TABLE OF CONTENTS

Foreword by Sir Ieuan Maddock

Preface

	Page
CHAPTER 1: INTRODUCTORY SUMMARY	13
CHAPTER 2: STUDY APPROACH	22
GENERAL COMMENTS	22
SCOPE OF THE STUDY	22
METHODOLOGY	23
STRUCTURE OF THE STUDY	24
CHAPTER 3: TOWARDS THE INFORMATION SOCIETY	25
THE INFORMATION SOCIETY	26
The importance of computing; Information technology;	
The theory of information; Information as a resource	
FUTURE SCENARIO	31
Communications systems; The office; The factory;	
The home	
THE INFORMATION REVOLUTION	39
The industrial revolution; Kondratiev long waves;	
The information revolution	

CHAPTER 4: THE TECHNOLOGY AND FORECASTING	43
THE VALUE OF FORECASTING	44
MICROELECTRONICS	47
Trend pattern; Technical developments; Constant-cost devices; High-performance devices; Low-cost devices; Exotic technology; Conclusions	
STORAGE TECHNOLOGY	54
Hierarchy; Active storage; Fixed storage; Archival storage; Storage systems; Conclusions	
PERIPHERALS	60
Terminals; Printing; Transducers; Interfacing; Conclusions	
COMMUNICATIONS	65
Economies of scale; System organisation; Packet switching; Local networks; Standardisation; Conclusions	
MICROCOMPUTERS	69
Status quo; Development of the microprocessor; The microcomputer as a universal component; The future of the microcomputer; Computer-architectural developments; Conclusions	
LANGUAGES	82
Language developments; Language promulgation; The importance of language	
SOFTWARE TECHNIQUES	88
Operating systems; Software developments; Packages; Conclusions	
COMPUTER ORGANISATION	91
Low-performance versus high-performance technology; The federated computer; The array computer; Arrays of microcomputers; Distributed systems; Conclusions	
TECHNOLOGY DELIVERY	99
Microcomputers; Programming; Programmed products versus programmable products; Software; The price of software; Conclusions	
 CHAPTER 5: THE STRUCTURE OF THE COMPUTING INDUSTRY	 107
CURRENT ORGANISATION OF THE INDUSTRY	107

structure of expenditure; The U.K. situation; Conclusions	
MECHANISMS CONTROLLING STRUCTURE	113
Product monopoly; The U.K. industry	
 CHAPTER 6: THE USES OF INFORMATION	
TECHNOLOGY	117
RESEARCH AND DEVELOPMENT	118
Use in research; Use in development; Conclusions	
MILITARY APPLICATIONS	120
Impact on applications; Balance of power; Conclusions	
DATA PROCESSING	122
The development of data processing; Conclusions	
PLANNING	126
The nature of planning; The tools for planning; Basic data; Conclusions	
CONTROL OF INDUSTRIAL PROCESSES	129
The current status; Future developments; Consequences; Conclusions	
CONSUMER PRODUCTS	133
Development of the market; Mechanical products; Electromechanical products; Electronic products; Information products; Personal computing; The long term; Conclusions	
OFFICE AUTOMATION	142
Principles of text processing; Current status of word processing; The electronic typewriter; The automated office; Electronic mail; The effects on organisation and employment; Conclusions	
ELECTRONIC FUNDS TRANSFER	154
Alternative types of system; Feasibility of EFT; Conclusions	
INFORMATION SERVICES	159
Range of services; Pattern of delivery; Social consequences; Conclusions	
TELECOMMUNICATIONS	163
The current situation; Planned development of the PSTN; Satellite communications; Development of data communications; The role of the BPO; Conclusions	

ARTIFICIAL INTELLIGENCE	176
Semantic models; Inference; Conclusions	
CHAPTER 7: IMPACT OF COMPUTING	179
THE HISTORICAL IMPORTANCE OF COMPUTING	179
CASE HISTORIES	182
Newspapers and computerisation; Cars; Watches;	
Textile machinery; Materials handling	
BARRIERS TO THE USE OF COMPUTING	186
Conclusions	
IMPACT BY INDUSTRIAL SECTOR	189
ECONOMIC ROLE OF THE COMPUTING INDUSTRY	192
Growing pervasiveness of computing; Supply-industry	
size today; The future of the general-purpose	
mainframe; Software functions in future; The future	
implementation house	
ECONOMIC IMPORTANCE OF THE USE OF COMPUTING	194
The economic multiplier provided by computing;	
Computing and industrial economies of scale	
EFFECTS OF EMPLOYMENT	195
Vectors of change — and barriers; Impact on	
assembly; Negative multiplier inside electronic firms;	
Negative multiplier for suppliers to electronic firms;	
Negative impact upstream to such suppliers; Negative	
impact on clerical and administration sector; Relative	
absence of new products; Competitiveness of national	
economies and differential adaptation; Likely pecking	
order of national economies ranked by rate of	
adaptation; Types of labour affected; Skill structure	
of personnel responsible for adaptation	
SOCIAL CONSEQUENCES	201
General levels of unemployment; Differential social	
impact of labour displacement; Feedback to political	
issues; Cumulative, as opposed to sudden, impact;	
Trend towards regulated societies; Political instabilities	
at national level; Japan as a special case	
USE OF COMPUTING IN GOVERNMENT	203
Conclusions	

CHAPTER 8: POLICY PROPOSALS	206
THE ROLE OF THE COMPUTERS, SYSTEMS AND ELECTRONICS REQUIREMENTS BOARD (CSERB) IN GREAT BRITAIN	206
Terms of reference; Computing policy; Conclusions	
AREAS FOR INVESTMENT	209
Support of R & D within GREs; Support of R & D within the computer industry; User-oriented R & D; Support of user R & D; Semiconductor technology; Languages; Monitoring; Standards; Policy and technical advice; Use of computers in government; User support; Conclusions	
THE ORGANISATION OF RESEARCH AND DEVELOPMENT	217
Industrial R & D; Military R & D; Academic R & D; Research associations; Government research establishment R & D; Institute for Information Technology; Conclusions	
THE ROLE OF THE NCC	222
Support of the use of the technology; Relation of the NCC and the proposed Institute of Information Technology; Conclusions	
CHAPTER 9: POLICY IMPLICATIONS	224
SCOPE OF POLICY	224
The scope of the industry; The need for a policy	
INDUSTRY VERSUS USE	226
EFFECTIVE LEVELS OF SUPPORT FOR THE SUPPLY INDUSTRY	228
COMMUNICATIONS	229
EDUCATION	230
SOCIAL POLICY	232
POLICY IMPLEMENTATION	234
GLOSSARY	235
