# Contents

<i>Preface</i>	vii
<b>Part I: Functional integrals and diagram techniques in statistical physics</b>	<b>1</b>
1 Functional integrals in statistical physics	3
2 Functional integrals and diagram techniques for Bose particles	5
3 Functional integrals and diagram techniques for Fermi particles	16
4 Method of successive integration over fast and slow variables	20
<b>Part II: Superfluid Bose systems</b>	<b>23</b>
5 Superfluidity	25
6 Low-density Bose gas	31
7 The modified perturbation scheme for superfluid Bose systems	40
8 Quantum vortices in superfluids	49
<b>Part III: Plasma and superfluid Fermi systems</b>	<b>57</b>
9 Plasma theory	59
10 Perturbation theory for superconducting Fermi systems	68
11 Superconductivity of the second kind	76
12 Collective excitations in superfluid Fermi systems	90
13 Bose spectrum of superfluid Fermi gas	96
14 Superfluid phases in $^3\text{He}$	105
15 Collective excitations in the B-phase of $^3\text{He}$	112
16 Collective excitations in the A-phase of $^3\text{He}$	130
17 Superfluidity and Bose excitations in $^3\text{He}$ films	138
<b>Part IV: Crystals, heavy atoms, model Hamiltonians</b>	<b>145</b>
18 Functional integral approach to the theory of crystals	147
19 Effective interaction of electrons near the Fermi surface	158
20 Crystal structure of a dense electron-ion system	163
21 Quantum crystals	173
22 The theory of heavy atoms	185
23 Functional integral approach to the theory of model Hamiltonians	195
<i>References</i>	212
<i>Index</i>	215
