Contents

Acknowledgments 55
References 55

4. Kinetic Studies of the Yeast His-Asp Phosphorelay Signaling Pathway 59
Alla O. Kaserer, Babak Andi, Paul F. Cook, and Ann H. West

1. Introduction 60
2. Materials and Methods 62
3. Conclusion 73
Acknowledgments 74
References 74

5. Purification of MBP-EnvZ Fusion Proteins Using an Automated System 77
Ricardo Oropeza and Edmundo Calva

1. Introduction 78
2. Comparison Between the Cytoplasmic Domains of E. coli and Typhi EnvZ Proteins 80
3. Purification of the Recombinant MBP Proteins by FPLC 82
4. SDS–PAGE Analysis of Recombinant Expressed MBP-EnvZc Protein 82
5. Results 84
6. Discussion 85
Acknowledgments 85
References 85

Robert B. Bourret, Stephanie A. Thomas, Stephani C. Page, Rachel L. Creager-Allen, Aaron M. Moore, and Ruth E. Silversmith

1. Overview of Response Regulator Autodephosphorylation 90
2. Purification of Response Regulator Proteins 91
3. General Considerations for Autodephosphorylation Assays 92
4. Assay of Autodephosphorylation by Loss of \( ^{32}P \) 94
5. Assay of Autodephosphorylation by Fluorescence 101
6. Assay of Autodephosphorylation by \( P_i \) Release 106
8. Future Prospects 110
Acknowledgments 111
References 111
7. Transmembrane Receptor Chimeras to Probe HAMP Domain Function 115
Jürgen U. Linder and Joachim E. Schultz
1. Introduction 116
2. Design of Chimeras of HAMP Domains Fused to the AC Rv3645 Catalytic Domain 117
3. Choice of Vector and Cloning Strategy 118
4. Expression and Purification of the Chimeras 118
5. AC Assay 120
6. Example of Applications of the Method and Results 120
7. Concluding Remarks 121
Acknowledgment 122
References 122

8. Light-Activated Bacterial LOV-Domain Histidine Kinases 125
Tong-Seung Tseng, Marcus A. Frederickson, Winslow R. Briggs, and Roberto A. Bogomolni
1. Introduction 126
2. Description of Method 127
3. Concluding Remarks and Future Perspectives 132
Acknowledgments 133
References 133

9. Characterization of Bacteriophytochromes from Photosynthetic Bacteria: Histidine Kinase Signaling Triggered by Light and Redox Sensing 135
Eric Giraud, Jérôme Lavergne, and André Verméglio
1. Introduction 136
2. Cloning BphP in Expression Vector 139
3. Overexpression and Purification of BphPs 140
4. Autophosphorylation 141
5. Phosphotransfer 143
6. Gel Mobility Shift Assay and DNase I Footprint 143
7. Gene Disruption 145
8. Analysis of the Photosynthetic Phenotypes of the BphP Mutants 147
9. Photochemical Measurements 138
References 158
10. Biophysical Assays for Protein Interactions in the Wsp Sensory System and Biofilm Formation 161
Nabanita De, Marcos V. A.S. Navarro, Qi Wang, Petya V. Krasteva, and Holger Sondermann

1. Introduction 162
2. Analyses of the Shape and Molecular Weight of Proteins and Protein Complexes 163
3. Experimental Considerations 171
4. Case Studies 174
5. Concluding Remarks 180
Acknowledgments 181
References 181

11. High-Throughput Screening of Bacterial Protein Localization 185
John N. Werner and Zemer Gitai

1. Introduction 186
2. Pipeline Overview 187
3. Construction of a Caulobacter ORFeome 188
4. Construction of the Fluorescently Tagged Protein Library 190
5. Imaging the Caulobacter Protein Localization Library 195
6. Image Scoring and Analysis 197
7. Conclusion 201
Acknowledgments 202
References 203

12. In Vitro and In Vivo Analysis of the ArcB/A Redox Signaling Pathway 205
Adrián F. Alvarez and Dimitris Georgellis

1. Introduction 206
2. In Vitro Characterization of the Arc TCS 208
3. In Vivo Characterization of the Arc TCS 220
4. Conclusions 226
Acknowledgments 226
References 226

13. Potassium Sensing Histidine Kinase in Bacillus subtilis 229
Daniel López, Erin A. Gontang, and Roberto Kolter

1. Introduction 230
2. Screen for Molecules that Stimulate KinC Sensor Kinase 231
3. Quantitative Analysis of the Activation of KinC 236
4. Structural Analysis of KinC 240
5. Monitoring the Signals Using Indirect Measurements 244
6. Applications of the System Signal-Kinase 245
7. Conclusions 248
References 249

14. Two-Component Systems and Regulation of Developmental Progression in *Myxococcus xanthus* 253
Bongsoo Lee, Andreas Schramm, Sakthimala Jagadeesan, and Penelope I. Higgs

1. Introduction 254
2. Generation of In-Frame Deletions or Point Mutations in the *M. xanthus* Genome 257
3. Phenotype Assays for Analysis of *M. xanthus* Development 263
4. Expression Analysis 267
5. *In Vitro* Biochemical Analysis of TCS Proteins 270
Acknowledgment 275
References 275

15. Two-Component Signaling to the Stress MAP Kinase Cascade in Fission Yeast 279
Susumu Morigasaki and Kazuhiro Shiozaki

1. Introduction 280
2. Detection of Protein Interactions in the H$_2$O$_2$ Signaling Pathway 282
3. Detection of Cysteine S-Thiolation in Tdh1 GAPDH 286
Acknowledgments 288
References 288

16. Genetic and Biochemical Analysis of the SLN1 Pathway in *Saccharomyces cerevisiae* 291
Jan S. Fassler and Ann H. West

1. Introduction 292
2. Materials and Methods, 297
Acknowledgments 315
References 315

17. Analysis of Mitogen-Activated Protein Kinase Phosphorylation in Response to Stimulation of Histidine Kinase Signaling Pathways in *Neurospora* 319
Carol A. Jones and Katherine A. Borkovich

1. Introduction 320
2. Growth of Cultures and Exposure to Hyperosmotic Conditions or Fungicide 322
18. Biochemical Characterization of Plant Hormone Cytokinin-Receptor Histidine Kinases Using Microorganisms

Takeshi Mizuno and Takafumi Yamashino

1. Introduction 336
2. Characterization of Plant TCS Components in E. coli 340
3. Protocol for Histidine Kinase Assays in E. coli 343
4. Protocol of Cytokinin-Binding Assay with Intact E. coli Cells 345
5. Preparation of Radioactive Phospho-HPt Factor, and In Vitro Assay of Phosphotransfer to RR 345
6. Characterization of Plant TCS Components in S. cerevisiae 347
7. Protocol of Histidine Kinase Assay in S. cerevisiae 349
8. Protocol of HPt Factor Assay in S. cerevisiae 350

Acknowledgments 351
References 351

19. Characterization of Pseudo-Response Regulators in Plants

Woe-Yeon Kim, Patrice A. Salomé, Sumire Fujiwara, David E. Somers, and C. Robertson McClung

1. The Arabidopsis Circadian Clock 358
2. Detection of PRR Proteins 360
3. Localization of PRR Proteins 364
4. Exploring the Circadian Phenotypes of prr Mutants 367
5. Concluding Remarks 375

Acknowledgments 375
References 375

20. Reversible Histidine Phosphorylation in Mammalian Cells: A Teeter-Totter Formed by Nucleoside Diphosphate Kinase and Protein Histidine Phosphatase 1

Thomas Wieland, Hans-Jörg Hippe, Katrin Ludwig, Xiao-Bo Zhou, Michael Korth, and Susanne Klumpp

1. Introduction 380
2. Analysis of Phosphorylation and Dephosphorylation of Histidine Residues In Vitro 381
