## part I Labor-supply responses to the experiment

---

Introduction	3
1 The labor-supply results of the experiment: a summary	5
<i>Albert Rees</i>	
1. What We Expected to Find	5
2. How We Analyze the Data	15
3. What We Found	22
4. Conclusions	31
References	32
2 Sample, variables, and concepts used in the analysis	33
<i>Harold W. Watts, Dale J. Poirier,     and Charles Mallar</i>	
1. Dimensions of the Sample	33
2. Labor-Force Variables	41
3. Measurement of Nonearned Income	45
4. Variables Measuring Treatment and Time	47
5. Wage and Income Variables for Labor-Supply Models	51
References	56
3 Labor-supply response of husbands	57
<i>Harold W. Watts and David Horner</i>	
1. Summary of the Findings for Husbands	58
2. Analysis Using a Simplified Labor-Supply Model	64
3. Labor-Supply Response Disaggregated by Time and Ethnic Group	77

4. Labor-Supply Responses as Mediated by Earning Capacity	85
5. Conclusions and Interpretations	110
References	113
<b>4 Labor-supply response of wives</b>	<b>115</b>
<i>Glen G. Cain, Walter Nicholson, Charles Mallar, and Judith Wooldridge</i>	
1. Summary of Results	115
2. The Special Importance of the Work Behavior of Married Women	117
3. The Statistical Model: General Considerations	121
4. The Application of the Basic Model: Statistical Results	126
5. Additional Results Using Various Other Samples and Models	154
6. An Interpretation of the Findings	158
References	162
<b>5 The educational and labor-supply responses of young adults in experimental families</b>	<b>163</b>
<i>Charles D. Mallar</i>	
1. Methodological Considerations	165
2. The Educational Response	169
3. The Labor-Supply Response	178
4. Activity Rates and Simultaneous Models	181
5. Conclusions	183
References	184
<b>6 Family labor-supply response in the new jersey experiment</b>	<b>185</b>
<i>Robinson G. Hollister and Charles E. Metcalf</i>	
1. Basic Experimental Response	187
2. Looking for Response Differences among Experimental Plans	197
3. Control Variables for Normal Earnings When Interacted with Experimental Effects	202
4. Differential Response among Individuals, Using Interactions between $\hat{Y}$ and Experimental Variables	212
5. Conclusions	215
Appendix: The Development of Control-based Estimates of Normal Earnings and Normal Hours	216
References	220
<b>7 The effect of negative income tax payments on job turnover and unemployment duration</b>	<b>221</b>
<i>Seymour Spilerman and Richard E. Miller</i>	
1. Preliminary Considerations	224
2. The Effect of the Payments on Job Turnover	230
3. The Effects of the Payments on Duration of Unemployment	239

Appendix A: Construction of the Job Satisfaction Measures	247
Appendix B: Supplementary Tables	249
References	250

## 8 The impact of the experiment on job selection 253

*Seymour Spilerman and Richard E. Miller*

1. Earnings and Status	255
2. Satisfaction	279
3. Conclusions	281
References	283

---

## part II Factors modifying the labor-supply response

---

### Introduction 287

## 9 The effects of health on the supply of and returns to labor 289

*David Elesh and M. J. Lefcowitz*

1. Hypotheses	290
2. Methodological Issues	294
3. Labor Supply of Husbands	303
4. Labor Supply of Wife	309
5. Conclusion	311
Appendix A: Operational Definitions of Variables	312
Appendix B: Supplementary Detailed Tabulations	315
References	319

## 10 Social psychological characteristics and labor-force response of male heads 321

*Sonia Wright*

1. The Culture of Poverty	322
2. Sample and Model	323
3. Results	329
4. Summary and Discussion	335
Appendix A: The Items Making Up the Eight Dimensions Expected to Influence Work Behavior	342
References	345

## 11 Information levels and labor response 347

*Jon Helge Knudsen, John Mamer,  
Robert A. Scott, and Arnold R. Shore*

1. Models of Subjects' Understanding	350
2. Measurement of Information Levels	352

3. Numeric Measurement of Tax Rate and Guarantee Level	354
4. The Choice of Equations and Variables	355
5. Labor-Supply Equations and Information Level	358
6. Equations for Husbands	360
7. Equations for Wives	361
8. Regression of Perceived Parameters on Assigned Parameters and Other Variables	363
9. The Nature of the Reduced Sample	365
10. Conclusion	367
References	368
<b>12 Spline functions and their applications in regression analysis</b>	<b>369</b>
<i>Dale J. Poirier</i>	
1. Linear Splines	370
2. Cubic Splines	372
3. Periodic Cubic Splines	374
4. Bilinear Splines	376
References	381
<b>13 The application of an error components model to experimental panel data</b>	<b>383</b>
<i>Robert Avery and Harold W. Watts</i>	
1. Three-Component Error Components Model	384
2. Parametric Estimates	387
3. Two-Component Model	387
4. Two-Component Model with Missing Data	389
5. Summary	390
References	391
<b>14 The estimation of normal wage rates and normal income</b>	<b>393</b>
<i>Harold W. Watts and Dale Poirier</i>	
1. Specification of Models	395
2. Estimates of the Systematic Components of Wage Rates and Family Income	401
3. Calculation of Individual Deviations	410
References	414
Subject Index	415
