CONTENTS

Editor's Foreword	xi
Preface	xiii
Acknowledgments	xiv

Chapter 1 Introduction

1.1 Introduction and Historical Background	1
1.2 Charged Particle Motion in a Nonneutral Plasma Column	4
1.3 Levels of Theoretical Description	10
1.3.1 General Discussion	10
1.3.2 The Vlasov Description	12
1.3.3 The Macroscopic Fluid Description	14

Chapter 2 Macroscopic Equilibria and Stability

2.1 The Equilibrium Force Equation	17
2.2 Nonrelativistic Nondiamagnetic Equilibria	21
2.3 Relativistic Diamagnetic Equilibria	25
2.4 Relativistic Electron Beam Equilibria	32
2.5 Macroscopic Model of the Bennett Pinch	40
2.6 Electrostatic Stability of Nonneutral Plasmas	41
2.7 Dispersion Relation for a Constant-Density Plasma Column	45
2.8 Nonneutral Plasma-Filled Waveguide	49
2.8.1 Electrostatic Dispersion Relation	49
2.8.2 Stable Oscillations	52
2.8.3 Electron-Electron Two-Rotating-Stream Instability	55
2.9 Surface Waves on a Nonneutral Plasma Column	60
2.9.1 Electrostatic Dispersion Relation	60
2.9.2 Stable Oscillations	61
2.9.3 Electron-Ion Two-Stream Instability	62

2.10	The Diocotron Instability	66
2.10.1	Poisson's Equation for a Low-Density Electron Gas	66
2.10.2	A Sufficient Condition for Stability	67
2.10.3	Stability of Hollow Beam Equilibria	69
2.10.4	Resonant Diocotron Instability	74
2.11	Interaction of Relativistic Electron Beams with Plasma	78
2.11.1	Equilibrium Configuration and Electrostatic Dispersion Relation	78
2.11.2	Two-Stream Instability in Plasma-Filled Waveguide	81
2.11.3	Two-Stream Instability in Thin Beam Limit	86
 Chapter 3 Vlasov Equilibria and Stability		
3.1	Vlasov Equilibria for Axisymmetric Systems	90
3.1.1	General Discussion	90
3.1.2	Axisymmetric Column Equilibria	92
3.1.3	Axisymmetric Mirror-Confined Equilibria	96
3.2	Nonrelativistic Nondiamagnetic Equilibria	98
3.2.1	General Discussion	98
3.2.2	Rigid-Rotor Equilibria	100
3.2.3	Hollow Beam Equilibria with Shear in Angular Velocity	109
3.3	Relativistic E-Layer Equilibria	113
3.3.1	General Discussion	113
3.3.2	E-Layer Equilibrium with Sharp Radial Boundaries	116
3.3.3	E-Layer and Theta-Pinch Equilibrium with Diffuse Radial Boundaries	121
3.4	Relativistic Electron Beam Equilibria	125
3.4.1	General Discussion	125
3.4.2	Example of a Relativistic Electron Beam Equilibrium	129
3.5	Relativistic Electron Ring Equilibria	141
3.5.1	General Discussion	141
3.5.2	Example of an Electron Ring Equilibrium with Thermal Energy Spread	146
3.5.3	Electron Density Profile	149
3.6	Stability Theorem for Nonrelativistic Nondiamagnetic Equilibria	155
3.7	Body Waves in a Nonneutral Plasma Column	159
3.7.1	Equilibrium Configuration and Assumptions	159
3.7.2	Electrostatic Dispersion Relation	162
3.7.3	Examples of Electrostatic Waves and Instabilities	169
3.7.4	Dispersion Relation for Transverse Electromagnetic Waves	174
