Reporting Experimental Data

Selected Reprints

Howard J. White, Jr., EDITOR
Guest Scientist, National Institute of Standards and Technology

Compiled under the auspices
of the American Chemical Society
Task Force on Scientific Numeric Data

American Chemical Society, Washington, DC 1993

Contents

Preface ix

Section 1: Introduction: Describing and Presenting Measurements 1

Section 2: Items of General Use in Chemistry 9

Guide for the Presentation in the Primary Literature of Numerical Data Derived from Experiments 15

Guide for the Presentation in the Primary Literature of Physical Property Correlations and Estimation Procedures 22

Section 3: Thermodynamics Including Biothermodynamics 31

A Guide to Procedures for the Publication of Thermodynamic Data 37

Guide for Reporting Experimental Data on Vapor–Liquid Equilibria of Mixtures at Low and Moderate Pressures 45

Recommendations for Measurement and Presentation of Biochemical Equilibrium Data 52

Recommendations for the Presentation of Thermodynamic and Related Data in Biology 59

Calorimetric Measurements on Cellular Systems: Recommendations for Measurements and Presentation of Results 65

Section 4: Chemical Kinetics and Transport Properties 75

The Presentation of Chemical Kinetics Data in the Primary Literature 79

Definitions, Terminology, and Symbols in Colloid and Surface Chemistry: Part II: Heterogeneous Catalysis 85

Recommendations for Data Compilations and for the Reporting of Measurements of the Thermal Conductivity of Gases 103

Section 5: Electrochemistry 105

Recommendations for Publishing Manuscripts on Ion-Selective Electrodes 116

Recommendations on Reporting Electrode Potentials in Nonaqueous Solvents 120

Electrode Reaction Orders, Transfer Coefficients and Rate Constants: Amplification of Definitions and Recommendations for Publication of Parameters 124

Section 6: Colloid and Surface Chemistry **129**

Reporting Physisorption Data for Gas/Solid Systems with Special Reference to the Determination of Surface Area and Porosity 131

Reporting Data on Adsorption from Solution at the Solid/Solution Interface 145

Reporting Experimental Pressure-Area Data with Film Balances 162

Reporting Experimental Data Dealing with Critical Micellization Concentrations (c.m.c's) of Aqueous Surfactant Systems 172

Section 7: Photochemistry **177**

Recommended Standards for Reporting Photochemical Data 180

Section 8: Analytical Chemistry **185**

Recommendations for Publication of Papers on Precipitation Methods of Gravimetric Analysis 187

Design and Publication of Work on Stability Constants 189

Development and Publication of New Methods in Kinetic Analysis 204

Recommendations for Reporting Thermal Analysis Data 211

Suggestions for Reporting Dynamic Thermogravimetric Data 212

Recommendations on Nomenclature for Chromatography 213

Recommended Terms, Symbols, and Definitions for Electroanalytical Chemistry 224

Conditional Diffusion Coefficients of Ions and Molecules in Solution: An Appraisal of the Conditions and Methods of Measurement 236

General Aspects of Trace Analytical Methods—IV. Recommendations for Nomenclature, Standard Procedures, and Reporting of Experimental Data for Surface Analysis Techniques 240

Nomenclature and Spectral Presentation in Electron Spectroscopy Resulting from Excitation by Photons 245

Recommendations for Publication of Papers on Methods of Molecular Absorption Spectrophotometry in Solution between 200 and 800 nm 246

Section 9: Crystallography and Electron Diffraction **249**

Primary Crystallographic Data 250

Powder Data 254

The Standard Data Form for Powder Diffraction Data 258

Recommendations for the Presentation of Infrared Absorption Spectra in Data Collections—A. Condensed Phases 271

Recommendations for the Presentation of NMR Data for Publication in Chemical Journals 275

Standard Practice for Data Presentation Relating to High-Resolution Nuclear Magnetic Resonance (NMR) Spectroscopy 277

Presentation of NMR Data for Publication in Chemical Journals—B. Conventions Relating to Spectra from Nuclei Other Than Protons 285

Recommendations for EPR/ESR Nomenclature and Conventions for Presenting Experimental Data in Publications 286
Nomenclature and Conventions for Reporting Mössbauer Spectroscopic Data 291
Guide for the Publication of Experimental Gas-Phase Electron Diffraction Data and Derived Structural Results in the Primary Literature 295

Section 10: Spectroscopies 301

Critical Evaluation of Class II and Class III Electron Impact Mass Spectra: Operating Parameters and Reporting Mass Spectra 308
Specifications for Infrared Reference Spectra of Molecules in the Vapor Phase 310
Recommendations for the Presentation of Raman Spectra in Data Collections 317
Presentation of Molecular Parameter Values for Infrared and Raman Intensity Measurements 322
Definition and Symbolism of Molecular Force Constants 325

Section 11: Automated Products 331

Appendix 1: Abbreviated List of Quantities, Units, and Symbols in Physical Chemistry 333

References to Green Book (Tables) 337

References to This Book 341
