

# Dome Effect in Reinforced Concrete Slabs

Bent Andreasen  
M. P. Nielsen

# CONTENTS

	<u>Page</u>
Resumé	1
Synopsis	2
1. Notation.	3
2. Introduction.	5
3. Basic Assumptions.	7
4. Theoretical load carrying capacity.	8
4.1 Calladine's method.	8
4.2 Membrane moment.	10
4.3 Rectangular slabs.	13
4.4 Rectangular slabs with horizontal restraints on three sides only.	20
4.5 Comparison with other expressions for the load carrying capacity.	22
5. Theory compared with test results.	23
5.1 Horizontal restraints on four sides.	24
5.2 Horizontal restraints on three sides.	34
5.3 The relative deflection.	35
5.4 Load-deflection curve: theoretical and experimental.	36
6. Design recommendations.	37
7. Conclusion.	39
8. References.	40
Appendix 1. The ratio test/theory for slabs with normal horizontal restraints on all edges.	44
Appendix 2. The ratio test/theory for slabs with rigid horizontal restraints on all edges.	46
Appendix 3. The ratio test/theory for slabs with rigid horizontal restraints on all edges.	48
