IABSE REPORTS-RAPPORTS AIPC-IVBH REPORTS
Volume 96

IABSE SYMPOSIUM BANGKOK 2009

SUSTAINABLE INFRASTRUCTURE
Environment Friendly, Safe and Resource Efficient

REPORT RAPPORT BERICHT

Organised by
Thai Group of IABSE
In conjunction with
Chulalongkorn University, Bangkok, Thailand
And Asian Institute of Technology, Pathumthani, Thailand

ULB Darmstadt
17842161

Table of Contents

Preface
Table of Contents
List of Authors

Keynote Lectures

Green buildings and structural engineering
W. Gene CORLEY, Rebecca L. KOMAREK, Martha G. VANGEEM 2

Towards Sustainable Development of Bridge Engineering: Chinese Lessons and Experiences
Yao Jun GE, Hai Fan XIANG 4

Design and Assessment of Structures as a Concerted Planning Process
Paul LUECHINGER 6

A1 Codes and Standard for Sustainability

Performance-based Design using Optimization and Probabilistic Tools
G.I. Schuëller, M.A. Valdebenito 12

ACMC Perfomance Based Codes for Design Construction & Maintenance
Tamon UEDA 15

Maillart's design methods and sustainable design
Denis ZASTAVNI 17

Efforts Toward a Sustainable Future in the State of Oregon
Scott A. ASHFORD, Jennifer CHARPILLOZ 19

The Highly Sustainable Kanchanaphisek Bridge—Thailand's Longest Span
Siri PRAKUNHUNGSIT, Ruchu HSU 21

Design of Externally Bonded R.C. Beams Against Premature Interface Debonding Failure
Paul HEATHCOTE, M. RAOOF 23

Economic design of composite bridges with integral abutments
Daniel PAK, Markus FELDMANN, Oliver HECHLER 25

Sustainability with adaptive building concepts
Tobias DRESSEN, Josef HEGGER 27

Bridge Fatigue Guidance – A European Research Project
Mohammad AL-EMRANI, Mattias NILSSON, Mladen LUKIG 29

A2 Service Life of Structures

Lifecycle Cost Variation of Building with Social Aspects
Jun KANDA 32

Damage Identification for Civil Infrastructure Employing a Strain Energy Based Approach
Toshiyuki OSHIMA, Tomoya AOCHI, Shuichi MIKAMI, Yasunori MIYAMORI, Sherif BESKHYROUN, Tomoyuki YAMAZAKI, Miki HATAMURA 34

Safety and Lifespan of Critical Infrastructure Projects with Large Damage Potential : Large Dams
Martin WIELAND 36

IT-based Bridge Health Monitoring for Sustainable Infrastructure
Ayaho MIYAMOTO 38

Monitoring of Structural Health of Penang Bridge using Online System
Michael William KING, Abdul Rahman BIN HASSAN, Wan Zainuddin BIN WAN OMAR 40

A Study Concerning the Way Building Construction should be in the Era of "Low Carbon Emission"
Tatsuo INADA 42

Bridge-specific assessment techniques for the strengthening and refurbishment of the West Gate Bridge, Melbourne
Ian FIRTH 44

Sensitivity Analysis for Deteriorating Bridges using Bus Acceleration Sensors
Akito YABE (NAGAI), Kejian YANG, Ayaho MIYAMOTO 46

Design Service Life Determination for Bridge Structural Elements
Ruan Xin, Tobia ZORDAN, Yuqian WANG, Airong CHEN, Haijun WU 48

A3 Planning/Execution

Sports Facilities - Planning and Engineering
B C ROY 52

The TISB and the TMF Concepts: Application on a Proposal for a Roadway Tunnel Crossing the Tagus River in Lisbon
S. Pompeu SANTOS 54

Stonecutters Bridge - Project Summary
Steve KITE, Ngai YEUNG, Naeem HUSSAIN 56

Construction Engineering of the Kanchanaphisek Bridge
David FERRAND 58

Bridge E-8 in the new railroad of high velocity to the northwest of Spain
Carlos JURADO 60

The Introduction of High-Speed Railway Bridges In Wuhan-Guangzhou Passenger Line, China
Nan HU, Dai GONGLIAN 62

Design of Industrial Ring Road Project, Bangkok
Daniel Johe FARQUHAR, Suravut KHAMDEE, Elljarn JORDET, Raghu NAIR 64

The i-bridge, an industrial bridge concept, Feasibility studies
Peter HARRYSON 66

The implementation of transport systems in Delhi as a way to improve air quality and mobility management
Bettina SCHRECK 68

B1 Natural Disaster Precention and Mitigation

Urban Building Damages in Sichuan Earthquake and Seismic Design Countermeasures in Reconstruction
Xilin LU, Ying ZHOU 70

Structural Lessons from Wenchuan 5-12 for Disaster Risk Reduction
Paul GRUNDY 72

Damage to bridge engineering during Ms 8.0 earthquake in Wenchuan
Du WU, Zhenxin LI 74

Seismic resistance assessment of multi-span continuous bridge in Vietnam by dynamic response analysis
Tran Viet HUNG, Osamu KIYOMIYA, Ann TONGXIANG 76

Evaluation of Seismic Performance of Bridges in Thailand
Anat RUANGRASSAMEE, Supon TECHAPHOLAMAT, Hathairat MANEETES, Warakom SINGASUT, Kreangkrai TACHOVEROJD, Chitti PALASRI 78

Effectiveness of Fiber Reinforced ElastomericBearings as Anti-Seismic Devices made for High Rising Structures
Ulrich GERHAHER, Alfred STRAUSS, Konrad BERGMEISTER 80

Influence of Irregularity of the Substructure on Seismic Behavior of Highway Bridges
Consuelo GÓMEZ SOBERÓN, Daymaru JULIETH, Salas MEGCHÚN 82

Shake Table Response of RC Bridge Piers to Near-Fault Earthquake
Young Soo CHUNG, Dong Wook YANG, Hyun Sik LIM, Hyun Ki HONG 84

B2 Innovative Material/Design/Construction/Operation

Design for Sustainability - Demands for the Integrated Performance of Buildings
Peter MAYDL 88

Improving the Performance of Timber Beams with Prestressed Laminated
Daia ZWICKY 90

Design and Calculation of Modern Glass Constructions
Geralt SIEBERT, Barbara SIEBERT 92

High Performance Fiber Reinforced Concrete for the Design of Prestressed Double-tee Beams
Lionel MOREILLON, René SUTER, Daia ZWICKY 94

Material Characterization and Structural Behaviour of GFRP Pultruded Profiles
João Ramôa CORREIA, Fernando BRANCO, João FERREIRA, Nuno SILVA 96

Development of New Hybrid Composite Girders
Hiroshi MUTSUYOSHI, Nguyen DUC HAI, Shingo ASAMOTO 98

Sustainable and transparent glass roofs-concept and geometry
Bernhard WELLER, Stefan REICH, Jan EBERT 100

Mixed Cements for Environmentally Sustainable Concrete Types
Marijan SKAZLIC, Ružica ROSKOVIĆ 102

B3 Analysis, Design and Computation Method for Buildings and Civil Infrastructure

Impact Challenger Exhibition Halls and Convention Center
Jean-Jacques LARGENT 106

Innovative Construction Engineering for Stonecutters Bridge
Guido MORGENTHAL, Robin SHAM 108

Saadiyat Bridge Abu Dhabi - One Bridge, Three Construction Methods
Peter SEITZ, Holger HAUSER, Nico SCHMIDT, Werner KUHNLEIN 110

ANALYSIS AND DESIGN OF PELJESAC BRIDGE IN CROATIA
Gordana HRELJA, Jure RADIC, Zlatko SAVOR 112

Design of Palm Jumeirah Monorail
Sopon RITDUMRONGKUL, Worapatt RITTHICHAUY, Knut Hj. NIELSEN, Hideya OMI 114

Local Train-induced Vibration in High-speed Train Steel Bridge
Di SU, Yozo FUJINO, Tomonori NAGAYAMA, Takeshi MIYASHITA 116

Urban Maglev Transportation System and Its Dynamic Coupling Behaviours
Moon-Young KIM, Jun-Seok LEE, Dong-June LIM, Young-Phil KIM, Soon-Duck KWON 118

Innovative Indoor Positioning Allowing for Safe Infrastructure
Thomas WIEßFLECKER, Thomas BERNOULLI, Ulrich WALDER 120

Global Mechanical Behavior of Kilometer-Level Cable-Stayed Bridge under Static Loads
Li-yuan BING, Q.W. ZHANG 122

C1 Natural Disaster Prevention and Mitigation

Tsunami loading on buildings, from experiments to field load test
Panitan LUKKUNAPRASIT 124

Impact of Cyclone Nagis on Disaster Risk Reduction in Myanmar
U Than MYINT 126

Development of Performance Based Tsunami Engineering, PBTE
Ian ROBERTSON 128

Performance of New Homes in a Categofy 4 Hurricane
Rajan SEN, Purvik PATEL, Gray MULLINS, Virgilet PIERRESAINT 130

Wind and wind gust effect on narrow composite arch bridges
Philippe Van BOGAERT 132

Improving Aerodynamic Stability of Long-Span Cable-supported Bridges with Slight Adjustment on Girder Sections
Yong-Xin YANG, Yaojun GE 134

Dynamic Energy Balance Approach to Progressive Collapse Prevention
Stefan SZYNISZEWSKI 136

Application of BIM to a Cable-stayed Bridge Constuction
Yeong In BAEK, Doyoung JUNG, Hando KIM, Jaehong KIM 138

C2 Innovative Material/Design/Construction/Operation

Bolted connections for transparent thermoplastics
Christian ECKHARDT, Johann-Dietrich WÖRNER, Jochen STAHL 142

Utilization of Calcium Carbide Residue-Fly Ash Mixture as a Cementitious Material in Concrete.
Nattapong MAKARATAT 144

Bond performance of ribbed type GFRP rebar to concrete at high temperature
Ji-Soo PARK, Doyung MOON, Taesung KANG, Jongsung SIM 146

Experimental results and experience with warm asphalt mixes in Czech Republic
Jan VALENTIN, Petr MONDSCHEIN 148

Practical Use of 60 MPa Cast-in-Placing High-Strength Concrete for PSC Bridges
Kyung Hwan MIN, Jun Mo YANG, Hai Moon CHEONG, Tae Song AHN, Young Soo YOON 150

Behaviors of Fiber Reinforced Cement Composite Thin Overlay under Restrained Shrinkage
Praveen CHOMPREDA, Surasak KHOCHIAM, Montira KETPAT, Niti IADJUI, Piyanat PILAKUL 152

Innovative Epoxy Coating for the Protection of Concrete Structures
P.C. THAPLIYAL, S.R. KARADE & S.P. AGRAWAl 154

World's largest Sliding Finger Joints for the Audubon Bridge
Thomas SPULER, Gianni MOOR, Pascal SAVIOZ 156

Corrugated glass as Improvement to the Structural Resistance of Glass
Robert NIJSSE 158

C3 Analysis, Design and Computation Method for Buildings and Civil Infrastructure

The Design and Construction of Ocean Outfall Diffuser for Samut Prakarn Wastewater Management
Wisit U. PONGSA, Anuchit CHAREONSUPKUL, Paiboon VIPOOSANA, Wirat RATANAWETCHASIT, Chanwut NITIKITPAIBOON 162

State-of-Art Bridge Deck Construction- The challenge to choose the right method
Max MEYER 164

Factor of Transverse Rebar Affecting Crack Behaviors of Concrete Element Subjected to Bending
Daguang HAN, Manfred KEUSER 166

Ecological Analysis of Material Selection for a Bridge
Ryszard A. DANIEL 168

Appraisal of Eco-Friendly Concrete by Using Pond ash and Artificial Sand as Fine Aggregate.
Radha BANG, M. R. CHITLANGE, I. K. PATERIA 170

Alternate load path method for robust design by ductile steel and composite joints
Lars RÖLLE, Ulrike KUHLMANN 172

Design of HPC composition from point of view of hydration heat development
Jiri ZACH, Jiri BROZOVSKY 174

Different Techniques for the Modeling of Post-Tensioned Concrete Box Girder Bridge
Deepak RAYAMAJHI, Anwar NAVEED, Jimmy CHANDRA 176

Experimental Study of Postensioned Steel Trusses with Composite Slabs
Kanokpat CHANVIVIT, John DAWE, Ekasit LIMSUWAN 178

D1 Natural Disaster Prevention and Mitigation

Earthquake Damage Mitigation of Seismically Isolated Curved Viaducts
Carlos MENDEZ GALINDO, Toshiro HAYASHIKAWA 182

Optimal Design of Reinforced Concrete Frames Considering Seismic Provisions Using Genetic Algorithms

Alden Paul BALILI, Andres WINSTON, C. ORETA 184

Influence of orientation of seismic records on structural response
Ioannis AVRAMIDIS, A.M. ATHANATOPOULOU, K.G. KOSTINAKIS 186

Fatigue Reinforcement With Attaching UFC Panels On Orthotropic Steel Deck
Hisatada SUGANUMA, Chitoshi MIKI, Tetsuo KAWAGUCHI 188

Premature Fatigue Failure in a Horizontally Curved Steel Box Girder Bridge
Eric ANCICH, Stephen BROWN 190

Combined Lower and Upper Bound Plastic Analysis: Better than the Sum of its Parts
Andrew JACKSON, Campbell MIDDLETON 192

Shear Connectors in Steel Fiber Reinforced Ultra High Performance Concrete
Sabine RAUSCHER, Josef HEGGER 194

Design of Storey-Isolation System in Multi-Storey Building
Luca ZANAICA 196

D2 Innovative Material/Design/Construction/Operation

Bond of Pretensioned Strands under High Cycle Fatigue
Mazen AYOUBI, Josef HEGGER, Sebastian BÜLTE, Norbert WILL 200

Effect of Improvement by Applying Undermaching Weld Materials on Fatigue Strength of Load Carrying Fillet Welded Cruciform Joints made of High Strength Steel
Koji KINOSHITA, Takashi MORI 202

Development of Modern Bamboo Structures for Sustainable Construction
Yan XIAO, Bo SHAN, Qun ZHOU, Guo CHEN, Liyong SHE, and Ruizhen YANG 204

Development of Geopolymer Concrete with Mixing Condition
Jinkyu SONG, Kang-Seok LEE, Keun-Hyeok YANG, Ho-Beom SONG 206

Result Verification of Performance Based Material Design Method using Satisfaction Curves
Jang-ho Jay KIM, Sung Bae KIM, Hyun Young KIM, Keun Sung LEE, Yun Mook LIM, Kwang Hoe JUNG 208

Tensioning process of Sanhao arch pylon cable-stayed bridge
Xu DONG, Chen BIN, Liu LEI 210

Experimental investigation of deviated single monostrands
Florian DIER, Hermann WEIHER, Konrad ZILCH, Sebastian HOCK 212

Fatigue life prediction for adhesive bonding in steel beams strengthened with a carbon fibre composite plate
Jun DENG 214

D3 Analysis, Design and Computation Method for Buildings and Civil Infrastructure

Numerical Simulation of Consecutive Rockfall Impacts on Reinforced Concrete Slabs
Sara Ghadimi KHASRAGHY, Thomas VOGEL, Norimitsu KISHI 218

Iterative Buckling Analysis for Steel Tower Members in Cable-Stayed Bridges
Dong-Ho CHOI, Hoon YOO and Soo-Ho SONG 220

Shortening the Critical Path in the Construction of Medium-Span Concrete Viaducts
José TURMO, Carlos Manuel MOZOS 222

Probabilistic Nonlinear Finite Element Analysis for Design Assessment of Continuous Steel-concrete Composite Girders
Alessandro ZONA, Michele BARBATO, Andrea DALLASTA, Luigino DEZI 224

The Application of the Finite Strip Method on Curved Box Girder Bridges
Jonie TANIJAYA, Djwantoro HARDJITO 226

Structural Identification to Improve Bridge Management
James-A. GOULET, Prakash KRIPAKARAN, Ian F. C. SMITH 228

Development of Computer Applications for Bridge Management System
Nukul SUKSUWAN, Bonaventura H. W. HADIKUSUMO 230

Prediction of the compressive strength of longitudinally stiffened plates undergoing buckling interaction
Young Bong KWON, H. S. PARK, B. H. CHOI and T. Y. YOON 232

Application of Space Frame Lattice Model in Box-Girder Bridge
Chao LIU, Dong XU 234

E1 Analysis, Design and Computation Method for Buildings and Civil Infrastructure

Dynamic Analysis of Cable-Stayed Bridge under Construction Considering Hoisting Deck Segment Motion
Hyun-Moo KOH, Wonsuk PARK, Dong-Seok KIM, Jinkyo F. CHOO, Hae-Sung LEE 238

Aerostatic and Aerodynamic Study of Melak Cable Stayed Bridge
Franciscus SUPARTONO 240

Thermal Environmental Effects on Modal Parameters and Health Monitoring or Bridge Structures
Mahendra P. SINGH, Harsh NANDAN, Surot THANGJITHAM 242

Proposal of nonlinear dynamic analytical method taking account of effects of local buckling damage

Toshitaka YAMAO, Faizal CHANDRA, Akito MORIMITSU, Atavit SUJARITPONG 244

Vibration characteristics of an old steel bridge
Carlos CUADRA 246

Simplified Analytical Model for Prediction of Flexural Behaviors of Full-Scale PC Girder
Jaruek TEERAWONG, Sayan SIRIMONTREE 248

Stress Concentration of Simply Supported Box Girder with Longitudinal Stiffeners Including Shear Lag Effect
Taweep CHAISOMPHOB, Jaturong SA-NGUANMANASAK, Eiki YAMAGUCHI 250

Proposal of Repair for Corroded Steel Members by Carbon Fiber Sheets
Masatsugu NAGAI, H.SUGIURA, K.OHGAKI, Naofumi INABA, Akira KOBAYASHI 252

Evaluation of the Risk Management of Structural Safety in 15 Building Projects
Dirk MANS, Louis RINGS, Roel van den BRAND, Marcel DERKINK 254

E2 Analysis, Design and Computation Method for Buildings and Civil Infrastructure

Adjusted Design Concept for Integral Concrete Bridges
Raphael METHNER, Konrad ZILCH 258

Ship crash into a Danube river bridge "monitoring system for the damaged structure
Peter FURTNER 260

Development of Safe Impact Performance Vehicle Parapets for Bridges
Vesa JARVINEN 262

Evaluation of End Buffer Impact Forces
Trevor HAAS, Peter DUNAISKI, Philippe MAINCON 264

Steel Decks under Temperature Loads due to Road Surfacing
Karl HUMPF, Peter WALSER 266

Comparison of Probabilistic Extreme Traffic Load-Effect Models Based on Australian Weigh-In-Motion Data
Niphan YAIAROON, Stuart REID 268

On the Conception of Reinforced-UHPC Structural Elements
Marion RAUCH, Viktor SIGRIST 270

Analysis for Flexural Failure Behavior of PET Fiber Reinforced Cementitious Composites by Means of 3-D Meso-scale Analysis
Hiroki OGURA, Minoru KUNIEDA 272

Effectiveness of Repair Methods of Corroded Bridge Cables Shunichi NAKAMURA, Keita SUZUMURA 274

E3 Analysis, Design and Computation Method for Buildings and Civil Infrastructure

The Concrete Dowel - A Resource Efficient Shear Connector.
Robert WAGNER, Ingbert Mangerig, Sascha Burger 278

Undermatching Butt Welds in High Strength Steel
Mattias NILSSON, Peter COLLIN, Mikael MÖLLER, Svante TÖRNBLOM 280

Prefabricated composite bridges
Peter COLLIN, Martin NILSSON, Robert HÄLLMARK 282

Two New Bridges Across Sava River in Zagreb
Jure RADIC, Marija KUSTER, Alex KINDIJ, Ana MANDIC 284

An Upper Shelf Criterion for the Choice of Steel based on Fracture Mechanics
Björn EICHLER, Markus FELDMANN, Dirk SCHÄFER 286

Modelling of Concrete-Filled Stainless Steel Columns in Fire
Brian UY, Zhong TAO, Fei-Yu LIAO, Lin-Hai HAN 288

Crocodiles Protection: Impact for Chambal River Bridge Design
Serge MONTENS, André De GOYON, Yves GAUTHIER 290

The Planning and Design of the Gwangyang Suspension Bridge in Korea
Do Jun BACK, Hyun-Sok CHOI, Jae-Hong KIM, Myeong-Jae LEE, Sang-Hoon SHIN 292

Evaluation of Concrete Bridge Conditions Case Study at Nakornchaisri Bridge, Thailand
Thiem JENNGAMKUL, Chakree BAMRUNGWONG, Kitti MANOKHOON, Putthipong H'WATTANA, Walawat BINUMA, Sarawut RERNGRIT 294

F1 Operation, Monitoring, Maintenance and Repair

Field Investigation on Slab-on-Girder Steel Bridges
Akharawat LENWARI, Teerapong SENJANTICHAI 298

Bridge repair by external prestress: the Gibe crossing in Ethiopia
Marco PETRANGELI, Gaetano USAI, Eugenio ZOPPIS 300

Surveillance research results of road bridges in Finland
Risto KIVILUOMA, Jouko LÄMSÄ 302

A Management System for the Maintenance of Waterway Infrastructures
Katrin KUEHNI 304

Application of Strut-and-Tie Model in Structural Concrete Repair
John DUNTEMANN, Jennifer A. DIMIG, Brian R. GREVE, Ernest ROGALLA 306

Development of cross section repairing material with high thixotropy
Tomoaki ONO, Hiromi FUJIWARA, Masanori MARUOKA, Hiroyuki SASAKURA, Masayoshi ICHIKAWA 308

Fiber-optic Monitoring Systems - Theoretical Aspects and Experimental Verfication of Performance
Roman WENDNER, Alfred STRAUSS, Michael REITERER, Konrad BERGMEISTER 310

Modern Solutions for Rehabilitation of Old Reinforced Concrete Structures
Sorin Ioan DAN, Corneliu BOB, Catalin BADEA, Cosmin ENUICA 312

Optimal Sensor Layout for Bridges Subject to Ship Collision
Yanlin GUO, Y. Q. Ni, S. K. CHEN, H. F. ZHOU 314

F2 Operation, Monitoring, Maintenance and Repair

Monitoring Experiences on Integral Bridges
Roman GEIER 320

Assessment of the Structural Reliability of all wide span Timber Structures under the Responsibility of the City of Munich
Philipp DIETSCH, Stefan WINTER 322

Increasing the Safety of Railway Bridges by Continuous Monitoring
Ioannis RETZEPIS, Magnus HELLMICH, Baldur ROEGENER 324

Probability Based Assessment of a Large Riveted Truss Railway Bridge
Ib ENEVOLDSEN, Alan O'CONNOR, Claus PEDERSEN, Lars GUSTAVSSON 326

Practical Application of Probability Based Assessment to Bridges
Ib ENEVOLDSEN, Alan O'CONNOR 328

Generating Historical Condition Ratings for the Prediction of Reliable Bridge Deteriorations
Michael BLUMENSTEIN, Jaeho LEE, Yew-Chaye LOO, Hong GUAN, Kriengsak PANUWATWANICH, Jung Baeg SON 330

Assessment of damaged concrete bridges based on a visual inspection
Thomas BRAML, Manfred KEUSER 332

Durability of GFRP strengthening under environmental degradation
Manuel SILVA, Hugo BISCAIA 334

Spiral Post-tensioning System for Concrete Members
Navapol KRISHNAMRA, John DAWE, Ekasit LIMSUWAN 336

F3 Analysis Design and Computation Method for Buildings and Civil Infrastructure 337

Design Features of the Bangkok Transit System Extension (BTSE) Sukhumvit Line - Part 1
Benjamin LUSK, Ian JAMES 338

Analysis and prevention of early-age concrete cracking in composite bridges
Thomas BITTERMANN, Kersten LATZ 340

Simulations and Experiments on Wire Breakage Monitoring of Cable by Using AE
Limin SUN, Ting JIN, Zhi SUN 342

Technical Plan for the Realization of Five Footbridges in the Ring road of Catania
Enzo SIVIERO, Lorenzo ATTOLICO 344

Numerical Simulation of FRP Retrofitted Masonry Wall by 3D Finite Element Analysis
Ataur RAHMAN, Tamon UEDA 346

Structural connections for massive timber plate elements in hybrid structures
Ian SMITH, Andi ASIZ 348

Restoration of wooden temple by utilizing long lived and eco-friendly nature
Shinji KOMATSU, Kenzo TAGA,Yasuhiko TASHIRO 350

Perpendicular to grain bearing strength of timber
Ad J.M. LEIJTEN 352

Electro-chemical treatments for corroded peers in Monte Carlo
Naziha BERRAMDANE, Christian TOURNEUR, Erik MELLIER 354

POSTER SESSION

Session 1 Analysis and Design

Evaluating existing post-tensioned concrete bridges equipped with prestressing steel susceptible to stress corrosion cracking
Maximilian FUCHS, Thomas BRAML, Manfred KEUSER 356

Benefits of Using HSC for Improving Tensile Stresses on I-Type Prestressed Concrete Girders
Kyung Hwan MIN, Young Soo YOON, Jae-Yong LEE, Jun-Mo YANG, Jae-Seong LEE, Hyun-Oh SHIN 358

Rheological Approaches on Prediction of Time-dependent Behaviors for Concrete Used in FCM Bridges of Korea
Kyung Hwan MIN, Man Seop LEE, Ki-Yeon KWON, Jae-Ki KIM, Young-Soo YOON 360

Development of energy absorbing device composed of curved members
Toshitaka YAMAO, Chikashi ENDO, Kohei SATO 362

Analysis of Cable supported Structure Considering Cable Sliding
Jae-Yeol CHO, Kwang Sup CHUNG, Ho PARK, Ho-Kyung KIM, Jung Il PARK, Sung-Pil CHANG 364

Dynamic Vehicle-Impact Analysis of U-channel Segmental Concrete Bridges
Dong-Ho CHOI, Ho-Sung NA and Gwang-Won LEE 366

Story Drift Response of R/C Buildings with Hysteretic Dampers
Juan OVIEDO A., Mitsumasa MIDORIKAWA,Tetsuhiro ASARI 368

Shear Test on RC Elements with Circular Cross Section
Uffe Graaskov JENSEN, Linh C. HOANG, Henrik B. JOERGENSEN, Lars S. FABRIN, Joergen MAAGAARD 370

Evaluation of fatigue crack initiation point of load carrying cruciform welded joints
Koji KINOSHITA, Shinpei ARAKAWA 372

Structural Design of Office Building Using Seismic Suppression System with Monitor
Shin-ichiro KAWAMOTO, Osamu HOSOZAWA, Tsutomu KOMURO, Hiromichi FUJINO ... 374

Buckling of Thin-walled Cylinder Shell Specimens with Cut-out Imperfections
Cheng ZHAO, Hiroshi. MATSUDA, Chihiro MORITA and Mei HUANG 376

Analysis for the evaluation of a future-proof load model for bridges
Sebastian BÖNING, Ursula FREUNDT 378

Nonlinear Finite Element Analysis of RC Beams Subjected to Fire
Meri CVETKOVSKA, Strahinja TRPEVSKI, Nenad IVANISEVIC 380

Forth Replacement Crossing: Scheme design of the bridge
Matt CARTER, Steve KITE, Naeem HUSSAIN, Alan SEYWRIGHT 382

Analysis of Composite Bridges in Practice- a Holistic Approach
Dorian JANJIC, Johann STAMPLER 384

Alternative Design Option for Second Sand Layer of Bangkok Clay
Samard BUDDEE 386

Static Behavior of composite beam according to the degree of shear connection considering the stud shear connection
Chi-Young JUNG, Ha-Min CHUNG, Jin-Hee AHN, and Sang-Hyo KIM 388

Shear Strength Evaluation of the Wave Perfobond Rib Shear Connector
Kyu-Tae CHOI, Jin-Hee AHN, Hyun-Min PARK, Sang-Hyo KIM 390

Design of Two Pylon Cable Stayed Bridge in Busan-Geoje Fixed Link
Jae-joong LEE, Woo-Jong KIM, Jae-Koo LEE, Je-Chun KIM, Sang-Kyoon JEONG, Kyung-Sik CHO 392

Dynamic Behavior Analysis of High-Speed Railway Bridges
Chin won JONG, Jong Won KWARK, Jeong Rae CHO, Eun Suk CHOI, Byung Suk KIM 394

Analysis of Fatigue Behavior of Steel-Concrete Composite Bridge Deck
Eun-Kyoung JEON, Kyung KAB-SOO, Jeon EUN-KYOUNG, Lee HEE-HYUN , Kwon SOON-CHEOL , Kim HYEONG-YEOL, Hwang HYO-SANG 396

Effect of perfobond rib orientation in concrete on the shear strength of perfobond rib shear connectors
Qingtian SU, Yuqing LIU, Minggen ZENG, Chen ZHAO 398

Glass and Aluminium - An Example of Innovative Façade Design
Barbara SIEBERT, Iris MANIATIS 400

Systems for Fixing of Solar Panels
Geralt SIEBERT 402

Fire Protection Design for Viaduct
Yusuke IMAGAWA, Osamu OHYAMA, Akimitsu KURITA 404

An Upper Shelf Criterion for the Choice of Steel based on Damage Mechanics
Björn EICHLER, Markus FELDMANN, Dirk SCHÄFER, Ioannis VAYAS, Vasileios CARLOS, Andreas SPILIOPOULOS 406

High Level Engineering for Stay Cable Replacement
Erik MELLIER, Stephane JOYE, Vincent MAILLET 408

Dynamic Characteristics of an Ultra-long Cable-stayed Bridge
Jianfeng LIU, Qiwei ZHANG 410

Maximum Eigenfrequency-Based Topology Optimization Design Considering Non-Stochastic Uncertainty Problem
Dong-Kyu LEE, Uwe STAROSSEK, Soo-Mi SHIN 412

Application of plastic theory to shear strength prediction of external prestressed concrete beams
Yu ZHAO, L C HOANG, M P NIELSEN 414

Session 2 Operation, Monitoring, Maintenance and Repair

Strengthening of a barrel-shaped roof with Textile Reinforced Concrete
Frank SCHLADITZ, Enrico LORENZ, Frank JESSE, Manfred CURBACH 416

Fatigue Implications of Growth in Heavy Vehicle Loads and Numbers on Steel Bridges
Eric ANCICH, Gordon CHIRGWIN, Huber MADRIO, Steve BROWN 418

Experimental Investigations on the Fatigue Behavior of Concrete Bridges
Patrick FEHLMANN, Thomas VOGEL 420

Identification of Cable Damage Based on the Bridge Health Monitoring System
Liang ZHU, Feng LIANGPIN, Li NA 422

A tool for planning the future of regional infrastructure
Riccardo ZANDONINI, Francesca BORTOT, Daniele ZONTA 424

Reliability Assessment and Prediction using Monitoring Information
Alfred STRAUSS, Dan M. FRANGOPOL, Sunyong KIM 426

A new cost efficient measurement system for bridges
Andreas HESS, Ingbert MANGERIG 428

Retrofitting of Historical Masonry Buildings in Seismic Zones
Sorin Ioan DAN, Catalin BADEA, Aurelian GRUIN, Dimitrios PAVLOU, Corneliu BOB 430

Upgrading of São João Bridge Structural Health Monitoring System
Luis OLIVEIRA-SANTOS 432

Joints in wide-span Timber Trusses – Failures and Rehabilitations
Peter MESTEK, Michael MERK, Stefan WINTER 434

Renewal of Railway Steel Bridges by Integration with Concrete Slab
Masamichi SAITO, Ichiro SUGIMOTO, Yusuke KOBAYASHI 436

Vibration Monitoring of Stay-cables Using Image Making and Pattern Recognition
Jongchil PARK, Heungbae GIL, Chanmin PARK, Byungwan JO 438

An Investigation on the Performance of the Sealing Gaskets Used in Shielded Tunnels in Taipei MRT Projects
Hsi-Chi YANG, Kang-Hua CHIANG, Chung-Chen LIANG 440

Study on Strain Calculational Technique of Concrete Bridges by Frame Analysis
Shin-ichi IGUCHI, Kenske KUBO, Seiichi YAMANE, Hiroaki IGARASHI 442

Strengthening steel bridges across Vistula river in Poland
Grazyna LAGODA, Marek LAGODA 444

Decision Making on Repair Priority of Steel Railway Bridges Under Budget Constraint
Kiyoyuki KAITO, Koichi SUGISAKI 446

Bridge Vibration Monitoring using Passing Train Loads
Kiyoyuki KAITO, Koichi SUGISAKI, Masamichi SOGABE, Yozo FJINO, Kodai MATSUOKA, Tsutomu WATANABE 448

The Chiani Suspension Bridge: A Complete Overhaul
Marco PETRANGELI, Marcello PETRANGELI 450

Effective Design of Automatic and Real-time Bridge Monitoring System
Sanae MIYAZAKI, Yuji ISHIKAWA, Noboru ITO, Kimihiko IZUMI, Eiichi SASAKI, Chitoshi MIKI 452

Axle Load Monitoring of Multiple Vehicles Using Dynamic Bridge Responses
Pattarapong ASNACHINDA, Tospol PINKAEW 454

Research on method and system for bridge security evaluation
Zhang JIE 456

Modernization of Historical Bridges-Environmental Aspects Wojciech RADOMSKI, Grażyna BOROŃCZYK-PŁASKA 458

IT-based Bridge Health Monitoring for Sustainable Infrastructure
Ayaho MIYAMOTO 460

Precast RC Wall Panels with Cut-out Openings Retrofitted by FRP Composites István DEMETER, Tamás NAGY-GYÖRGY, Valeriu STOIAN, Cosmin DĂESCU, Daniel DAN... 462

Session 3 Innovative Material / Design / Construction

SHM at the Civil Infrastructure: Applications, recent Progress and Future Demands
Peter FURTNER 464

Evaluation of Pocket-type Rock Net by Full Scale Tests
Koji MAEGAWA, Tomonori TAJIMA, Masao IWASAKI, Koichi SHINOHARA, Kota KAWAKAMI 466

Towards the Plastic Design of Glulam Concrete Composite Structures
Eyüp SELÇUKOGLU, Daia ZWICKY 468

The Extensive Cladding of Drammen Bridge, Norway
Svein Erik JAKOBSEN, Dag Ivar YTREBERG, Ola Haavard HOLE 470

Sustainable Bridge Constructions -Elegant arches - filigree structures - cost effective design
Ole JOSAT, Christian REMDE 472

The use of wrench lines for the design of structures
Angus LOW 474

Puente Mercosur – Double composite truss girder bridge across the Orinoco
Karl HUMPF, Ingo SCHIELE 476

Concrete Bridge Perimeter Strips using Micro Hollow Spheres
Christian GLAESER, Peter LOESCHNIG 478

Gulshan Lake Bridge: Life and Link Between Two Urban Communities
Md. Abdus SOBHAN, Ehsan KHAN 480

Shear design performance of beams reinforced with steel fibers and stirrups
Timothy NYOMBOI, Matsuda HIROSHI 482

The Application of Bionics Ideas In Bridge Design
Nan HU, Dai GONGLIAN 484

Pavement structure for low-capacity roads with different recycled materials utilization
Jan VALENTIN, Petr MONDSCHEIN, Jaroslav VÝBORNÝ, Jan VODIČKA 486

Shrinkage and Creep of Concrete Prepared with Quaternary Blended Cement
Marijana SERDAR, Dubravka BJEGOVIC, Irina Stipanovic OSLAKOVIC 488

Design and Construction of Innovative UHPC Pedestrian Cable Stayed Bridge in Korea
Byung-suk KIM, Hyo-Ki PARK, Sung-Yong PARK, Young-Jin KIM, Won-Jong CHIN, Eun-Suk CHOI, Hyun-Ho KIM, Jong-Hwa KIM, Woo-Jong KIM 490

Assessment of the approach in Eurcode 4 to determine the shear resistance of a headed stud in a trough
Matthias KONRAD, Ulrike KUHLMANN 492

Investigations and testing of full scale glass roofs for individual approval
Bernhard WELLER, Stefan REICH, Jan EBERT 494

Components for local load transfer at glass compression layers
Bernhard WELLER, Jan EBERT, Stefan REICH 496

Design and Construction of Pre-tensioned Prestressed Concrete Box-Girders in Incheon Bridge Viaduct
Ik-Sun CHO, Suk-koo SUH, Sang-Hee LEE, Kyoung-Lae PARK 498

Use of Construction Wastes to Produce Recycling Aggregate through Cold-bonding Technique
Chih-Ta TSAI, Chien-Chih CHANG, Gordon Tung-Chin KUNG, Juu-En CHANG 500

Investigation of anti-noise absorptions walls development with utilization of waste from agriculture
Jiri ZACH, Jiri BROZOVSKY 502

Special requirements of large modular expansion joints
Thomas SPULER, Gianni MOOR, Pascal SAVIOZ 504

Using bamboo to build sustainably
Mario de MIRANDA, Neri BRAULIN, Valeria CHIOETTO 506

Effective Use of Building Materials for Sustainable Development
Shekhar PANANDIKER, Neena PANANDIKER 508

Performance Study of Steel Fiber Reinforced Artificial Sand Concrete
Mahendra CHITLANGE, R. S. BANG, P. S. PAJGADE 509

Influence of Curing on Physico-mechanical Properties of High Performance Concrete
Jiri BROZOVSKY, Jiri ZACH 511

The Construction of Precast Segmental Bridge in Rural Area
Thiem JENNGAMKUL, Chakree BAMRUNGWONG, Kitti MANOKHOON, Putthipong H'WATTANA, Wichai KIJAWATWORAWET, Jirasak THONGSOM 513

Sustainability of Steel Structures
Radlbeck Chiristina, Prof. Martin Mensinger, ... *515*

Session 4 Planning / Execution

Raising Existing Bridges to a Higher Navigable Clearance
Ryszard A. DANIEL, Bas van SINTEN 517

Bridge and Viaduct in the Landscape: Reasons of the Shape
Enzo SIVIERO, Fabrizia ZORZENON 519

Sustainable Urban Transportation Infrastructure – A Design Approach
AnnaLisa MEYBOOM, J. MEYBOOM 521

Bridge Across Vistula River in Plock (Poland) – Project Realization
Bratislav STIPANIC, Nikola HAJDIN, Jozef KRAWCZYK, Krzystof WACHALSKI 523

Detailed Spatial Plan of Highway Corridor in Montenegro
Biljana ŠĆEPANOVIĆ, Miloš KNEŽEVIĆ, Đorđe VUKSANOVIĆ, Mladen GOGIĆ 525

Building Infrastructure with Appropriate Technology
Nirmalya BANDYOPADHYAY, Bandyopadhyay N 527

Life-Cycle Based Design strategies and Approaches of Bridges
Junhai MA, Airong CHEN 529

Kafr Shukr Mixed Use Bridge
Hussein ABBAS, Youssef GHALI 531

Rehabilitation of the library of the University of Würzburg
Arthur PISTORA, Barbara SIEBERT 533

Marquee in the new railway station of Malaga
Carlos JURADO 535

Session 5 Disaster Prevention / Computational Methods

Seismic performance verification of the Akashi-Kaikyo Bridge
Takeguchi MASAHIRO, Susumu FUKUNAGA, Kazuo ENDO 537

Linear Programming Approach for Upgrading Bridge Infrastructure Networks
Bala MUHUNTHAN 539

Stabilizing Measures of the BGFL Bridge during Construction by TMD
Young-Min KIM, Young-Hak KWAK, Dae-Young KIM, Seok-Jun JOO, Yun-Seok KIM 541

Serviceability Performance of Material Efficient Concrete Structures
Linh Cao HOANG 543

Behaviour and Strengthening of Soft Storey Structure
Sanjib SAMADDAR, Sekhar Chandra DUTTA, Indranil DATTA 545

Vulnerability of highway bridges by scour
Consuelo Gómez SOBERÓN, Juan Javier CARRILLO, Darío ESPINOZA 547

Seismically isolated building for disaster prevention and long life
Satoru-NAGASE 549

Rocking shear wall foundations in regions of moderate seismicity
Jan A WIUM, Johann van der MERWE 551

Result Verification of Performance Based Material Design Method using Satisfaction Curves
Jang-ho JAY KIM, Hung Duc PHAN, Ha-Sun JEONG, Jong-Sung SIM, Dong-Uk CHOI 553

Influence Factor Analysis of POA based on River-Spanning Approach Bridge
Zhenxin LI, Shizhong QIANG, Du WU 555

Earthquake Tests of Glass Structures
Geralt SIEBERT, Andreas HAESE 557

Reduction Program of Accident Risk for Vehicles in High Cross Winds
Soon-Duck KWON, Dong Hyawn KIM, Seung-Ho LEE, Ho-Sung SONG 559

Probabilistic Scenario Approach to Structural Design
Stefan SZYNISZEWSKI 561

Noncontact Dynamic Displacement Measurement using FSF Laser
Mahito FUJII, Shuji UMEMOTO, Takefumi HARA, Noriyuki MIYAMOTO, Takuji OKAMOTO, Hiromasa ITO, Yozo FUJINO 563

Problems of code design concepts ensuring the reliability and efficiency of structures
Jindrich MELCHER, Marcela KARMAZÍNOVÁ, Zdeněk KALA 565

Time-Variant Reliability Analysis utilizing Results from Non-Destructive Testing
Christian BUCHER 567

Different Techniques for the Modeling of Post-tensioned Concrete I-Girder Bridge
Jimmy CHANDRA, Naveed ANWAR, Deepak RAYAMAJHI 569
