# Contents

**Preface** ix

**1 Motivating Examples** 1

1.1 The Test Statistic for the Parameter Constancy, 1
1.2 The Test Statistic for a Moving Average Unit Root, 5
1.3 Statistics from the One-Dimensional Random Walk, 10
1.4 Statistics from the Two-Dimensional Random Walk, 19
1.5 Statistics from the Cointegrated Process, 28

**2 Stochastic Calculus in Mean Square** 35

2.1 The Space $L_2$ of Random Variables, 35
2.2 The Standard Brownian Motion and the Brownian Bridge, 39
2.3 Mean Square Integration, 41
2.4 The Integrated Brownian Motion, 48
2.5 The Mean Square Ito Integral: The Scalar Case, 53
2.6 The Mean Square Ito Integral: The Vector Case, 55
2.7 The Ito Calculus, 57

**3 Functional Central Limit Theorems** 65

3.1 Function Space $C$, 65
3.2 Weak Convergence of Stochastic Processes in $C$, 66
3.3 The Functional Central Limit Theorem, 68
3.4 Continuous Mappings and Related Theorems, 70
3.5 FCLT for Linear Processes: Case 1, 77
3.6 FCLT for Martingale Differences, 79
3.7 FCLT for Linear Processes: Case 2, 83
3.8 Weak Convergence to the Integrated Brownian Motion, 86
3.9 Weak Convergence to the Ornstein–Uhlenbeck Process, 90
3.10 Weak Convergence of Vector-Valued Stochastic Processes, 95
3.11 Weak Convergence to the Ito Integral, 102

**4 The Stochastic Process Approach** **109**

4.1 Girsanov's Theorem: Case 1, 109
4.2 Girsanov's Theorem: Case 2, 117
4.3 Girsanov's Theorem: Case 3, 121
4.4 The Cameron–Martin Formula, 124
4.5 Advantages and Disadvantages of the Present Approach, 125

**5 The Fredholm Approach** **129**

5.1 Motivating Examples, 129
5.2 The Fredholm Theory: The Homogeneous Case, 132
5.3 The c.f. of the Quadratic Brownian Functional, 136
5.4 Various Fredholm Determinants, 144
5.5 The Fredholm Theory: The Nonhomogeneous Case, 157
5.6 Weak Convergence of Quadratic Forms, 170

**6 Numerical Integration** **181**

6.1 Introduction, 181
6.2 Numerical Integration: The Nonnegative Case, 182
6.3 Numerical Integration: The Oscillating Case, 186
6.4 Numerical Integration: The General Case, 196
6.5 Computation of Percent Points, 203
6.6 The Saddlepoint Approximation, 207

**7 Estimation Problems in Nonstationary Autoregressive Models** **213**

7.1 Nonstationary Autoregressive Models, 213
7.2 Convergence in Distribution of LSEs, 218
7.3 The Negative Unit Root Case, 230
7.4 The c.f.s for the Limiting Distributions of LSEs, 232
7.5 Tables and Figures of Limiting Distributions, 239
7.6 Approximations to the Distributions of the LSEs, 249
7.7 Nearly Nonstationary Seasonal AR Models, 253
7.8 Complex Roots on the Unit Circle, 264
7.9 Autoregressive Models with Multiple Unit Roots, 267

**8 Estimation Problems in Noninvertible Moving Average Models** **279**

8.1 Noninvertible Moving Average Models, 279
8.2 The Local MLE in the Stationary Case, 282
8.3 The Local MLE in the Conditional Case, 294
8.4 Noninvertible Seasonal Models, 300
8.5 The Pseudolocal MLE, 307
8.6 Probability of the Local MLE at Unity, 311
8.7 The Relationship with the State Space Model, 314

**9 Unit Root Tests in Autoregressive Models** **321**

9.1 Introduction, 321
9.2 Optimal Tests, 323
9.3 Equivalence of the LM Test with the LBI or LBIU Test, 328
9.4 Various Unit Root Tests, 333
9.5 Integral Expressions for the Limiting Powers, 335
9.6 Limiting Power Envelopes and Point Optimal Tests, 342
9.7 Computation of the Limiting Powers, 346
9.8 Seasonal Unit Root Tests, 355
9.9 Unit Root Tests in the Dependent Case, 362
9.10 The Unit Root Testing Problem Revisited, 367

**10 Unit Root Tests in Moving Average Models** **373**

10.1 Introduction, 373
10.2 The LBI and LBIU Tests, 374
10.3 The Relationship with the Test Statistics in Differenced Form, 383
10.4 Performance of the LBI and LBIU Tests, 385
10.5 Seasonal Unit Root Tests, 392
10.6 Unit Root Tests in the Dependent Case, 402
10.7 The Relationship with Testing in the State Space Model, 405

**11 Statistical Analysis of Cointegration** **417**

11.1 Introduction, 417
11.2 Case of No Cointegration, 419
11.3 Cointegration Distributions: The Independent Case, 424
11.4 Cointegration Distributions: The Dependent Case, 433
11.5 The Sampling Behavior of Cointegration Distributions, 438
11.6 Testing for Cointegration, 445
11.7 Determination of the Cointegration Rank, 453
11.8 Higher Order Cointegration, 458

**12 Solutions to Problems** **469**

**References** **609**

**Author Index** **617**

**Subject Index** **619**

**List of Series Titles** **625**
