CONTENTS

Preface.....	vii
List of Tables and Figures.....	ix
Chapter 1: Introduction.....	1
Chapter 2: Desirable Features of Systems Development Environments	
2.1: Introduction.....	4
2.2: Abstraction of the real world.....	5
2.2.1 User familiarity of the specification language.....	7
2.2.2 Language style.....	7
2.2.3 Multi-level abstraction.....	8
2.2.4 Feedback to users.....	9
2.2.5 Modifiability.....	10
2.3: Manipulation of representations.....	10
2.3.1 Tools of manipulation.....	10
2.3.2 Transformation.....	11
2.3.3 Validation.....	11
2.3.4 Independence of design and implementation.....	13
2.4: Construction of a real system.....	13
2.4.1 Computability.....	13
2.4.2 Verification of implementation.....	15
2.5: Conclusion	16
Chapter 3. A Comparison with Related Work	
3.1: Introduction.....	19
3.2: PSL/PSA and META/GA	19
3.3: ADS/SODA.....	22
3.4: SADT/EDDA.....	23
3.5: SAMM/SIGS.....	26
3.6: RSL/SREM	28
3.7: Comparison and conclusion.....	31

Chapter 4. An Initial Algebra Framework for Unifying the Structured Models

4.1: Introduction.....35

4.2: Algebras38

4.3: Initial algebras.....44

4.4: Yourdon structure charts.....49

4.5: DeMarco data flow diagrams.....54

4.6: Jackson structure texts62

4.7: Conclusion68

Chapter 5. A Functorial Framework for Unifying the Structured Models

5.1: Introduction.....70

5.2: A brief introduction to category theory.....72

5.3: Category of De-Marco like processes.....73

 5.3.1 Objects.....73

 5.3.2 Morphisms.....76

5.4: Category of De-Marco like tasks81

5.5: Other categories of structured models85

5.6: Functors and freeness.....89

5.7: Conclusion92

Chapter 6. The Identification of Unstructuredness

6.1: Introduction.....94

6.2: Connected tasks and skeletons.....95

6.3: Minimal subtasks.....102

6.4: Defining unstructuredness104

 6.4.1 An entry in the middle of a selection or parallel connection105

 6.4.2 An exit in the middle of a selection or parallel connection105

 6.4.3 An entry in the middle of an iteration105

 6.4.4 Non-unique exit in an iteration107

6.5: Identification of multiple iteration exits107

6.6: Partially overlapping skeletons110

6.7: Conclusion114

Chapter 7. A Prototype System to Implement the Unifying Framework

7.1: Introduction.....115

7.2: Example on an application of the system.....116

7.3: System characteristics.....140

 7.3.1 Choice of development language.....140

 7.3.2 Components of the prototype system.....142

 7.3.3 Examples of algorithms.....147

Chapter 8. Conclusion166

Bibliography168
