom 222

Dynamic Interaction Analysis of Simply Supported Twin I-girder Bridge Subjected to Moving Trucks

T. L. NGO-TRAN, T. HAYASHIKAWA, Japan 226
