PRACTICAL NONPARAMETRIC STATISTICS

W. J. CONOVER

ASSOCIATE PROFESSOR
OF STATISTICS AND COMPUTER SCIENCE
KANSAS STATE UNIVERSITY

JOHN WILEY & SONS

New York • Chichester • Brisbane • Toronto

Contents

List of Tables ix

Introduction 1

Chapter 1. Probability Theory 5

1.1. Preliminary Remarks 5
1.2. Counting 6
1.3. Probability 11
1.4. Random Variables 20
1.5. Some Properties of Random Variables 30
1.6. Continuous Random Variables 48

Chapter 2. Statistical Inference 61

2.1. Populations, Samples, and Statistics 61
2.2. Estimation 70
2.3. Hypothesis Testing 76
2.4. Some Properties of Hypothesis Tests 85
2.5. Nonparametric Statistics 93

Chapter 3. Some Tests Based on the Binomial Distribution 95

3.1. The Binomial Test 95
3.2. The Quantile Test 104
3.3. Tolerance Limits 116
3.4. The Sign Test and Some Variations 121

Chapter 4. Contingency Tables 140

4.1. The 2 × 2 Contingency Table 140
4.2. The $r \times c$ Contingency Table 149
4.3. The Median Test 167
4.4. Measures of Dependence 174
4.5. A Goodness of Fit Test 185
4.6. Cochran's Test for Related Observations 195

Chapter 5. The Use of Ranks 203

5.1. The One-Sample or Matched Pairs Case 203
5.2. A Confidence Interval for the Median 215
5.3. Two Independent Samples 223
5.4. A Confidence Interval for the Difference Between Two Means 237
5.5. Measures of Rank Correlation 243
5.6. Several Independent Samples 256
5.7. Several Related Samples 264
5.8. The Balanced Incomplete Block Design 275
5.9. Tests with Efficiency of One or More 281

Chapter 6. Statistics of the Kolmogorov-Smirnov Type 293

6.1. Tests of Goodness of Fit 293
6.2. Tests for Two Independent Samples 308
6.3. Tests for Several Independent Samples 317

Chapter 7. Some Miscellaneous Tests 327

7.1. Some Quick Tests 327
7.2. A Slippage Test for Several Independent Samples 342
7.3. Tests Based on Runs 349
7.4. Fisher's Method of Randomization 357

Appendix: Tables 365
