Contents

	List of Figures	ix
	List of Tables	xi
	Preface	xv
Chapter 1	Introduction	1
	A Brief Description of the Multiregional, Multi-industry Forecasting Model	3
	Review of Forecasting Techniques	3
Chapter 2	The Model	9
	The Sectors	9
	Notation	15
	The Equations	18
	Explanation of Equations	22
	Relationship with a National Model	31
Chapter 3	Theoretical Framework	33
	Industry Location	33
	Gross Investment	39
	Employment	40
	Population Migration	40
	Labor Force Participation	44
Chapter 4	Data Estimates	47
	Supply	47
	Demand	49
	Labor	54
	Income	57
	Population and Migration	59
	Transportation Costs	64

Chapter 5	The Equations	69
	Statistical Procedures	69
	The Use of Regional Shares	71
	The Government Equations	73
	The Output Equations	74
	The Equipment Equations	75
	The Construction Equations	99
	The Employment Equations	103
	The Population and Labor Force Equations	116
	The Income Equations	117
	Other Equations	121
Chapter 6	The Forecasts	135
	Assumptions in the National Model	135
	Assumptions in the Regional Model	136
	The Use of 1970 Data	141
	The Use of Residuals	145
	Summary of Results	147
	Regional Effects of Reduced Defense	
	Expenditures	165
	Future Research	193
	Appendix Table	201
	Index	225
	About the Author	231

List of Figures

1-1	Simplified Flow Chart of Multiregional, Multi-industry Forecasting Model	4
3-1	Market Equilibrium with One Market	34
3-2	Market Equilibrium in Three Markets	36
6-1	A Hypothetical Regression Line	145
