Preface xii

Acknowledgements xvi

PART I:
INTRODUCTION: THE "STYLIZED FACTS" OF ECONOMIC GROWTH 1

1 The "Stylized Facts" of Economic Growth 3
1.1 Introduction 3
1.2 Trend and Cycles in the Macroeconomic Time Series 4
1.2.1 Separating "Trend" and "Cycles" in a Macroeconomic Time Series 5
1.3 The Long-run Growth Rate of a Macroeconomic Time Series 6
1.4 Methodology: Sherlock Holmes' Rules of Scientific Inquiry . 8
1.5 Kaldor's "Stylized Facts" of Economic Growth 10
Suggested Reading 12

PART II:
THE THEORY OF ECONOMIC GROWTH WITH "EXOGENOUS" TECHNICAL PROGRESS 13

2 The Neoclassical Model of Economic Growth 15
2.1 Introduction 15
2.2 The Structure of the Model 15
2.2.1 The Supply Side of the Economy 16
2.2.2 The Demand Side of the Economy 23

2.2.3 The Link between the Supply and the Demand Sides of the Economy 25
2.3 The Dynamics of the Solow–Swan Model 27
2.4 The S&S Model and the "Stylized Facts of Economic Growth" 29
2.5 The Solow–Swan Model without Technical Progress 30
2.6 Policy Experiments and Empirics 31
2.6.1 Changes in the Saving Rate 31
2.6.2 Changes in the Rate of Population Growth 33
Suggested Reading 36
Problems 36

3 The Hypothesis of Convergence (I): Economies with the Same Steady State 38
3.1 Introduction 38
3.2 The Hypothesis of Convergence 39
3.3 Tests of the Convergence Hypothesis 44
3.3.1 The "Collapsing Distribution of Per Capita Incomes" (or σ-convergence) Test 44
3.3.2 The "Barro Regressions (or β-convergence) Test . . 45
3.3.3 σ-convergence vs. β-convergence: The Galton Fallacy 47
3.4 Empirical Results on Convergence 50
3.5 An Obstacle in the Way... 53
3.5.1 ...and an Ingenious Solution: The "Broad" Concept of K 53
3.5.2 ...which Calls for a "Readjustment" of the S&S Model: The *Human Capital Augmented* Neoclassical Model . 55
Appendix: Per Capita Income as an Indicator of Living Standards 56

4 The Hypothesis of Convergence (II): Economies with Different Steady States 59
4.1 Introduction 59
4.2 Controlling for Differences in Steady States 61
4.3 Empirical Results on Conditional β-convergence 64
4.4 Adding Variables to the "Basic Conditional Barro Regression" 65
4.5 Summary of Results and a "Second Pass" on Convergence . 69
4.6 Conclusion 73

5 Economic Growth and Social Welfare: The "Golden Rules" of Accumulation 74
5.1 Introduction 74
5.2 The "Golden Rule" of Accumulation 75
5.3 The "Golden Rule" of Accumulation and the Actual Economies 77

5.4 The "Modified" Golden Rule 78
Problems 84

6 Growth Accounting and the Solow Residual 88
6.1 Introduction 88
6.2 Solow's Growth Accounting Procedure 88
6.3 Practical Uses of the Growth Accounting Equation 89
6.4 The "Productivity Slowdown Puzzle" 91
6.5 The Need for "Endogenous" Technical Progress 93
Suggested Reading 95
Problems 95

PART III:
THE THEORY OF ECONOMIC GROWTH
WITH "ENDOGENOUS" TECHNICAL PROGRESS 97

7 Learning-by-Doing, Knowledge Spillovers and Economic Growth 99
7.1 Introduction 99
7.2 The Learning-by-Doing and Knowledge Spillover Hypotheses 100
7.2.1 The Hypothesis of "Learning-by-Doing" 100
7.2.2 The Empirics of "Learning-by-Doing" 102
7.2.3 The "Knowledge Spillover" Hypothesis 102
7.2.4 The Implications of "Learning-by-Doing" with Free Access to New Knowledge 103
7.3 The Arrow–Romer Model 104
7.3.1 Description of the Model 104
7.3.2 Solution of the Model for the Steady State 105
7.3.3 Predictions of the Model and Empirical Discussion . 108
7.4 Policy Analysis 113
7.4.1 Knowledge Spillovers, Market Inefficiency and Subsidies to Capital Accumulation 113
7.4.2 Externalities from Capital Accumulation and Balance of Trade Policy 115
7.4.3 Wage Policy and Economic Growth 115
7.4.4 Economic Integration 117
7.5 The "Convergence Hypothesis" 117
7.6 The Model and the "Productivity Slowdown Puzzle" 118
7.7 The Original Version of the Arrow–Romer Model (Arrow, 1962; Romer, 1986) 119
Appendix 7.A. Comments on Some Special Features of the Arrow–Romer Model 123

7.A.1. The Elasticity of "Learning-by-Doing" and the Steady State of the Model . . . 123
7.A.2. How Factual Can the "Linear-in-K" Model Be? . . . 125
Appendix 7.B. The Existence of a Steady State and the Acceptability of Models of Economic Growth . . . 127
Suggested Reading . . . 128
Problems . . . 129

8 Schumpeterian Models of Economic Growth 131
8.1 Introduction . . . 131
8.2 The Nature of Technical Progress: A "Non-rival, Partially Excludable Good" . . . 133
8.3 Romer's Schumpeterian Model . . . 136
8.3.1 Description of the Model . . . 137
8.3.2 Predictions of the Model . . . 147
8.3.3 The Model and the "Stylized Facts of Growth" . . . 154
8.4 Policy Analysis . . . 156
8.5 Beyond Romer's Schumpeterian Model: Some Topics for Further Study . . . 156
8.5.1 Economic Growth based on "Creative Destruction" . 156
8.5.2 Bounded "Learning-by-Doing" (Solow, 1997) . . . 158
8.5.3 "Leaders" vs. "Followers" in Research and the Problem of Technological Diffusion . . . 161
Suggested Reading . . . 162
Problems . . . 163

PART IV: CONCLUDING REMARKS 165

9 Theories of Economic Growth: "Old" and "New" 167
9.1 Introduction . . . 167
9.2 Endogenous and Exogenous Theories of Economic Growth: An Evaluation . . . 168
9.3 Conclusion . . . 173
Suggested Reading . . . 173

Mathematical Appendices 174
