London · Amsterdam · Don Mills, Ontario · Sydney

Contents

Chapter 1	INTRODUCTION TO CORPORATE PLANNING MODELS	1
	Why Corporate Planning Models?	1
	Energy Crisis	2
	Shortages	4
	Money	4
	Government Regulation	5
	International Competition	6
	Economic Uncertainty	6
	Summary	8
	Experience with Corporate Planning Models	9
	Who Is Using Corporate Models?	9
	Why Are They Used?	10
	How Are They Used?	10
	Resource Requirements	11
	Political Support	11
	Benefits	12
	Limitations	13
Chapter 2	THE DESIGN OF COMPUTER-BASED PLANNING AND MODELING SYSTEMS	16
	Introduction	16
	Planning System	16
	Business Planning Models	17
	Consolidated Planning Models	22
	Management Information System	24
	Database	24
	Database System	24
	Report Generator	26

	Graphics	27
	Security System	27
	Modeling System	27
	Definition of Variables	27
	Model Specification	30
	Recursive Models	31
	Simultaneous Models	32
	Logical Models	33
	Risk Analysis	33
	Other Modeling Features	33
	Forecasting System	34
	Exponential Smoothing	35
	Time Trends	35
	Adaptive Forecasting	35
	Econometric Modeling System	35
	Specification	35
	Estimation	36
	Validation	36
	Policy Simulation	37
	Integrated Models	37
	National and Regional Econometric Models	37
	User Orientation of the System	37
	Free Format Input	38
	User Specified Subroutines	38
	Easy to Use	38
	System Availability	38
	Interactive	38
	Batch	39
	Service Bureau	39
	In-House Hardware	39
	Software System	39
	Summary and Conclusions	41
	Elements of a Planning and Modeling System	42
Chapter 3	THE INTEGRATION OF CORPORATE PLANNING MODELS INTO THE PLANNING PROCESS	45
	Step 1: Review of the Planning Environment	46
	Organizational Structure	46
	Management Philosophy and Style	46
	Business Environment	47
	Planning Process	47
	Step 2: Specification of the Planning Requirements	48
	Step 3: Definition of the Goals and Objectives for Planning	48
	Step 4: Evaluation of Existing Planning Resources	49
	Databases	49

	Forecasts	50
	Models	50
	Reports	50
	Software	50
	Human Resources	51
	Step 5: Design of Integrated Planning and Modeling System	51
	Step 6: Formulation of a Strategy for Integrating the Planning Model into the Planning Process	52
	A Sample Planning Audit Questionnaire	53
Chapter 4	FINANCIAL PLANNING MODELS	60
	Introduction	60
	Objective	61
	Collection of Financial Data	61
	Model Specification	61
	Output Reports	61
	Input Requirements	61
	Equations	64
	Policy Simulations	70
Chapter 5	MARKETING FORECASTING MODELS	74
	Introduction	74
	Time Series Forecasting Models	75
	Moving Averages	76
	Time Trends	78
	Exponential Smoothing	98
	Adaptive Forecasting	103
	Box-Jenkins	107
	Limitations of Time Series Models	114
Chapter 6	ECONOMETRIC MARKETING MODELS: METHODOLOGY	115
	Introduction	115
	Model Specification	116
	Parameter Estimation	120
	Ordinary Least Squares	123
	Test Statistics	125
	Multiple Regression	137
	Econometric Problems	141
	Simultaneous Equations	152
	Solution of Econometric Models	160
	Recursive Models	160
	Simultaneous Equation Models	168
	Validation	170

	Policy Simulation	172
	Market Analysis Questionnaire	174
Chapter 7	ECONOMETRIC MARKETING MODELS: APPLICATIONS	180
	Corporate Marketing Models	180
	The <i>New York Times</i> Model	180
	The Dresser Industries Model	188
	Industry Models	189
	A Pharmaceutical Industry Model	189
	A Battery Industry Model	190
	A Tobacco Industry Model	190
	A Coffee Market Model	198
	National Econometric Models	213
	An Example Model	213
	Other Econometric Models	224
	Supply Models	224
	Pricing Models	224
	Production Cost Models	224
	Banking Models	225
	Personnel Planning Models	225
	Demographic Models	225
Chapter 8	PRODUCTION PLANNING MODELS	227
	Introduction	227
	A Marginal Analysis Model	228
	Assumptions	228
	The Model	229
	Optimal Decision Rules	229
	The Dresser Industries Model	230
	The Activity Analysis Model	230
	Assumptions	230
	Production Function Comparison	231
	The Model	233
	Optimal Decision Rules (Naylor and Vernon 1968)	235
	A Petroleum Refining Industry Model	235
	Activity Analysis without an Objective Function	237
	Example Models	237
Chapter 9	A CORPORATE PLANNING MODEL	239
	Introduction	239
	Goals and Objectives	239
	Historical Data	242
	External Assumptions	242
	Policy Assumptions	246

Model Specification	247
Marketing Model	247
Production Model	250
Financial Model	251
Policy Simulation Experiments	253
Scenario 1	253
Scenario 2	255
Other Scenarios	255
Extensions of the Model	258
Marketing	258
Production	258
Financial	258
Corporate	258
Chapter 10 THE POLITICS OF CORPORATE MODEL BUILDING	260
Introduction	260
Corporate Modeling Goals	261
Political Conflicts	262
Corporate Planning Politics	262
Functional Area Politics	263
Organizational Politics	264
Geographic Politics	265
How to Sell a Corporate Model	265
Responsibility for the Model	267
Development of the Model	267
Use of the Model	268
Some Things a Corporate Model Cannot Do	270
The Role of Outside Consultants	271
Model Credibility	272
Implementation	273
Why Some Models Fail	273
1. The Ill-Defined Problem	273
2. Unfulfilled Expectations	274
3. Inadequate Documentation	274
4. Excessive Use of Technical Jargon	274
5. Failure to Produce Useful Results	275
6. Failure to Meet Deadlines	275
7. Insufficient Data	276
8. Unfavorable Cost–Benefit Ratio	276
9. Inadequate Human Engineering	276
10. Inaccurate Results	277
11. Dependence on One Person	277
12. Inadequate Political Support	277

	Some Unsuccessful Corporate Models	278
	Case 1	278
	Case 2	279
	Case 3	280
	Case 4	281
	Case 5	281
	Every Company Has a Corporate Planning Model	282
Chapter 11	CORPORATE PLANNING MODELS: CASE STUDIES	284
	Introduction	284
	Hammermill Paper Company: Project Planning for Corporate Modeling	285
	Corporate Financial Planning Model Project	286
	Project Activities	289
	LR Planning Model	294
	A Comprehensive List of Anticipated Output Reports	294
	The <i>New York Times</i> Newspaper Planning Model	305
	Introduction	305
	An Overview	306
	The Elements of a Newspaper Model	307
	The Circulation and Advertising Model: Specification and Estimation	311
	The Integration of the Model into the Planning and Budgeting Cycle: Some Applications	315
	The Annual Budget	315
	The Five-Year Plan	315
	New Products	316
	Conclusions	316
	Dresser Industries: The Dresser Planning Model	317
	Introduction	317
	Approach	317
	Demand Analysis	319
	Cost Functions	320
	Cost Equations	326
	Econometric Analysis	327
	Solution Program	332
	Reports	332
	Programming Considerations	332
	Conclusions	332
	Variable Acronyms of Detailed Items in the Model	335

Corporate Planning Modeling at CIBA–CEIGY	336
Historical Background and Past Experiences	336
General	338
Finance	339
Objectives of the Model	339
Equations	340
Simulations	340
Model Tests and Validation	341
Implementation and Experimentation	341
Production	341
Objectives of the Model	341
Model Data	342
Equations	342
Model Solution and Programming	343
Testing and Validation	343
Implementation	343
Marketing	343
Products	343
Objectives	343
Data	344
Equations	344
Estimation, Solution, and Simulation	344
Testing and Validation	345
Results and Implementation	345
Personnel Planning	345
Objectives	345
Data	346
Equations	346
Estimation, Solution, and Simulation	346
Testing and Validation	346
Results and Implementation	346
Software Support	346
Database	347
The COMOS Language and Software	347
Type of Users	349
Integrated Power System Planning Model	349
Introduction	349
Background	349
Overview of Strategic Planning	350
Overview of the Integrated Planning Model	351
A Closer Look at the IPM Model	355
The National Econometric Forecast	355
Regional Market Forecast Module	355
Generation System Simulation	356
Maintenance and Refueling Scheduler	356

	Power System Operation Simulation	359
	Nuclear Fuel Cost Accounting	359
	Fossil Fuel Cost Allocator	360
	Nonfuel Operation and Maintenance	360
	Financial Module	360
	Wholesale Rate Module	362
	Summary	362
Appendix A	SIMPLAN: A PLANNING AND MODELING SYSTEM	367
	Introduction	367
	Applications	368
	Functions	369
	Planning Systems	372
	Business Planning Models	372
	Consolidated Planning Models	374
	Management Information System	375
	Databases	375
	Database System	375
	Report Generator	377
	Graphics	378
	Security System	378
	Modeling System	378
	Recursive Models	379
	Simultaneous-Equation Models	379
	Logical Models	379
	Risk Analysis Models	379
	Other Modeling Features	379
	Forecasting System	380
	Exponential Smoothing	380
	Time Trends	381
	Adaptive Forecasting	381
	Econometric Modeling System	381
	Specification	381
	Estimation	381
	Validation	382
	Policy Simulation	382
	Integrated Models	382
	National and Regional Econometric Models	382
	User Orientation	382
	System Availability	383
	Summary of Important Features	384
	Technical Features	384
	Major Features	384

Appendix B	STATISTICAL TABLES	385
	Table B.1 <i>t</i> Values	385
	Table B.2 <i>F</i> Values (five percent)	386
	Table B.3 <i>F</i> Values (one percent)	387
	Table B.4 Durbin-Watson Values	389
