

Functional Anatomy *of the* Vertebrates

An Evolutionary Perspective

third edition

Contents Overview

PART I Background for the Study of Vertebrate Anatomy	1
1 Introduction	2
2 Phylogenetic Relationships of Chordates and Craniates	28
3 Diversity and Phylogenetic History of Craniates	48
4 Early Development and Comparative Embryology	118
5 Form and Function	177
PART II Protection, Support, and Movement	207
6 The Integument	208
7 The Cranial Skeleton	232
8 The Postcranial Skeleton: The Axial Skeleton	269
9 The Postcranial Skeleton: The Appendicular Skeleton	294
10 The Muscular System	315
11 Functional Anatomy of Support and Locomotion	351
PART III Integration	395
12 The Sense Organs	396
13 The Nervous System I: Organization, Spinal Cord, and Peripheral Nerves	437
14 The Nervous System II: The Brain	473
15 Endocrine Integration	504
PART IV Metabolism and Reproduction	531
16 The Digestive System: Oral Cavity and Feeding Mechanisms	532
17 The Digestive System: Pharynx, Stomach, and Intestine	557
18 The Respiratory System	575
19 The Circulatory System	603
20 The Excretory System and Osmoregulation	632
21 The Reproductive System and Reproduction	655
PART V Conclusion	693
22 Epilogue	694

Contents

PART I Background for the Study of Vertebrate Anatomy	1	Synapsids	99
CHAPTER 1 Introduction	2	Mammals	101
Anatomical and Functional Interpretation	2	Therians and the Diversification of Marsupials	105
Functional Anatomy and Development	8	Eutherians	106
Systematic Biology and Comparative Interpretation	10	Focus 3-1 <i>Practical Considerations About Fossils and Anatomical Reconstructions</i>	50
Anatomical Terminology	21	Focus 3-2 <i>Adapting to a Phylogenetic Classification of Craniata</i>	52
Focus 1-1 <i>Cladistic and Character Matrices</i>	12	Focus 3-3 <i>Thinking About the Origin of Tetrapods</i>	77
Focus 1-2 <i>Reconstructing a Phylogeny of Amniotes Using Phylogenetic Systematics</i>	14	Focus 3-4 <i>Ectothermy and Endothermy</i>	82
CHAPTER 2 Phylogenetic Relationships of Chordates and Craniates	28	Focus 3-5 <i>Early Mammals and the Origin of Mammalian Endothermy</i>	102
Characteristics and Phylogenetic Relationships of Deuterostomes	29	Appendix <i>Example Synapomorphies for Clades Figured in Chapter 3</i>	116
Characteristics and Phylogenetic Relationships of Chordates	33	CHAPTER 4 Early Development and Comparative Embryology	118
Characteristics of Craniates	41	General Concepts in Developmental Biology	119
A Scenario About Craniate Origins	43	Gametes and Fertilization	123
Focus 2-1 <i>The Excretory Organs of Amphioxus</i>	39	Cleavage	131
CHAPTER 3 Diversity and Phylogenetic History of Craniates	48	Fate Mapping	133
An Overview of the Major Living Clades of Craniates	50	Gastrulation, Mesoderm Formation, and Early Neurulation	133
Craniates and the Origin of Gnathostomes	53	Mesoderm Differentiation	140
Elasmobranchiomorphs	59	Secondary Egg Cell Membranes and Extraembryonic Structure	142
Bony Fishes and the Diversification of Teleosts	63	Developmental Modifications of Eutherian Mammals	144
Sarcopterygians and the Origin of Tetrapods	74	Organogenesis of the Nervous System and Sense Organs	146
Amphibians	79	Development of the Coelomic Cavity and Mesenteries	159
Reptilomorphs and the Origin of Amniotes	84	Basic Organization of the Vertebrate Head	164
Sauropsids and the Origin of Diapsids	87	<i>Hox</i> Genes, Segmentation, and the Evolution of the Vertebrate Body Plan	170
Lepidosaurs	89	Focus 4-1 <i>Model Species and Vertebrate Embryogenesis</i>	124
Archosauromorphs	91	Focus 4-2 <i>Cleavage, Gastrulation, and Neurulation in Actinopterygians</i>	128
Theropods and the Origin and Diversification of Birds	94		

CHAPTER 5 Form and Function	177	CHAPTER 9 The Postcranial Skeleton:	
Physical Quantities	178	The Appendicular Skeleton	294
Forces	180	Origin of the Appendicular Skeleton	294
Properties and Growth of Structural Materials	183	The Appendicular Skeleton of Jawed Fishes	296
Joints and Kinematic Chains	193	The Appendicular Skeleton of Early Tetrapods	299
Lever Systems	195	The Limbs and Girdles of Other Amphibians and Early Reptilomorphs	302
Distribution of Materials	197	The Appendicular Skeletons of Birds and Other Flying Vertebrates	306
Scaling: Isometric and Allometric Growth	200	The Evolution of the Mammalian Appendicular Skeleton	308
Focus 5-1 <i>Vector Analysis</i>	182	Focus 9-1 <i>A New Hand and Foot?</i>	302
Focus 5-2 <i>Cartesian Transformations</i>	203	Focus 9-2 <i>A Limb Becomes a Fin</i>	306
Appendix: <i>Conversion Factors Among Units for Physical Quantities</i>	206		
 PART II Protection, Support, and Movement	 207		
 CHAPTER 6 The Integument	 208	CHAPTER 10 The Muscular System	315
General Structure and Development of the Skin	209	Types of Muscle Tissue	316
Skin Coloration and Its Functions	210	Muscle Structure	318
The Skin of Fishes	211	Muscle Contraction	320
The Skin of Amphibians	217	Whole Muscle Contraction	324
The Skin of Reptiles	218	Muscle Development and Groups	327
The Skin of Birds	219	The Evolution of the Axial Muscles	330
The Skin of Mammals	221	The Evolution of the Appendicular Muscles	342
The Evolution of Vertebrate Skin	228	Electric Organs	345
Focus 6-1 <i>Adaptive Coloration in Flatfishes</i>	212	Focus 10-1 <i>Tension–Length Curve for Muscle Fibers</i>	321
Focus 6-2 <i>The Evolution of Feathers</i>	221	Focus 10-2 <i>Tension–Length Curve for Whole Muscle</i>	325
		Focus 10-3 <i>Actions of Trunk Muscles in Tetrapods</i>	341
 CHAPTER 7 The Cranial Skeleton	 232	 CHAPTER 11 Functional Anatomy	
The Skeleton	233	of Support and Locomotion	351
Divisions of the Craniate Skeleton	233	Support and Locomotion in the Aquatic Environment	352
Components of the Cranial Skeleton	234	Support and Locomotion in the Terrestrial Environment	360
Phylogeny of the Cranial Skeleton	238	Support and Locomotion in the Aerial Environment	380
Conclusion: Changing Form and Function	264	Focus 11-1 <i>Actions of a Dorsal Fin</i>	359
Focus 7-1 <i>Forces Acting at the Jaw Joint</i>	263	Focus 11-2 <i>Muscle Fiber–Type Recruitment in a Step Cycle</i>	370
		Focus 11-3 <i>Energy Costs of Locomotion</i>	374
 CHAPTER 8 The Postcranial Skeleton:		Focus 11-4 <i>Metabolic Costs of Amphibian Saltation</i>	380
The Axial Skeleton	269	Focus 11-5 <i>Muscle Activity During a Wing Cycle</i>	388
Components of the Axial Skeleton	269		
The Evolution of the Axial Skeleton	276		
Focus 8-1 <i>Why Seven Cervical Vertebrae?</i>	287		
Focus 8-2 <i>Back to the Water: An Example of Convergent Evolution</i>	288		

PART III Integration	395	CHAPTER 15 Endocrine Integration	504
CHAPTER 12 The Sense Organs	396	A Comparison of Endocrine and Nervous Integration	505
Receptors	397	The Nature of Hormones and Hormonal Action	508
Chemoreceptors	398	The Hypothalamo-Hypophyseal Axis	510
Cutaneous Receptors	403	The Pineal Gland	515
Proprioceptors	405	The Urophysis	516
Lateral Line System	406	The Adrenal Glands	516
The Ear	401	The Hypothalamo-Hypophyseal-Thyroid Axis	519
Evolution of the Mammalian Ear	420	Endocrine Regulation of Calcium and Phosphate Metabolism	522
Photoreceptors	422	Endocrine Regulation of Metabolism	524
Median Eyes	423	Endocrine Regulation of the Gastrointestinal Tract	526
The Structure and Function of Image-Forming Eyes	424	Focus 15-1 <i>The Renin-Angiotensin-Aldosterone Mechanism</i>	519
The Origin and Development of the Eye	429		
Evolutionary Adaptations of the Eye	429		
Thermoreceptors	433		
CHAPTER 13 The Nervous System I: Organization, Spinal Cord, and Peripheral Nerves	437	PART IV Metabolism and Reproduction	531
Cellular Components of the Nervous System	438	CHAPTER 16 The Digestive System: Oral Cavity and Feeding Mechanisms	532
Organization of the Nervous System	443	The Development of the Digestive Tract	532
The Spinal Cord and Spinal Nerves	450	The Mouth and Oral Cavity	534
Cranial Nerves of Gnathostomes as Represented by Chondrichthyans	456	The Feeding Mechanisms of Vertebrates	540
Evolution of the Cranial Nerves	462	The Palate	549
The Origin of Special Sensory Neurons	464	Tongue, Cheeks, and Lips	551
Changes in the Cranial Nerves of Amniotes	465	Oral Glands	553
The Autonomic Nervous System	466	Evolution of the Vertebrate Feeding Mechanism	554
CHAPTER 14 The Nervous System II: The Brain	473	Focus 16-1 <i>Cranial Kinesis or Intracranial Mobility</i>	546
Embryonic Development and Regions of the Brain	474	CHAPTER 17 The Digestive System: Pharynx, Stomach, and Intestine	557
The Meninges and Cerebrospinal Fluid	474	The Pharynx and Its Derivatives	558
The Fish Brain: A Prototype for Vertebrates	477	Gut Tube Structure	558
Major Trends in Tetrapod Brain Evolution	484	The Esophagus	560
Important Mammalian Pathways	490	The Stomach	560
Focus 14-1 <i>Determining Central Nervous System Pathways and Functions</i>	478	The Intestine and Cloaca	565
Focus 14-2 <i>Brain Size</i>	485	The Liver and Pancreas	569
		Focus 17-1 <i>Gut Structure and Anuran Metamorphosis</i>	566
		Focus 17-2 <i>The Functional Anatomy of Large Mammalian Herbivores</i>	568

CHAPTER 18 The Respiratory System	575	Developmental Canalization, Convergent and Reversed Evolution, and Evolutionary Innovation	651
The Respiratory System of Fishes	576		
Respiration in Early Tetrapods	589		
The Reptile Respiratory System	591		
Respiration in Birds	593	CHAPTER 21 The Reproductive System and Reproduction	655
Respiration in Mammals	596	Sex Determination	655
Evolution of Respiratory Patterns in Air-Breathing Vertebrates	599	Reproductive Patterns	657
Focus 18-1 <i>The First Aspiration Pump in the Evolution of Vertebrates</i>	586	Development of the Reproductive System	658
Focus 18-2 <i>Aerodynamic Valves in the Avian Lung</i>	595	The Mature Gonads	661
		Evolution of the Reproductive Passages	667
CHAPTER 19 The Circulatory System	603	Reproductive Hormones	682
Components of the Circulatory System	603	Major Features of Urogenital Evolution	686
Embryonic Development of the Blood Vessels and Heart	607	Focus 21-1 <i>The Descent of the Testes</i>	664
The Circulatory System of Early Fishes	608	Focus 21-2 <i>Squamate Placentation</i>	676
Evolution of the Heart and Arteries	612		
Evolution of the Venous System	623	PART V Conclusion	693
Evolution of the Lymphatic System	627		
Focus 19-1 <i>Evolution of the Aortic Arches</i>	620	CHAPTER 22 Epilogue	694
CHAPTER 20 The Excretory System and Osmoregulation	632	Comparative Anatomy and Homology	694
The Renal Tubules	633	Form and Function: Renaissance in Vertebrate Anatomy	696
Kidney Development and Evolution	636	Evolutionary Innovation and Diversity	700
The Urinary Bladder and Cloaca	639	The Contemporary Role of Comparative Anatomy	701
Excretion and Osmoregulation	641	Glossary	G-1
		Index	I-1
