Spatial Representation and Motion Planning

Technische Hochschule Darmstadt
FACHBEREICH INFORMATIK
BIBLIOTHEK
Inventar-Nr.: 1995-01417
Sachgebiete: 3-2
Standort: 1996

Springer

Contents

1. Introduction 1
1.1 Motivation and Statement of the Problem 1
1.2 Review of Previous Work 7
1.2.1 Spatial Representations 8
1.2.2 Collision Detection and Motion Planning 9

2. The Spatial Representation 15
2.1 Exterior Representation 17
2.1.1 Planar Case 17
2.1.2 Extension to Three Dimensions 24
2.1.3 Quality of a Representation 30
2.1.4 The Expert Spherizer 41
2.2 Interior Representation 55
2.2.1 Planar Case 56
2.2.2 Extension to Three-Dimensional Space 70
2.2.3 How to Improve a Representation 75
2.3 Convergence and Hierarchy 79
2.3.1 Convergence of the Exterior Representation 80
2.3.2 Convergence of the Interior Representation 85

3. Collision Detection 87
3.1 Problem Definition 88
3.1.1 Problem Classification 88
3.1.2 Solution Methods 92
3.2 Intersection Detection 100
3.2.1 Intersection Between Spheres 101
3.2.2 Algorithm for Exterior Spheres 112
3.2.3 Algorithm for Interior Spheres 117
3.2.4 General Algorithm 119
3.3 Moving Objects 123
3.4 Application to a Manipulator 124

4. Motion Planning 131
4.1 Statement of the Problem 132
4.1.1 Preliminary Concepts and Terminology 132
4.1.2 Taxonomy of the General Problem 136
4.2 Motion Planning and Collision Detection 140
4.3 Computing a Path in a *CS* Plane 147
4.4 Description of the General Method 154
4.5 Efficiency Considerations 160
4.6 Adaptive Motion 162
4.7 Application Examples 162

5. Extensions to the Model 173
5.1 Planar Figures with Curved Boundaries 175
5.1.1 Definition of the Extension 175
5.1.2 Computing the Approximation Polygon 176
5.1.3 Examples 179
5.2 Non-Convex Generalized Polygons 180
5.2.1 Types of Non-Convex Polygons 180
5.2.2 The Efficient Edge Heuristics Revisited 183
5.2.3 Isolated Non-Convex Angles 186
5.2.4 General Case 191
5.2.5 Computing Error Areas 193
5.2.6 Examples 204
5.3 Application-Dependent Local Quality Improvement 206

6. Conclusion and Future Work 211
6.1 Conclusion 211
6.2 Future Research and Open Problems 214
6.3 A Concluding Reflection 215

Appendix. Data Structures for Non-Convex Polygons 217
