
**FOURTH
EDITION**

MATERIALS FOR CIVIL AND HIGHWAY ENGINEERS

BY

KENNETH N. DERUCHER

*Dean, College of Engineering, Computer
Science and Technology
California State University, Chico*

GEORGE P. KORFIATIS

A. SAMER EZELDIN

*Department of Civil, Environmental, and
Coastal Engineering
Stevens Institute of Technology*

PRENTICE HALL, Upper Saddle River, New Jersey 07458

CONTENTS

Preface	iii
1 Soil	1
Origin and Geologic Properties	1
Soil Composition and Properties	3
Soil Classification	17
Soil-Water Interaction	20
Soil Compressibility	32
Soil Strength	35
Soil Improvement	41
Problems	49
References	50
2 Mineral Aggregates	51
Aggregate Types and Processing	51
Aggregate as a Base-Course Material	55

Aggregates for Portland Cement Concrete	56
Aggregates for Bituminous Mixtures	61
Aggregate Beneficiation	62
ASTM Test Specifications for Aggregates	63
Problems	75
References	75

3 Cements

77

Lime	77
Natural Cements	80
Portland Cements	81
Portland-Pozzolan Cements	90
Portland Blast-Furnace-Slag Cement	92
Alumina Cements	92
Expansive Cements	93
Special Portland Cements	93
Problems	94
References	94

4 Concrete: Strength and Behavior

95

Introduction	95
Uniaxial Behavior	95
Biaxial Behavior	105
Creep	106
Shrinkage	107
Fatigue	110
Bond Strength	111
Shearing and Torsional Strengths	114
Durability	114
Problems	124
References	125

5	<i>Design Procedure in Making Concrete</i>	127
	Concrete Materials	127
	Principal Requirements for Concrete	128
	Influences of Ingredients on Properties of Concrete	129
	Proportioning Concrete Mixes	131
	Proportioning Materials	141
	Mixing and Depositing	141
	Compressive, Tensile, and Flexural Strength	143
	Problems	143
	References	144
6	<i>Proportioning Structural Concrete Mixtures with Fly Ash and Other Pozzolans</i>	146
	Background	146
	Procedure	148
	Applicability to Lightweight Concrete	157
	Sample Computations	159
	Conclusions	161
	References	161
7	<i>Advances in Concrete Technology</i>	162
	Admixtures	162
	Mineral Admixtures	165
	High-Strength Concrete	166
	Fiber-Reinforced Cementitious Composites	170
	Waste and By-Products Use in Concrete	178
	Problems	180
	References	181
8	<i>Timber</i>	182
	Classes of Trees	182
	Wood Structure	183

Physical Characteristics of Wood	185	
Mechanical Properties of Timber	189	
Decay, Durability, and Preservation of Timber	194	
Problems	199	
References	200	
9 Asphalt Cements		202
Asphalt Cements	202	
Methods of Testing	205	
Modifications of Asphalt Cements	208	
Road Tars	210	
Proportioning Asphaltic Mixes	212	
Problems	217	
References	219	
10 Metallic State		220
Crystalline Nature of Metals	220	
Mechanical Behavior of Metals	227	
Testing and Evaluation of Metals	231	
Problems	238	
References	238	
11 Ferrous Metals		239
General	239	
Ferrous Metals	241	
Manufacture of Steel	242	
Structure of Iron and Steel	254	
Heat Treatments	256	
Physical Properties of Steels	263	
Alloy Steels	266	

Nonferrous Metals	268
Problems	268
References	269
12 <i>Plastics</i>	270
Classification	270
Types of Plastics	271
Manufacture of Organic Plastics	278
Properties of Organic Plastics	279
Advanced FRP Composites in Construction	284
Problems	286
References	268
13 <i>Miscellaneous Materials</i>	287
Glass	287
Concrete Block	288
Brick	289
Mortar	291
Shot-crete	291
Problems	294
References	294
14 <i>Design for the Environment</i>	295
Introduction	295
The Principle of Sustainable Development	296
Life Cycle Assessment	297
Material Selection	301
Material Minimization	304
Environmental Quality Standards	307
Problems	308
References	308

15 Environmental Considerations in Construction	309
Regulatory Issues	309
Materials for Construction of Waste Impoundments	312
Contaminated Soils and Remedial Options	314
References	317
Appendices	318
Soil	319
Aggregate and Concrete	365
Wood	398
Asphalt	417
Metal	423
Index	465
