<b>Foreword, <i>Alvin F. Meyer, Jr.</i></b>	<b>vii</b>
<b>Preface</b>	<b>ix</b>
<b>1. THE NATURE OF SOUND, <i>Richard B. Minnix</i></b>	<b>1</b>
Introduction	1
Propagation of Mechanical Waves	2
Alteration of Wave Paths	3
Reflection	3
Refraction	4
Diffraction	6
Transmission and Absorption	8
The Superposition Principle	9
Longitudinal Waves in Air (Sound)	10
Velocity of Sound Waves	11
Characteristics of Sound Waves	12
Wave Intensity	15
Inverse Square Law	15
Sound Intensity	15
Measurement of Sound Waves	16
The Decibel Scale	16
	<b>xi</b>

Sound Power Level	16
Sound Intensity Level	17
Sound Pressure Level	17
Relationship Among Sound Power, Sound Intensity, and Sound Power Level	18
Addition of Harmonic Waves	19
Interference	22
Standing Waves	23
Resonance	24
Sound Spectra	24
Types of Sound Fields	27
Impulse or Impact Sound	27
Sonic Booms	29
Ultrasound and Infrasound	30
Environmental Noise	31
References	31
General	31
Specialized	32
<b>2. AN INTRODUCTION TO THE ASSESSMENT AND MEASUREMENT OF SOUND, <i>Kent Williams</i></b>	<b>33</b>
Introduction	33
Instrumentation	34
Subjective Measures and Rating Schemes	43
Weighted Sound Pressure Levels	43
Equal Loudness Contours (Phons and Sones)	44
Perceived Noisiness	45
Example Calculations of Loudness, Loudness Level, Perceived Noise, and Perceived Noise Level	49
Subjective Rating Methodologies Employing Perceived Noise	55
Equivalent Sound Level	57
Summary	59
References	59
<b>3. THE USE AND MEASUREMENT OF EQUIVALENT SOUND LEVEL, <i>Arthur C. Taylor, Jr. and David M. Lipscomb</i></b>	<b>61</b>
Introduction	61
Comparison of Noise and Other Pollutants	62
Foundation Documents	63
The Equivalent Sound Level ( $L_{eq}$ )	65
The Identified Levels	68
Primer on Methods for Measuring $L_{eq}$ and $L_{dn}$	69
Simplified Measurement of $L_{eq}$ Using Minimum Equipment	70
Tape Recordings with Laboratory Analysis	76
Short-Term Automatic Monitoring Instruments	77
The Special Case of Impulse (Impact) Noise	77
Use of the Identified Levels	78
References	82

<b>4. ENVIRONMENTAL ASSESSMENT OF NOISE, D. J. Hagerty and J. E. Heer, Jr.</b>	<b>83</b>
Introduction	83
History of the National Environmental Policy Act (NEPA)	84
NEPA in Brief	85
Ramifications of NEPA	86
Growth of the Impact Statement	89
Enforcement of NEPA	90
Contents of the EIS	92
Preparing an Environmental Assessment	96
General Sequence of Preparation	96
Methodology	98
Organization of Personnel	101
Environmental Assessments of Noise	102
Planning Implications	102
Specific Project Considerations	103
Example of a Highway Impact Study	106
Summary	109
References	115
<b>5. INTRODUCTION TO BASIC PRINCIPLES OF NOISE CONTROL, Mancil W. Milligan</b>	<b>119</b>
Receiver	119
The Paths	121
The Source	124
Case Histories	127
The Zipper Machine	127
The Sewing Machine	127
Steps to Follow in Industrial Noise Control	128
Summary	129
References	130
<b>6. NOISE CONTROL BY ACOUSTICAL TREATMENT, Anna K. Nábělek and Igor V. Nábělek</b>	<b>131</b>
Outdoor Noise	131
Acceptable Noise Levels for New Construction	131
Barriers	132
Location of Buildings on Sites	133
Enclosure Insulation Properties	135
Airborne and Structureborne Noise	135
Pathways of Airborne Sound through Partitions	135
Transmission Loss (TL)	136
Sound Transmission Class (STC)	140
Noise Reduction (NR)	141
Weight-Mass Law	142
Multiple-Layered Structures	142
Composite Constructions	144
Decrease in NR by Special Phenomena	145

Impact Noise	146
Impact Insulation Class (IIC)	146
Planning of Interiors	146
Recommended Noise Criteria for Rooms	147
Interior Plan	147
Sound Absorption Coefficient	147
Noise Reduction Coefficient (NRC)	149
Absorption in Controlling Reverberation	149
Absorption in Controlling Noise	150
Placement of Absorbers	151
Noise Reduction in an Existing Environment	151
Open Versus Closed Plan	152
Open-Plan Offices	153
Open-Plan Schools	155
References	156
<b>7. PROCEDURES IN HEARING MEASUREMENT AND PROTECTION, <i>Lawrence Vassallo and Joseph Sataloff</i></b>	<b>158</b>
Monitoring Audiometry	158
Steps in Establishing a Program	159
Selecting Hearing Testing Equipment	161
Care and Calibration of Audiometers	161
Training of Technicians	163
Preemployment Hearing Tests	165
Preplacement Hearing Tests	165
Annual Hearing Tests	165
Additional Hearing Tests	166
Plantwide Hearing Testing Program	166
Audiogram Interpretation	166
Audiogram Records	166
Use of Outside Test Facilities	171
Summary of Monitoring Audiometry	171
Hearing Protection	171
Characteristics and Effectiveness of Hearing Protectors	171
Types of Hearing Protectors	172
Fitting and Care of Protectors	180
Starting the Program	181
Summary	183
References	183
<b>8. INDUSTRIAL AND CONSTRUCTION NOISE, <i>George M. Diehl</i></b>	<b>186</b>
Types of Machinery Involved	187
Noise Control Legislation	188
Product Noise Emission Standards	188
Acoustic Design Criteria	189
Sound Test Codes	189
Sound Power and Sound Power Level	190
Construction Machinery	192
Effect of Environment	193
Purchase Specifications	193
Construction Machinery	195

Noise Reduction Procedures	196
Effectiveness of Noise Reduction Techniques	197
Acoustic Enclosures	198
Portable Air Compressors	200
Paving Breakers and Rock Drills	200
Large Drills	203
Cost of Noise Reduction	205
Reference	205
<b>9. AIRCRAFT AND AIRPORT NOISE, <i>William C. Sperry</i></b>	<b>206</b>
Noise Sources and Control	206
Noise Control as a System Concept	214
Measures or Rating of Noise	217
Legislative and Regulatory Activities	223
Flight Procedures	226
Type and Airworthiness Certification	230
Airports	237
Extent of the Problem: Population Impact	238
References	242
<b>10. HIGHWAY AND RAIL TRAFFIC NOISE, <i>Edwin G. Ratering</i></b>	<b>248</b>
Highway Traffic Noise	248
Scope	248
Population Exposed	249
Subjective Aspects of Annoyance	251
Predicting Traffic Noise for Environmental Impact Statements	253
Traffic-Noise Reduction as a Function of Reducing Noise Levels of Vehicles	256
Vehicular Component Hardware Development for Control of Engine-Related Truck Noise	258
Noise Test Standards for Trucks	261
Noise Control of Existing Truck Fleet	261
Relating Light-Vehicle Sound Level Ratings to Actual Operation Levels	262
Noise Control Hardware Development for Automobiles and Light Trucks	266
Automotive Tire Noise	268
Railroad Noise	270
Locomotive Noise	271
Wheel/Rail Noise	274
A Look to the Future	277
References	277
<b>11. PREPARATION OF NOISE CONTROL LEGISLATION, <i>Janet F. Pawlak</i></b>	<b>279</b>
Components of Community Noise Control Legislation	279
Maximum Noise Emission Levels for Equipment	280
Operational and Zone Restrictions	280

Property Line or Receiving Land Use Sound Levels	281
Land Use Planning Requirements	281
Nuisance Law Provisions	281
Legal Considerations	282
Public Health and Welfare	282
Constitutional Issues	283
Preemption	286
Major Components of an Ordinance	291
Definitions	292
<i>Noise versus Sound</i>	292
Person	293
Noise Disturbance	294
Technical Terms	295
Land Use Definitions	296
Noise Sensitive Zone	296
Public Space and Right-of-Way	297
Motor Vehicles	297
Construction	298
Powers and Duties of the Administrator	298
Duties and Responsibilities of Other Departments	303
Prohibited Acts	305
Sound Levels by Receiving Land Use	312
Motor Vehicle Sound Levels	316
Land Use Planning	319
Exceptions and Variances	322
Enforcement	323
<b>12. CONTROL OF NOISE IN THE HOME, <i>Paul Jensen</i></b>	<b>325</b>
Noise Sources	326
Outside	326
Inside	326
The Effects of Noise in the Home	328
Sleep Interference	328
Speech Interference	328
Hearing Damage	329
Government Help in Achieving Quiet Homes	331
The Noise Control Act of 1972	333
Noise Control Problems and Solutions	333
Existing Noise Inside the Home	333
Existing Noise Outside the Home	335
Structureborne Sound Isolation	339
Conclusion	339
References	339
<b>13. CONTROL OF NOISE FROM RECREATIONAL ACTIVITIES, <i>Robin Harrison</i></b>	<b>341</b>
Introduction	341
Motorcycles	342
Snowmobiles	346

Boats	346
Other Off-Road Vehicles	347
Organized Races	347
Nonmobile Sound Sources	348
Effects of Recreational Noise	348
Various Settings	349
Health Effects	352
Control Strategies	353
Source Regulations	354
In-Use Noise Standards	355
Zoning	358
Further Resources	359
Appendix	361
Author Index	365
Subject Index	369
