

Erik W. Grafarend • Friedrich W. Krumm
Volker S. Schwarze (Eds.)

Geodesy- The Challenge of the 3rd Millennium

With 193 Figures and 55 Tables

Springer

Table of Contents

Space Geodetic Measurements and Analysis, Geodetic Reference Frames, Earth Rotation

Spaceborne VLBI Beyond 2000	3
<i>Ádám J.</i>	
Care While Using the NMEA 0183!	7
<i>Ardalan A. A., Awange J. L.</i>	
National Height Datum, the Gauss-Listing Geoid Level Value w_0 and Its Time Variation \dot{w}_0 (Baltic Sea Level Project: Epoch 1990.8, 1993.8, 1997.4)	17
<i>Ardalan A. A., Grafarend E. W., Kakkuri J.</i>	
On the Maintenance of a Proper Reference Frame for VLBI and GPS Global Networks	61
<i>Dermanis A.</i>	
Propagation Modelling of GPS Signals	69
<i>Hannah B. M., Kubik K., Walker R. A.</i>	
Energy Relations for Satellite-to-Satellite Motions	79
<i>Ilk K. H.</i>	
Analytical GPS Navigation Solution	93
<i>Kleusberg A.</i>	
GLONASS Carrier Phases	97
<i>Leick A.</i>	
Analytical Versus Numerical Integration in Satellite Geodesy	103
<i>Lelgemann D., Cui C.</i>	
Intrinsic Parameters and Satellite Orbital Elements	111
<i>Livieratos E.</i>	
Continuously Operating GPS Reference Station Networks: New Algorithms and Applications of Carrier Phase-Based, Medium-Range, Static and Kinematic Positioning	115
<i>Rizos C., Han S., Chen H.-Y., Chai G. P.</i>	
Seasonal and-Short-Period Fluctuations of Earth Rotation Investigated by Wavelet Analysis	125
<i>Schmitz-Hübsch H., Schuh H.</i>	
Characterisation of the C-II Ring Laser	135
<i>Schreiber U., Schneider M., Stedman G. E., Rowe C. H., Schlüter W.</i>	
Triple Frequency GPS for Precise Positioning	141
<i>Sjöberg L. E.</i>	
GPS, Integers, Adjustment and Probability	145
<i>Teunissen P. J. G.</i>	

Geodetic Boundary Value Problems, Gauß-Listing Geoid, Molodensky Quasi-Geoid

Somigliana-Pizetti Minimum Distance Telluroid Mapping	153
<i>Ardalan A. A.</i>	
Tests of Two Forms of Stokes's Integral Using a Synthetic Gravity Field Based on Spherical Harmonics	163
<i>Featherstone W. E.</i>	
The Spheroidal Fixed-Free Two-Boundary Value Problem for Geoid Determination (The Spheroidal Bruns Transform)	173
<i>Grafarend E. W., Ardalan A. A., Sideris M. G.</i>	
Integral Equation Methods in Physical Geodesy	197
<i>Heck B.</i>	
Geodetic Pseudodifferential Operators and the Meissl Scheme	207
<i>Keller W.</i>	
The Analysis of the Neumann and Oblique Derivative Problem. Weak Theory	213
<i>Rozanov Y., Sansò F.</i>	
From the Generalized Bruns Transformation to Variations of the Solution of the Geodetic Boundary Value Problem	225
<i>Rummel R., van Gelderen M.</i>	
Ellipsoidal and Topographical Effects in the Scalar Free Geodetic Boundary Value Problem	235
<i>Seitz K.</i>	
Ellipsoidal Corrections for the Inverse Hotine/Stokes Formulas	247
<i>Sideris M. G., Fei Z. L., Blais J. A. R.</i>	
Map Projections and Boundary Problems	257
<i>Svensson S. L.</i>	
A Solution of Stokes' Problem for the Ellipsoidal Earth by Means of Green's Function	261
<i>Yurkina M. I.</i>	

**Geodetic Data Analysis, Mathematical Statistics,
Mathematical Cartography, Geodetic System Analysis**

Robust Geodetic Parameter Estimation Under Least Squares Through Weighting on the Basis of the Mean Square Error	269
<i>Aduol F. W. O.</i>	
Partial Procrustes Solution of the Threedimensional Orientation Problem from GPS/LPS Observations	277
<i>Awange J. L.</i>	
Procrustes Analysis and Geodetic Sciences	287
<i>Crosilla F.</i>	
From Elliptic Arc Length to Gauss-Krüger Coordinates by Analytical Continuation	293
<i>Dorrer E.</i>	

A Metric for Covariance Matrices	299
<i>Förstner W., Moonen B.</i>	
Mixed Integer-Real Valued Adjustment (IRA) Problems: GPS Initial Cycle Ambiguity Resolution by Means of the LLL Algorithm	311
<i>Grafarend E. W.</i>	
A Short-Cut Method for Computing Positive Variance Component Estimates	329
<i>Hartung J.</i>	
Introducing the Determination of Hidden (Latent) Inner Restrictions Within Linear Regression Analysis	333
<i>Jurisch R., Kampmann G., Linke J.</i>	
Foundations of Bayesian Statistics	349
<i>Koch K.-R.</i>	
About the Generalised Analysis of Network-Type Entities	355
<i>Linkwitz K.</i>	
From the Point Position Error to the Quality Model	365
<i>Meier S.</i>	
The Strange Behavior of Asymptotic Series in Mathematics, Celestial Mechanics and Physical Geodesy	371
<i>Moritz H.</i>	
Datum Accuracy and Its Dependence on Network Geometry	379
<i>Papo H. B.</i>	
Reproducing Estimators via Least Squares: An Optimal Alternative to the Helmert Transformation	387
<i>Schaffrin B.</i>	
Advanced Deformation Analysis	393
<i>Welsch W.</i>	
On Geodetic Description of 3D-Body-Deformation	401
<i>Wittenburg R.</i>	
Random Simulation and GPS Decorrelation	405
<i>Xu P.</i>	
Geodesy Beyond 2000: An Attempt to Unify Geodesy by the Geodesic Flow in All Branches	423
<i>You R. J.</i>	

Geophysical Geodesy

Diffusion with Space Memory	429
<i>Caputo M., Plastino W.</i>	
The Challenge of the Crustal Gravity Field	437
<i>Kakkuri J.</i>	
Simplest Solutions of Clairaut's Equation and the Earth's Density Model	441
<i>Marchenko A. N.</i>
