1. Land information systems – tools for development	1
1.1 The need for land information	1
1.2 The concept of LIS	2
1.3 The need for co-ordination: structure	4
1.4 Parcel-based LIS	7
2. General aspects of land delimitation and documentation.	
Cadastral and land registration	9
2.1 Property rights and land delimitation	9
2.2 Justification for land documentation	11
2.3 The unit of record	13
2.4 Cadastres and legal land registers	15
3. Historical development of structure and function of cadastral and land registration systems	19
3.1 Early development	19
3.2 Development in the non-cadastral countries	22
3.3 Development in the cadastral countries	24
3.4 Different structures	26
4. Cadastral and land registration systems in Europe	29
4.1 Western Europe	29
4.2 Northern Europe	32
4.3 Southern Europe	34
4.4 Eastern Europe	35

4.5	General trends	35
4.6	Some European experiences	37
5.	Land registration in English speaking countries	41
5.1	Land registration in England	41
5.2	Land registration in Australia	44
5.3	Land registration in other English speaking countries	49
5.4	Land registration in the United States	52
6.	Benefits of cadastre and land register for development of rural and urban areas	57
6.1	Rural areas	57
6.2	Urban areas	62
7.	Further benefits of cadastral and land registration systems.	
	Calculating benefits	66
7.1	Improved basis for land assessment and taxation	66
7.2	Administrative benefits	67
7.3	Improving map production	68
7.4	Less litigation and less work for the courts	68
7.5	Easier transactions in land	69
7.6	Establishing a land market	69
7.7	Calculating benefits	70
8.	Feasibility studies for establishing or improving a cadastral and land registration system	73
8.1	Investigation and presentation of basic facts	73
8.2	Analysis of existing problems and benefits of a new or improved system	76
8.3	Pilot studies	76
8.4	Cost estimates	77
8.5	Definition of principal goals	78
8.6	Choice of principal methods	80
8.7	Priorities and selection of areas	82
8.8	Definition of legal measures	83
9.	Cadastral surveying	88
9.1	Surveying	88
9.2	Demarcation	98
10.	Adjudication	101
10.1	The legal role of adjudication	101
10.2	Different forms of adjudication	102
10.3	Adjudication by conversion of existing registers	104
10.4	The process of systematic adjudication	105
11.	Registration	112
11.1	The content of the register	112

11.2	Form of the register	114
11.3	Maintenance of the register	118
12.	Special problems	123
12.1	Individual or group registration?	123
12.2	Combined consolidation-registration	127
12.3	Squatter rights	128
13.	Organization, automation, education	132
13.1	Organizational structure	132
13.2	Automation	134
13.3	Training and education	142
14.	Progressive systems: ways of simplification	145
14.1	Progressive systems	145
14.2	Reduction of functions	146
14.3	Block units	147
14.4	Limited boundary delimitation	148
14.5	Simplified survey	150
14.6	Minimized field work	150
14.7	Provisional registers	150
14.8	Selectivity	151
14.9	Axes of variation	152
	<i>Summary</i>	154
	<i>Appendix A: Land unit identifier</i>	157
	<i>Appendix B: Two examples of automation: Sweden and Canada</i>	161
	<i>References and bibliography</i>	168
	<i>Index</i>	173
