

THE CONFERENCE ON

COMPUTERS IN PHYSICS INSTRUCTION

PROCEEDINGS

Editors

Edward F. Redish and John S. Risley

Managing Editor

Nancy Margolis

D

Technische Hochschule Darmstadt
Fachbereich Mechanik
Bibliothek

Inv.-Nr. BM 48190

ADDISON-WESLEY PUBLISHING COMPANY, INC.

THE ADVANCED BOOK PROGRAM

Redwood City, California • Menlo Park, California • Reading, Massachusetts

New York • Amsterdam • Don Mills, Ontario • Sydney • Bonn • Madrid

Singapore • Tokyo • San Juan • Wokingham, United Kingdom

Contents

Preface	xiii
Organization	xvii
Conference Sponsors	xix
Section 1. The Computer's Impact on the Physics Curriculum	
Invited Papers	
What Works: Settings for Computer Innovators in Physics Education / <i>Edwin F. Taylor</i>	3
The Impact of the Computer on the Physics Curriculum / Edward F. Redish	15
Workshop Physics: Replacing Lectures with Real Experience / Priscilla W. Laws	22
Computers in Learning Physics: What Should We Be Doing? / Alfred Bork	32
Contemporary Physics in the Introductory Course / D. F. Holcomb	40
Changing the Introductory Physics Sequence to Prepare the Physics Student of the 1990s / Jack M. Wilson	44
Computers and the Broad Spectrum of Educational Goals / Peter S. Signell	54
Problem Solving, Pedagogy, and CDC Physics / Karen L. Johnston	70
Section 2. Physics Computer Simulations	
Invited Papers	
Early Experiences with Physics Simulations in the Classroom / <i>Blas Cabrera</i>	77
Cellular Automata / <i>George Marx</i>	83
Animation in Physics Teaching / <i>Eric T. Lane</i>	93
Physics Simulations for High-Resolution Color Microcomputers / <i>Richard A. Arndt and L. David Roper</i>	100
Apple Simulations / <i>R. H. Good</i>	107
Contributed Papers	
Macintosh Demonstrations for Introductory Physics / <i>Irvin A. Miller Richard D. Haracz</i>	109
Teaching High School Students to Write Physics Simulations / <i>Joel Goodman</i>	, 110

The Evolution of Computer Simulations in Physics Teaching / <i>Harvey Weir</i>	112
Simulation Laboratory for General Education in Natural Science / <i>Martin H. Krieger</i>	112
Simulation of a Rigid Pendulum / <i>Joel Goodman</i>	114
Graphs and Tracks / <i>David Trowbridge</i>	115
Using Computer Simulations of Orbital Motion / <i>Charles E. Peirce</i>	117
Simulation Programs for Elementary Physics Courses / <i>Harold Salwen</i>	118
Animated Waves and Particles / <i>Eric T. Lane</i>	119
Animation on the IBM PC / <i>Eric T. Lane and Daniel B. Lyke</i>	121
A Potpourri of Color Graphics Enhancements of Classroom Presentations / <i>Clifton Bob Clark</i>	121
Software Packages for High School Optics / <i>David Singer and Uri Ganiel</i>	123
Interactive Optics Software for the General Student / <i>Michael J. Ruiz</i>	125
The Computer as a Teaching Aid in Physics: A Case Study in Optics and Wave Theory / <i>Frank Bason</i>	127
Making Waves: Software for Studying Wave Phenomena / <i>Joseph Snir</i>	129
Educational Software: Oil Drop, Schrodinger Equation, and Size of a Molecule / <i>John Elberfeld</i>	130
Electric Field Lines Simulation Lab / <i>Johnny B. Holmes</i>	132
United States Energy Simulator / <i>Richard W. Tarara</i>	133
Simulation Software for Advanced Undergraduates: Electrodynamics and Quantum Mechanics / <i>P. B. Visscher</i>	134
Microcomputer Simulations in Statistical Physics / <i>Jeffrey R. Fox</i>	136
Spectrum Calculator: Results from Student Use / <i>R. S. Peterson and Eric T. Lane</i>	137
Computer Simulation of the Scattering of a Wave Packet from a Potential / <i>J. E. Lewis</i>	138
Spacetime Software: Computer Graphics Utilities in Special Relativity / <i>Edwin F. Taylor</i>	140
PPP: A Physics Program Pool for Undergraduate Level / <i>J. Becker, H. J. Korsch, and H. J. Jodl</i>	142
Demonstration of Physics Programs Written in cT / <i>David E. Trowbridge, Ruth Chabay, and Bruce Arne Sherwood</i>	143
Microcomputer Tools for Chaos / <i>Alan Wolf</i>	145
Chaotic Dynamics: An Instructional Model / <i>Bruce N. Miller and Halim Lehtihet</i>	146
Exploring Nonlinear Dynamics and Chaos Using an Interactive Program with Graphics Animation / <i>R. W. Rollins</i>	148
Bouncing Ball Simulation System / <i>Nicholas B. Tufillaro, Al Albano, and Tyler A. Abbott</i>	150
Automata on the Mac / <i>N. B. Tufillaro, J. P. Reilly, and R. E. Crandall</i>	151
Demonstrations of Diffusion-Limited Aggregation and Eden Growth on a Microcomputer / <i>G. W. Parker</i>	152

Star Cluster Dynamics Simulation with Dark Matter / <i>John J. Dykla</i>	153
Educational Software for Undergraduate Astronomy / <i>J. C. Evans</i>	154

Section 3. Computers in the Physics Laboratory

Invited Papers

Computer-Based Tools: Rhyme and Reason / <i>Robert F. Tinker</i>	159
The Macintosh Oscilloscope / <i>Elisha R. Huggins</i>	169
Tools for Scientific Thinking: Learning Physical Concepts with Real-Time Laboratory Measurement Tools / <i>Ronald K. Thornton</i>	177
A Collection of Laboratory Interfacing Ideas / <i>David L. Vernier</i>	189
Five Years of Using Microcomputers in Basic Physics Laboratories at the U. S. Naval Academy / <i>David A. Nordling</i>	197
Upper-Level Experimental Physics / <i>Lee E. Larson</i>	203
Online Data Analysis: Smart PC Work Stations / <i>Jordan A. Goodman</i>	213

Contributed Papers

Design, Implementation, and Performance of a Microcomputer-Based Laboratory for General Physics / <i>Richard Bobst, Edwin A. Karlow, and Ivan E. Rouse</i>	218
Microcomputer-Based Laboratories in Introductory Physics Courses / <i>Vallabhaneni S. Rao</i>	220
SAKDAC-Based Physics in Introductory Labs at Miami University / <i>Don. C. Kelly and Stewart A. Kelly</i>	222
Learning Physics Concepts with Microcomputer-Based Laboratories / <i>Ronald K. Thornton</i>	223
Use of Microcomputer in Introductory Laboratories at Ohio State / <i>Gordon J. Aubrecht II</i>	224
Measurement of the Tension in a String / <i>J. Hellemans and G. Hautekiet</i>	225
The Tension in the String of a Simple Pendulum / <i>J. Hellemans and G. Hautekiet</i>	226
Advanced Laboratory Computer Data Acquisition and Analysis / <i>Don M. Sparlin</i>	227
Advanced Electronics with Physics Applications / <i>Michael J. Pechan</i>	229
Computer Interface for Measurement of Coefficient of Linear Expansion / <i>Todd A. Hooks, David L. DuPuy, and Philip B. Peters</i>	231
A Parallel Approach to Data Acquisition and Control / <i>Charles D. Spencer</i>	231
EduTech's Interface Kit / <i>John Elberfeld</i>	233
A Gentle Introduction to Apple Game-Port Interfacing / <i>John Elberfeld</i>	234
Interfacing Physics Experiments to a Personal Computer / <i>John W. Snider and Joseph Priest</i>	235
Laboratories in Sound Analysis Using Fast Fourier Transforms / <i>Carl R. Nave and Darrell L. Bell</i>	236

Computerized Experiments in Physics Instruction / <i>H. M. Staudenmaier</i>	237
Popcorn, Nuclear Decay, and Counting Statistics Using a MBL / <i>Priscilla Laws and John Luetzelschwab</i>	239
Visual Photogate Timing and Graphical Data Analysis / <i>Priscilla Laws and John Luetzelschwab</i>	240
Linearization of Real Data / <i>Priscilla Laws and John Luetzelschwab</i>	241
Coupling Numerical Integration with Real Experience / <i>Priscilla Laws and John Luetzelschwab</i>	242
Coupling Simulations with Real Experience / <i>Priscilla W. Laws</i>	243
VideoGraph: A New Way to Study Kinematics / <i>Robert J. Beichner, Michael J. DeMarco, David J. Ettestad, and Edward Gleason</i>	244
Computer Analysis of Physics Lab Data / <i>John Elberfeld</i>	245
IEEE-488 Interface for a Voltage Power Source and an Analog Multiplex Unit in a Microcomputer-Based Undergraduate Laboratory / <i>C. W. Fischer and P. Sawatzky</i>	246
21X Microcomputer-Based Logger / <i>Boris Starobinets</i>	248
Using Vernier's Graphical Analysis in Physics Labs / <i>Betty P. Preece</i>	249
ASYST, a Tool for Physicists / <i>J. D. Thompson</i>	250
Microcomputer-Based Integrated Statistics, Analysis, and Graphics Software for Introductory Physics Laboratories / <i>J. D. Kimel</i>	251
Application of a Commercial Data-Acquisition System in the Undergraduate Laboratory / <i>William R. Cochran</i>	253

Section 4. Physics Education Research and Computers

Invited Papers

Computers and Research in Physics Education / <i>Lillian C. McDermott</i>	257
Applying Research Results to the Development of Computer-Assisted Instruction / <i>David E. Trowbridge</i>	282
Computer Tutors: Implications of Basic Research on Learning and Teaching / <i>Ruth W. Chabay</i>	290
Addressing Students' Conceptual and Cognitive Needs / <i>A. B. Arons</i>	301
Can Computers Individualize Instruction? / <i>Tryg A. Ager</i>	309

Contributed Papers

The Effects of Microcomputer-Based Laboratories on Exploration of the Reflection and Refraction of Light / <i>John C. Park</i>	322
Kinesthetic Experience and Computers in Introductory Laboratories / <i>Gordon J. Aubrecht II</i>	323
Students' Construction of Concept Maps Using Learning Tool / <i>Robert B. Kozma</i>	325

Section 5. Computational Physics and Spreadsheets

Invited Papers

Teaching Computational Physics / <i>Steven E. Koonin</i>	329
Mathematics by Computer / <i>Stephen Wolfram</i>	338

Concurrent Supercomputers in Science / <i>Geoffrey C. Fox and David Walker</i>	346
Wondering about Physics...Using Computers and Spreadsheet Software in Physics Instruction / <i>Dewey I. Dykstra</i>	362
Introducing Computation to Physics Students / <i>William J. Thompson</i>	375
Spreadsheets in Research and Instruction / <i>Charles W. Misner</i>	382
Contributed Papers	
Teaching Computational Physics / <i>Paul L. DeVries</i>	398
Using Computer Experiments in Standard Physics Courses / <i>Jan Tobochnik</i>	399
An Example of "Task Management" in Constructing a Computer Program / <i>Edward H. Carlson</i>	400
Solution of the Thomas-Fermi Equation for Molecules by an Efficient Relaxation Method / <i>G. W. Parker</i>	402
Numerical Solution of Poisson's Equation with Applications in Electrostatics and Magnetostatics / <i>G. W. Parker</i>	404
A Computing Laboratory for Introductory Quantum Mechanics / <i>Jesusa V. Kinderman</i>	406
The Use of an Electronic Spreadsheet in Physics / <i>Thurman R. Kremser</i>	407
Interference Phenomena Using Spreadsheet Programs / <i>Robert Novak</i>	409
Wondering about Physics . . . Using Spreadsheets to Find Out / <i>Dewey I. Dykstra, Jr. and Robert G. Fuller</i>	412
Section 6. Computer Tutorials in Physics	
Invited Paper	
Tutorials on Motion / <i>C. Frank Griffin</i>	417
Contributed Papers	
CAI: Supplementing the Noncalculus Introductory Course / <i>Lisa Grable-Wallace, Joyce Mahoney, and Prabha Ramakrishnan</i>	423
CAI Geometric Optics for Pre-College / <i>Betty P. Preece</i>	424
Microcomputer-Delivered Homework / <i>Rolf C. Enger and Gary L. Lorenzen</i>	425
Electronic Textbook : A Model CAI System / <i>Duli C. Jain and Frank R. Pomilla</i>	427
Tutorials on Motion / <i>C. Frank Griffin and Louis C. Turner</i>	428
Density of Orbitals: A Tutorial / <i>John W. Gardner</i>	429
Computer-Based Instruction for University Physics / <i>Joseph Priest</i>	430
Intelligent Computer Simulations in the Classroom: A Report from the Exploring Systems Earth Consortium / <i>Annette Rappleyea</i>	432
Modeling of Physics Systems: Examples Using the Physics and Automobile Collisions and Physics and Sports Videodiscs / <i>Dean Zollman</i>	433

Section 7. Physics Lecture Demonstrations Using Computers

Contributed Papers

Computer Demonstrations for Optics / <i>Ulrich E. Kruse</i>	437
The Animated Chalkboard (Updated) / <i>Richard W. Tarara</i>	438
Software for Physics Demonstrations in an Introductory Physics Class / <i>John S. Risley</i>	440

Section 8. Authoring Tools and Programming Languages

Invited Paper

The cT Language and Its Uses: A Modern Programming Tool / <i>Bruce Arne Sherwood and Judith N. Sherwood</i>	445
---	-----

Contributed Papers

Learning to Use the cT Language / <i>Bruce Arne Sherwood and Judith N. Sherwood</i>	453
ILS/2: An Interactive Learning System / <i>James M. Tanner</i>	454
Graphics and Screen-Input Tools for Physics Students / <i>Jack M. Wilson and W. MacDonald</i>	456
HyperCard and Physics / <i>Robert G. Fuller, Carl R. Nave, and David M. Winch</i>	457
Developing CAI Programs with Apple SuperPilot / <i>Robert J. Boye</i>	458
Physics Majors as Research Scientists: Introductory Course Strategy / <i>William M. MacDonald</i>	459
Intuition-Building Tool Kits for Physical Systems / <i>Charles A. Whitney and Philip Sadler</i>	462
Interactive Physics Problems for the Microcomputer / <i>Chris E. O'Connor, Gary M. Fechter, and James M. Tanner</i>	463
Interactive Inquiry with TK Solver Plus Software in the Graduate School Classroom / <i>Kirk A. Mathews</i>	465
Pascal Programming Templates / <i>John P. McIntyre, Jr. and Edward H. Carlson</i>	466
FORTH in the Laboratory / <i>Gary Karshner</i>	468
Logo in the Physics Classroom / <i>Tom Lough</i>	469
Instructional Scripts with SMP / <i>Russell J. Dubisch</i>	471

Section 9. Computer Utilities for Teaching Physics

Contributed Papers

Curvefit: An Interactive Graphing and Data-Analysis Program for the Macintosh / <i>Gyula J. Lorincz</i>	475
Dynamic Analyzer / <i>Roger F. Sipson</i>	476
The Use of Equation Solvers in Physics Instruction and Research / <i>Robert Rundel</i>	477
MathCAD in the Modern Physics Course / <i>Don M. Sparlin</i>	480

Ode: A Numerical Simulation of Ordinary Differential Equations / <i>Nicholas B. Tuffiaro and Graham A. Ross</i>	480
Computer Desk-Top Management for the Physics Teacher / <i>Carl R. Nave</i>	481

Section 10. Computer Networking and Workshops

Invited Papers

Applications of New Technology for Large-Scale Computer-Based Physics Instruction / <i>Donald L. Bitzer</i>	485
Computer Conferencing: A New Delivery System for College Coursework / <i>Richard C. Smith</i>	492

Contributed Papers

The Personal Computer Impact on Physics Education at the U.S. Air Force Academy / <i>George B. Hept and Robert G. Fuller</i>	499
Physics Computer Learning Center at the University of Missouri-Rolla / <i>Ronald J. Bieniek and Edward B. Hale</i>	501
Computers in Introductory College Physics / <i>Carlos I. Calle</i>	503
A Summer Institute on Electronics and Microcomputers for High School Science Teachers / <i>Robert B. Muir</i>	505
A Workshop for Secondary School Teachers on Using Computers for Data Collection in Instructional Laboratories / <i>Charles D. Spencer and Peter Seligmann</i>	507
Teaching Physics with the Aid of a Local Area Network / <i>Rolf C. Enger, Leonard C. Broline, and Richard E. Swanson</i>	508
Online Computer Testing with Networked Apple II Microcomputers / <i>Paul Feldker</i>	510
Using a Computer Bulletin Board / <i>Dean Zollman</i>	511

Section 11. Publishing Physics Software

Contributed Papers

Software Preparation Workshop / <i>Eric T. Lane</i>	515
Practical Advice for the Creator of Educational Software / <i>Ruth W. Chabay and Bruce A. Sherwood</i>	515
The Evaluation of Educational Software: The EDUCOM / NCRIPAL Higher Education Software Awards Program / <i>Robert B. Kozma</i>	517
Physics Academic Software: A New AIP Project to Publish Educational Software in Physics / <i>John S. Risley</i>	519

Section 12. Videodiscs and Visualization for Physics

Invited Paper

LVs, CDs, and New Possibilities / <i>Robert G. Fuller</i>	523
---	-----

Contributed Papers

Beyond TV—Interactive and Digital Video in Physics Teaching / <i>Dean Zollman</i>	527
Introductory Physics Videodisc Lesson Guide / <i>David M. Winch</i>	533
Using Videodiscs Interactively with HyperCard / <i>David M. Winch and Robert G. Fuller</i>	535
The “Mechanical Universe” Videodisc Project / <i>David Campbell, Don Delson, and Dean Zollman</i>	536
Interactive Laser Videodisc / <i>John A. Rogers</i>	536
Smooth Animation on the IBM PC for Lecture Demonstrations Using Page Flipping / <i>Randall S. Jones</i>	540
Author Index	543
Index	545
Software Contents	585
Computers in Physics Instruction: Software Order Form	587
