CONTENTS

	Editor's Foreword	v
	Preface	vii
Chapter 1	ECONOMIC THEORY (I): FIXED CAPITAL FORMATION	1
1.1.	Simple neoclassical models	2
1.2	Replacement investment*	12
1.3	Costs of adjustment and the flexible accelerator	17
1.4	Forward-looking indicators and realization functions	24
1.5	Eclectic framework and money capital	30
1.6	Policy	35
Chapter 2	ECONOMIC THEORY (II): INVENTORIES	44
2.1	Factors influencing desired inventory	44
2.2	The acceleration principle and its relation to motives for holding inventories	51
2.3	A framework: Quadratic costs and linear constraints	57
2.4	Inventories in Macroeconomic models	64
Chapter 3	THE STRUCTURE OF TEMPORAL RESPONSE	76
3.1	Distributed lags: Basic concepts and terminology	77
3.2	Particular techniques of estimation	82
3.3	Variable lags	86
3.4	Differential responses	89
3.5	Stability	91
3.6	Continuous models and discrete approximations*	94
Chapter 4	PROBLEMS OF SPECIFICATION: SOME BASIC CHOICES	103
4.1	Explanatory variables in 'incompletely-specified' models	103

4.2	Estimators	106
4.3	Models and multiple comparisons	110
4.4	Functional forms	112
4.5	Data	116
4.6	Structural changes and seasonality	119
4.7	Treatment of expectational variables	122
Chapter 5	AGGREGATION	130
5.1	Some statistical considerations	131
5.2	Partial aggregation	134
5.3	Stochastic parameters	138
5.4	Temporal aggregation*	140
5.5	Assets and sectors	146
5.6	Postscript: Spatial autocorrelation	148
Chapter 6	ECONOMETRIC EVIDENCE ON INVENTORIES	150
6.1	PTO–PFS distinction, production and finished goods inventory	150
6.2	Work in progress and materials inventory	160
6.3	Inventory behaviour in distributive trades	164
6.4	Specification of inventory adjustment equations	169
6.5	Inventories and short-run behaviour of the economy	171
6.6	Concluding remarks	181
	References	183
	Author Index	199
	Subject Index	203
