

NUCLEAR ENERGY AGENCY

NUCLEAR ENERGY AND ITS FUEL CYCLE

PROSPECTS TO 2025

A report by an expert group of
the OECD Nuclear Energy Agency

Inv.-Nr. 5296

I. INTRODUCTION	10
II. SUMMARY OF FINDINGS AND GENERAL CONCLUSIONS	12
A. The Near-Term (Present-day to 1990)	12
B. The Mid-Term (1991-2000)	13
C. The Long-Term (2001-2025)	14
III. SUMMARY	17
A. General	17
B. The Near-Term (1981-1990)	18
C. The Mid-Term (1991-2000)	21
D. The Long-Term (2001-2025)	22
1. Nuclear Power Projections	22
2. Natural Uranium Requirements	23
3. Other Resource Requirements	26
4. Separative Work	26
5. Fuel Fabrication and Reprocessing	26
6. Spent Fuel, Waste and Plutonium Storage	26
IV. NUCLEAR FUEL CYCLE REQUIREMENTS: THE NEAR-TERM (1981-1990)	28
A. Nuclear Power Growth (1981-1990)	28
1. Introduction	28
2. Nuclear Power Growth Estimates for the OECD Area	28
3. Nuclear Power Growth Estimates for the CMEA Area and Yugoslavia	29
4. Nuclear Power Growth Estimates for Countries Outside OECD and CMEA (Developing Countries)	32
5. Total World Nuclear Power Growth Estimates	33
6. Comparison with Past Estimates	33
B. Basis for Computation of Requirements for Nuclear Fuel, Heavy Water, and Associated Services (1981-1990)	33
1. Nuclear Growth Projections and Reactor Distribution	33
2. Computational Arrangements	36
3. Reactor Data	36

C. Nuclear Capacity Expansion Rate: Requirements for Uranium, Thorium, Heavy Water, and Fuel Cycle Services (1981-1990) ...	36
1. Nuclear Capacity Expansion Rate	36
2. Natural Uranium Requirements	38
3. Thorium Requirements	39
4. Heavy Water Requirements	39
5. Separative Work Requirements	40
6. Fuel Fabrication Requirements	40
7. Spent Fuel Arisings	41
8. Requirements for Reprocessing and Spent Fuel Storage ...	41
9. Fissile Plutonium Inventories in the Fuel Cycle	43
10. Remark	44
V. NUCLEAR FUEL CYCLE REQUIREMENTS: THE MID-TERM (1991-2000) AND THE LONG-TERM (2001-2025)	48
A. Nuclear Power Growth Projections (1991-2025)	48
1. Introduction	48
2. Long-Term Projection Methods	48
3. Long-Term Nuclear Power Growth Projections for the OECD Area	49
a) Non-Electric Applications of Nuclear Energy	50
b) Sensitivity Runs	51
c) Results	51
4. Long-Term Nuclear Power Growth Projections for the CMEA Area	51
5. Long-Term Nuclear Power Growth Projections for the Countries Outside OECD and CMEA	60
a) Developing WOCA	61
b) People's Republic of China	62
6. Long-Term WOCA Nuclear Power Growth Projections	62
7. WPNFCR Projections in Context	62
B. Basis for Computation of Requirements for Nuclear Fuel, Heavy Water, and Associated Services (1991-2025)	65
1. Nuclear Growth Projections and Reactor Distribution	65
2. Illustrative Single-Type-Dominated Reactor and Fuel Cycle Strategies	67
a) LWR Once-Through	68
b) LWR with Plutonium Recycle	68
c) Uranium/Plutonium-Fuelled FBR	68
d) HWR Once-Through	69
e) Thorium	69
3. Reprocessing Philosophy	69
4. Computational Arrangements	72
5. Reactor Characteristics and Fuel Cycle Parameters	73

C. Nuclear Capacity Expansion Rate: Requirements for Uranium, Thorium, Heavy Water, and Fuel Cycle Services According to Various Reactor and Fuel Cycle Strategies - The Mid-Term (1991-2000)	73
1. Nuclear Capacity Expansion Rate	73
2. The Viability of the Nuclear Industry	75
3. Natural Uranium Requirements	76
4. Thorium Requirements	77
5. Heavy Water Requirements	77
6. Separative Work Requirements	77
7. Fuel Fabrication Requirements	78
8. Spent Fuel Arisings	78
9. Requirements for Reprocessing and Spent Fuel Storage	78
10. Fissile Plutonium Inventories in the Fuel Cycle	80
11. Remark	81
D. Nuclear Capacity Expansion Rate: Requirements for Uranium, Thorium, Heavy Water, and Fuel Cycle Services According to Various Illustrative Single-Type Reactor and Fuel Cycle Strategies - The Long-Term (2001-2025)	83
1. Introduction	83
2. Nuclear Capacity Expansion Rate	83
3. Natural Uranium Requirements	83
4. Thorium Requirements	91
5. Heavy Water Requirements	92
6. Separative Work Requirements	92
7. Fuel Fabrication Requirements	92
8. Spent Fuel Arisings	94
9. Requirements for Reprocessing and Spent Fuel Storage	96
10. Fissile Plutonium Inventories in the Fuel Cycle	96
11. Uranium-233 Inventories in the Fuel Cycle	96
12. Remark	96
E. Requirements for Uranium According to Various Illustrative Mixed Reactor Strategies - The Long-Term (2001-2025)	103
VI. COMPARISON OF SUPPLIES OF URANIUM, THORIUM, HEAVY WATER, AND FUEL CYCLE SERVICES WITH PROJECTED REQUIREMENTS	110
A. Introduction	110
B. Nuclear Capacity Expansion Rate	110
C. Natural Uranium Requirements	
1. Uranium Resources and Production	111
2. Regional Disparities in Uranium Resources and Requirements	115
3. Summary	117
D. Thorium Resources and Requirements	118
E. Heavy Water Production Capacities and Requirements	118
F. Separative Work Capacities and Requirements	119
G. Fuel Fabrication Capacities and Requirements	124
H. Spent Fuel Arisings and Requirements for Reprocessing and Spent Fuel Storage	124
I. Remark	125

VII. ANNEXES

A. Recapitulation of WPNFCR Questionnaire	131
B. Projection Methods	138
1. The Econometric Approach	138
2. The Adjusted Trend Extrapolation Method	140
C. Nuclear Fuel Cycle Model	143
1. Description of the IAEA Nuclear Fuel Cycle Computer Model: SCENARIOS; Fuel Cycle Parameters	143
2. Reactor Fuelling Characteristics	148
3. Pre-2000 Reactor Distribution Data	160
4. Post-2000 Reactor Distribution Data	171
5. Pre-Reprocessing Schedule Adopted for Computational Purposes	187
D. Results of Nuclear Fuel Cycle Requirements Calculations	188
1. Uranium Requirements	188
2. Separative Work Requirements	201
3. Heavy Water Requirements	209
4. Fuel Fabrication Requirements	211
E. Nuclear Power Programmes in Centrally-Planned Economy Countries	212
1. Council for Mutual Economic Assistance	212
2. People's Republic of China	216
F. Bibliography	217
G. List of Members of Groups Responsible for the Report	219
1. Members of the FCC Working Party on Nuclear Fuel Cycle Requirements (WPNFCR)	219
2. Members of the WPNFCR Computation Sub-Group	221
3. Members of the NEA Committee for Technical and Economic Studies on Nuclear Energy Development and the Fuel Cycle (FCC)	221
H. World Bank Population Projections	224

VIII. APPENDICES

A. Layman's Guide to the Nuclear Fuel Cycle	230
B. List of Abbreviations and Glossary of Terms - English/French Dictionary	239
C. List of Figures	253
D. List of Tables	256
