ECONOMIC MODELS AT THE BANK OF ENGLAND

Bank of England

1999

Contents	Page
<i>Foreword by the Governor of the Bank of England</i>	v
Chapter 1: Overview	1
Introduction	3
1 Models, forecasts and policy	3
2 The suite of models approach	8
3 Properties of the core model	13
4 Other modelling methods	16
5 Model development	18
Box A: February 1999 fan charts	5
Box B: The National Minimum Wage	9
Box C: The Bank's use of business and consumer survey information	11
Box D: The UIP decomposition	19
Chapter 2: The macroeconometric model	23
Introduction	25
1 Overview of the macroeconometric model	25
2 The structure of the macroeconometric model	26
3 Simulation properties of the macroeconometric model	32
4 Future developments	37
Appendix: Macroeconometric model equation listing	39
Introduction	39
1 Money, financial and wealth variables	39
2 Demand and output	45
3 Labour market	53
4 Prices	58
5 Fiscal policy	66
6 Income	69
Variables listing in alphabetical order	72

Chapter 3: Phillips curve models	75
Introduction	77
1 Phillips curves and more structural models	77
2 Measurement and estimation issues	83
3 Phillips curve applications	88
Conclusions	92
Chapter 4: Small-scale macroeconomic models	93
Introduction	95
1 The basic structure of SSMMs	95
2 Examples of SSMMs	97
3 The Batini-Haldane model	98
4 Some uses of SSMMs at the Bank	101
Conclusions	106
Chapter 5: Vector autoregression models	107
Introduction	109
1 The origins of VARs and their basic structure	109
2 Uses of VARs	110
Conclusions	120
Annex: Identification of VARs: the different schemes available	121
Chapter 6: Optimising models	125
Introduction	127
1 What are optimising models?	127
2 Modelling consumer behaviour	128
3 Some other applications	135
Conclusions	136
Data sources	137
Bibliography	147
