

Klaus Daniels

Low-Tech Light-Tech High-Tech

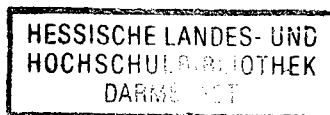

**Building
in the
Information Age**

English translation by
Elizabeth Schwaiger

Birkhäuser Publishers
Basel · Boston · Berlin

	7	Foreword	
	8	Point of Departure	
	10	Taking Stock	
Part 1	14	The Path to an Information Society: Basic Principles	
	15	1 At the End of the Century: Trends and Demands of the Present	
	15	1.1 Destruction or Conservation of the Environment?	
	19	1.2 Resource Consumption or Conservation	
	22	1.3 Recycling Instead of Single-Use Products	
	25	1.4 The Worldwide Net and the Virtual Universe	
	28	1.5 Changing Markets, "New Work"	
	30	2 The Dissolution of Architecture or Denser Building: Scenarios for the Future	
	30	2.1 Data Highways Instead of Highways, Databanks Instead of Libraries	
	40	2.2 Compactness Instead of Dissolution	
	44	3 The Knowledge of Building Masters: Solutions from the Past	
	46	3.1 Building According to Climate Zones	
	47	3.2 Environment and Town Structures	
	52	3.3 Building in Extreme Climate Conditions: Low-Tech Architecture	
	56	4 Resources in Nature: The Potentials in our Environment	
	57	4.1 Solar Energy	
	61	4.2 Wind Energy	
	64	4.3 Rainfall and Surface Water	
	67	4.4 Planted Areas	
	72	4.5 The Energy Potential of the Soil	
	73	4.6 Daylight	
Part 2	75	Sustainable Building: Examples and Ideas	
	77	5 Living and Working in the Information Age: Integrated Building	
	78	5.1 Living Areas	LDK 2
	85	5.2 Working Areas	
	90	6 Comfortable Rooms – Quality Building	-
	91	6.1 Thermal Comfort	1
	93	6.2 Hygienic Comfort	
	95	6.3 Acoustic Comfort	
	96	6.4 Electromagnetic Compatibility	
	99	6.5 Visual Comfort	7. Ex.
	100	6.6 The Influence of Colours	

HB Nebenstelle

104	7	In the Environment or with the Environment: Contextual Building
106	7.1	Building in Green Spaces
111	7.2	Building with Wind
121	7.3	Building with the Sun
125	7.4	Building Near Water
130	8	Heavy or Light? Resource-Conserving Building
130	8.1	Building with Mass: Storing Thermal Energy
134	8.2	Building Without Weight: Light-Tech Architecture
143	8.3	Building with Renewable Raw Materials: Wood and Paper
146	9	The New Skin: Efficient Building
147	9.1	Insulation
148	9.2	Shading
151	9.3	Daylight Input and Glare Protection
154	9.4	Natural Ventilation
167	9.5	Buildings under Glass
174	10	Clever Construction – Ecological Assessment and Planning
174	10.1	Motives for Ecological Planning
177	10.2	Ecological Assessment of Building Construction: Methods
180	10.3	An Evaluation Grid
184	10.4	Economic Optimization
185	10.5	Ecology and Economy in the Life Cycle
186	10.6	Ecology as Part of the Planning Process
191	10.7	Perspectives of Ecological Planning
Part 3	193	Measures for Expansion and Renovation
197	11	Intelligently Operated Buildings: High-Tech Systems
197	11.1	Information and Communication Systems
202	11.2	Systems for Building Management and Process Optimization
208	11.3	Systems for Ventilation, Heating and Cooling
210	11.4	Interior Lighting
212	11.5	Integrated Acoustic Systems
213	11.6	Installation Rooms and Zones
214	12	Mobile Real Estate – New Use for Existing Buildings
218	12.1	Basic Construction: User Fit-out
220	12.2	Changeable Building Structures
223	12.3	Changeable Building Skins
224	12.4	Changeable Building Services
225	12.5	Perspectives
