Contents

Preface	xi
Introduction: The book, issues, definitions, and scope	1
1. What we understand by the term 'risk analysis'	1
Decision and risk analysis as strategic thinking frameworks	1
Risk analysis defined	1
2. Some definitions	3
Meaning of risk and uncertainty	3
Decision criteria	4
3. Issues associated with the risk analysis approach	4
Problem finding and structuring	4
Value preferences, time preferences, and risk preferences	5
Examples of risk analysis	5
4. Scope of the book	5
Aim of the book	5
Relationship to companion text: <i>Practical Risk Analysis</i>	6
Chapter organization	6
References.....	7
Chapter 1: The nature of risk	8
Introduction	8
What is risk?	9
The process of risk determination	11
Risk identification	11
Risk estimation	12
Risk judgment and evaluation	13
Risk evaluation	14
Evidence on project appraisal methods	15
References.....	17
Chapter 2: The basis of the risk analysis approach	19
Introduction	19
What is risk analysis	20
Need for a new concept	22
The Achilles heel.....	23
Limited improvements.....	26

Sharpening the picture	28
Practical test	29
Investment proposal	29
Obtaining estimates	30
Computer runs	31
Data comparisons	31
Valuable results	33
Comparing opportunities	36
Nature of policy	37
Dual role	39
'Efficiency' concept	41
Standard deviation	41
Research results	44
Seven-step simulation	44
Policies tested	45
General findings	45
Conclusion	49
Potential implementation of the risk analysis approach	50
References	51
Appendix	53
Case (a) Aztech electronics	53
General comments	53
Background to Aztech	54
The handling of new projects	54
The second stage of evaluation	55
The consideration of ten projects	56
The evaluation of the projects	58
Issues for discussion	58
Appendix: Churchman–Ackoff model for multi-dimensional objectives	63
Notes on the analysis	66
Case (b) Strategies for oil exploration	67
The management of uncertainty	67
1. Strategic planning in exploration	68
2. Information for planning and allocation	70
3. Developing a strategy	79
Appendix A: Estimate of future hydrocarbon potential	85
Appendix B: Economic evaluation of exploration opportunity	88
Chapter 3: The treatment of uncertainty in decision-making: Alternative approaches	93
Introduction	93
The assessment of project worth	94
Which measure of worth should be analysed	95

Analytical approaches for obtaining the probability distribution of a worth measure	97
Detailed consideration of the analytical approach	98
Example of the Hillier approach: Property development in Caracas case study	105
<i>Property Redevelopment in Caracas: An Investment Decision</i>	105
Introduction	105
The options available	105
The bank's attitude towards NPV	107
The utility evaluation	107
Appendix 1: The set of apparent options	111
Appendix 2: Investment costs	112
Appendix 3: Summary of floor space categories	112
Appendix 4: Rent revenues	113
Appendix 5: NPV mean and variance	115
Appendix 6: Evaluation of the second differences of the utility function	115
Issues for discussion in relation to the Caracas case	116
(a) Project screening	116
(b) Selection of a decision criterion	116
(c) Issues of goodwill and preservation of the building	118
(d) Technical issues associated with Hillier approach	118
(e) Portfolio argument	118
Stochastic decision-tree analysis	120
Stage I: Investment decision structuring	121
Stage II: The evaluation phase	121
Pros and cons of the stochastic decision-tree approach	122
Stochastic decision-tree examples	123
Example 1. A modified new product launch example	123
Example 2. New product launch decision with abandonment strategies as possible options	129
Concepts of stochastic dominance	131
(a) Screening for risky ventures: Dominance approaches	131
(b) Choice of most preferred option (portfolio) given as a feasible set	135
Alternative project worth approaches based upon multiple attributes	136
Example	137
Sensitivity analysis and the certainty model	145
Summary	146
References	148

Chapter 4: Measurement problems associated with risk analysis

approaches	150
Introduction	150
Decision structuring	150

Information	152
Decision mapping	152
Time horizon issues	154
Screening	155
Measuring uncertainty	155
The process of probability assessment	155
The equivalent urn method: discrete probabilities	157
Potential biases in the probability assessment process	159
Continuous distribution assessments using the CDF fractile method	160
Other evidence on procedures for continuous probability assessment	162
Possible biases with the CDF fractile method	164
Group assessments	167
The analyst–manager interaction	167
Conclusions on probability assessment	169
Assessment of correlation effects	170
Introduction	170
Assessing forms of dependence	172
Assessment of utility	177
Introduction	177
Measuring utility for money	179
Analysis with utilities	181
The psychology of preference	182
Utility functions of executives	184
Group utility	185
Screening policy options	187
Training aspects of decision and risk analysis	188
Summary and conclusions	190
References	191
Chapter 5: Risk analysis and its relationship to finance	194
Introduction	194
The capital asset pricing model (CAPM)	195
The CAPM and project appraisal	197
Example	198
Important assumptions in the CAPM	201
The CAPM and the total risk approach: an operational approach for investment decisions	202
Comments upon a CAPM-type approach to project appraisal	203
Summary	205
Postscript to chapter 5	205
Aztech: CAPM evaluation	205
References	206
Chapter 6: Case studies of the application of risk analysis	207
Introduction	207

<i>The World Bank Case</i>	208
Commentary	211
<i>CCA Company's Egg'n Foam Project</i>	217
Commentary on Egg'n Foam Case.....	239
<i>Digger & Sons</i>	245
Digger & Sons — commentary.....	249
<i>Mucom Case</i>	273
Commentary on the Mucom case	286
References.....	292
Chapter 7: The management of the risk analysis process: Suggested procedures and implementation problems	294
Introduction	294
The role of risk simulation in risk analysis.....	294
A suggested procedure for appraisal of projects in terms of risk analysis	296
Managerial issues in investment decision-making	298
Some evidence on the usefulness of risk analysis approaches in practical decision-making	300
Conclusions	303
References.....	304
Chapter 8: Strategic management and risk analysis: Future growth directions	305
Introduction	305
The process of corporate development	307
Risk analysis and the corporate development process	307
Existing businesses	308
New activities and portfolios of new activities.....	309
Combined portfolios	311
Development strategy	314
Conclusions	314
Problem structuring	315
Uncertainty assessment.....	315
Strategy and structure.....	316
Risk analysis too sophisticated — leads to overkill?	316
Tunnel vision.....	316
Postscript	317
References.....	317
Author Index	319
Subject Index	322
