

Horst Friebolin

Basic One- and Two- Dimensional NMR Spectroscopy

Contents

1	The Physical Basis of NMR Spectroscopy	1
1.1	Introduction	1
1.2	Nuclear Angular Momentum and Magnetic Moment	2
1.3	Nuclei in a Static Magnetic Field	3
1.3.1	Directional Quantization	3
1.3.2	Energy of the Nuclei in the Magnetic Field	4
1.3.3	Populations of the Energy Levels	5
1.3.4	The Macroscopic Magnetization	6
1.4	Basic Principles of the NMR Experiment	6
1.4.1	The Resonance Condition	6
1.4.2	The CW Spectrometer	8
1.5	The Pulsed NMR Method	9
1.5.1	The Pulse	9
1.5.2	Classical Description of the Pulse Experiment	10
1.5.2.1	Pulse Angle	10
1.5.2.2	Relaxation	13
1.5.2.3	The Time and Frequency Domains; the Fourier Transformation	14
1.5.2.4	Spectrum Accumulation	16
1.5.3	The Pulsed NMR Spectrometer	17
1.6	Spectral Parameters: a Brief Survey	19
1.6.1	The Chemical Shift	19
1.6.1.1	Nuclear Shielding	19
1.6.1.2	Reference Compounds and the δ -Scale	21
1.6.2	Spin-Spin Coupling	23
1.6.2.1	The Indirect Spin-Spin Coupling	23
1.6.2.2	Coupling to One Neighboring Nucleus (AX Spin System)	24
1.6.2.3	Coupling to Two Equivalent Neighboring Nuclei (AX ₂ Spin System)	26
1.6.2.4	Coupling to Three or More Equivalent Neighboring Nuclei (AX _n Spin System)	27
1.6.2.5	Multiplicity Rules	27
1.6.2.6	Couplings between Three Non-equivalent Nuclei (AMX Spin System)	28
1.6.2.7	Couplings between Equivalent Nuclei (A _n -Spin Systems)	29
1.6.2.8	The Order of a Spectrum	30

1.6.2.9	Couplings between Protons and other Nuclei; ¹³ C Satellite Spectra	30
1.6.3	The Intensities of the Resonance Signals	31
1.6.3.1	¹ H Signal Intensities	31
1.6.3.2	¹³ C Signal Intensities	32
1.6.4	Summary	34
1.7	Bibliography for Chapter 1	35
2	The Chemical Shift	37
2.1	Introduction	37
2.1.1	Influence of the Charge Density on the Shielding	38
2.1.2	Effects of Neighboring Groups	40
2.1.2.1	Magnetic Anisotropy of Neighboring Groups ..	41
2.1.2.2	Ring Current Effects	43
2.1.2.3	Electric Field Effects	44
2.1.2.4	Intermolecular Interactions – Hydrogen Bonding and Solvent Effects	44
2.1.2.5	Isotope Effects	45
2.1.3	Summary	46
2.2	¹H Chemical Shifts of Organic Compounds ..	47
2.2.1	Alkanes and Cycloalkanes	47
2.2.2	Alkenes	49
2.2.3	Arenes	50
2.2.4	Alkynes	51
2.2.5	Aldehydes	52
2.2.6	OH, SH, NH	53
2.3	¹³C Chemical Shifts of Organic Compounds ..	54
2.3.1	Alkanes and Cycloalkanes	55
2.3.2	Alkenes	57
2.3.3	Arenes	58
2.3.4	Alkynes	60
2.3.5	Allenenes	60
2.3.6	Carbonyl and Carboxy Compounds	60
2.3.6.1	Aldehydes and Ketones	61
2.3.6.2	Carboxylic Acids and Derivatives	62
2.4	Relationships between the Spectrum and the Molecular Structure	64
2.4.1	Equivalence, Symmetry and Chirality	64
2.4.2	Homotopic, Enantiotopic and Diastereotopic Groups	68
2.4.3	Summary	71
2.5	Bibliography for Chapter 2	72
3	Indirect Spin-Spin Coupling	73
3.1	Introduction	73
3.2	H,H Coupling Constants and Chemical Structure	75
3.2.1	Geminal Couplings ² J(H,H)	75

3.2.1.1	Dependence on Bond Angle	75
3.2.1.2	Substituent Effects	76
3.2.1.3	Effects of Neighboring π -Electrons	76
3.2.2	Vicinal Couplings $^3J(\text{H,H})$	77
3.2.2.1	Dependence on the Dihedral Angle	78
3.2.2.2	Substituent Effects	81
3.2.3	H,H Couplings in Aromatic Compounds	83
3.2.4	Long-range Couplings	84
3.3	C,H Coupling Constants and Chemical Structure	85
3.3.1	C,H Couplings through One Bond $^1J(\text{C,H})$..	85
3.3.1.1	Dependence on the s-Fraction	85
3.3.1.2	Substituent Effects	85
3.3.2	C,H Couplings through Two or More Bonds .	86
3.3.2.1	Geminal Couplings (i. e. $^2J(\text{C,H})$ in $\text{H-C-}^{13}\text{C}$)	86
3.3.2.2	Vicinal Couplings (i. e. $^3J(\text{C,H})$ in $\text{H-C-C-}^{13}\text{C}$)	87
3.3.2.3	Long-range Couplings $^{3+n}J(\text{C,H})$	87
3.3.3	C,H Couplings in Benzene Derivatives	87
3.4	C,C Coupling Constants and Chemical Structure	88
3.5	Correlations between C,H and H,H Coupling Constants	89
3.6	Coupling Mechanisms	90
3.6.1	The Electron-Nuclear Interaction	90
3.6.2	H,D Couplings	92
3.6.3	Relationship between the Coupling and the Lifetime of a Spin State	93
3.6.4	Couplings through Space	94
3.7	Bibliography for Chapter 3	94
4	Spectrum Analysis and Calculations	95
4.1	Introduction	95
4.2	Nomenclature	97
4.2.1	Systematic Notation for Spin Systems	97
4.2.2	Chemical and Magnetic Equivalence	98
4.3	Two-Spin Systems	100
4.3.1	The AX Spin System	100
4.3.2	The AB Spin System	102
4.4	Three-Spin Systems	104
4.4.1	The AX ₂ , AK ₂ , AB ₂ and A ₃ Spin Systems ...	104
4.4.2	The ABX Spin System	105
4.5	Four-Spin Systems	107
4.5.1	A ₂ X ₂ and A ₂ B ₂ Spin Systems	107
4.5.2	The AA'XX' and AA'BB' Spin Systems	107
4.6	Spectrum Simulation and Iteration	109
4.7	Analysis of ^{13}C NMR Spectra	110
4.8	Bibliography for Chapter 4	111

5	Double Resonance Experiments	113
5.1	Introduction	113
5.2	Spin Decoupling in ^1H NMR Spectroscopy	114
5.2.1	Simplification of Spectra	114
5.2.2	Suppression of a Solvent Signal	116
5.3	Spin Decoupling in ^{13}C NMR Spectroscopy	117
5.3.1	^1H Broad-band Decoupling	117
5.3.2	The Gated Decoupling Experiment	118
5.3.3	^1H Off-Resonance Decoupling	120
5.3.4	Selective Decoupling	123
5.3.5	Summary of $^{13}\text{C}\{^1\text{H}\}$ Decoupling Experiments	117
5.4	Bibliography for Chapter 5	
6	Assignment of ^1H and ^{13}C Signals	125
6.1	Introduction	125
6.2	^1H NMR Spectroscopy	126
6.2.1	Defining the Problem	126
6.2.2	Empirical Correlations for Predicting Chemical Shifts	127
6.2.2.1	Alkanes (Shoolery's Rule)	127
6.2.2.2	Alkenes	128
6.2.2.3	Benzene Derivatives	129
6.2.3	Decoupling Experiments	131
6.2.4	Effects of Solvent and Temperature	131
6.2.5	Altering the Chemical Structure of the Sample	132
6.3	^{13}C NMR Spectroscopy	133
6.3.1	Defining the Problem	133
6.3.2	Empirical Correlations for Predicting Approximate Chemical Shifts	134
6.3.2.1	Alkanes	134
6.3.2.2	Alkenes	137
6.3.2.3	Benzene Derivatives	139
6.3.3	Decoupling Experiments	140
6.3.4	T_1 Measurements	140
6.3.5	Solvent and Temperature Effects and Shifts Reagents	140
6.3.6	Chemical Changes to the Sample	141
6.4	Computer-aided Assignment of ^{13}C NMR Spectra	142
6.4.1	Searching for Identical or Related Compounds	142
6.4.2	Spectrum Prediction	143
6.5	Bibliography for Chapter 6	145
7	Relaxation	147
7.1	Introduction	147
7.2	Spin-Lattice Relaxation of ^{13}C Nuclei (T_1)	148
7.2.1	Relaxation Mechanisms	148
7.2.2	Experimental Determination of T_1	150

7.2.3	Relationships between T_1 and Chemical Structure	154
7.2.3.1	Influence of Protons in CH, CH ₂ and CH ₃ Groups	154
7.2.3.2	Influence of Molecular Size	155
7.2.3.3	Segmental Mobilities	156
7.2.3.4	Anisotropy of the Molecular Mobility	156
7.2.4	Suppression of the Water Signal	157
7.3	Spin-Spin Relaxation (T_2)	157
7.3.1	Relaxation Mechanisms	157
7.3.2	Experimental Determination of T_2	159
7.3.3	Line-widths of NMR Signals	163
7.4	Bibliography for Chapter 7	165
8	One-Dimensional NMR Experiments using Complex Pulse Sequences	167
8.1	Introduction	167
8.2	Simple Pulse Experiments	168
8.2.1	The Effect of the Pulse on the Longitudinal Magnetization (M_z)	169
8.2.2	The Effect of the Pulse on the Transverse Magnetization Components ($M_{x'}$, $M_{y'}$)	170
8.3	The J-Modulated Spin-Echo Experiment	173
8.4	Signal Enhancement by Polarization Transfer	182
8.4.1	The SPI Experiment	182
8.4.2	The INEPT Experiment	184
8.5	The DEPT Experiment	192
8.6	The One-Dimensional INADEQUATE Experiment	197
8.7	Bibliography for Chapter 8	202
9	Two-Dimensional NMR Spectroscopy	203
9.1	Introduction	203
9.2	The Two-Dimensional NMR Experiment	204
9.2.1	Preparation, Evolution and Mixing, Data Acquisition	204
9.2.2	Graphical Representation	208
9.3	Two-Dimensional J-Resolved NMR Spectroscopy	209
9.3.1	Heteronuclear Two-Dimensional J -Resolved ¹³ C NMR Spectroscopy	209
9.3.2	Homonuclear Two-Dimensional J -Resolved ¹ H NMR Spectroscopy	213
9.4	Two-Dimensional Correlated NMR Spectroscopy	218
9.4.1	Two-Dimensional Heteronuclear (H,C)-Correlated NMR Spectroscopy (H,C-COSY)	219

9.4.2	Two-Dimensional Homonuclear (H,H)-Correlated NMR Spectroscopy (H,H-COSY)	228
9.4.3	Two-Dimensional Relayed NMR Spectroscopy	234
9.4.3.1	The H-Relayed (H,C)-COSY Experiment ...	235
9.4.3.2	The H-Relayed (H,H)-COSY Experiment ...	238
9.4.4	Two-Dimensional Exchange NMR Spectroscopy	240
9.5	The Two-Dimensional INADEQUATE Experiment	241
9.6	Summary of Chapters 8 and 9	246
9.7	Bibliography for Chapter 9	249
10	The Nuclear Overhauser Effect	251
10.1	Introduction	251
10.2	Theoretical Background	252
10.2.1	The Two-Spin System	252
10.2.2	Enhancement Factors	255
10.2.3	Multi-Spin Systems	256
10.3	Applications	257
10.4	Experimental Aspects	260
10.5	Bibliography for Chapter 10	262
11	Dynamic NMR Spectroscopy (DNMR)...	263
11.1	Introduction	263
11.2	Quantitative Calculations	267
11.2.1	Complete Line-shape Analysis	267
11.2.2	The Coalescence Temperature T_C and the Corresponding Rate Constant k_C	269
11.2.3	Activation Parameters	270
11.2.3.1	The Arrhenius Activation Energy E_A	270
11.2.3.2	The Free Enthalpy of Activation $\Delta G^\ddagger$	271
11.2.3.3	Estimating the Limits of Error	272
11.2.4	Rate Constants in Reactions with Intermediate Stages	273
11.2.5	Intermolecular Exchange Processes	274
11.3	Applications	275
11.3.1	Rotation about CC Single Bonds	275
11.3.1.1	C(sp ³)-C(sp ³) Bonds	276
11.3.1.2	C(sp ²)-C(sp ³) Bonds	276
11.3.1.3	C(sp ²)-C(sp ²) Bonds	277
11.3.2	Rotation about a Partial Double Bond	277
11.3.3	Inversion at Nitrogen and Phosphorus Atoms	279
11.3.4	Ring Inversion	280
11.3.5	Valence Tautomerism	283
11.3.6	Keto-Enol Tautomerism	284
11.3.7	Intermolecular Proton Exchange	285
11.3.8	Reactions and Equilibration Processes	286
11.4	Bibliography for Chapter 11	289

12	Shift Reagents	293
12.1	Lanthanide Shift Reagents (LSRs)	293
12.1.1	Fundamentals	293
12.1.2	Applications and Quantitative Interpretation	295
12.2	Chiral Lanthanide Shift Reagents	298
12.3	Chiral Solvents	300
12.4	Bibliography for Chapter 12	303
13	Macromolecules	305
13.1	Introduction	305
13.2	Synthetic Polymers	306
13.2.1	The Tacticity of Polymers	306
13.2.2	Polymerization of Dienes	309
13.2.3	Copolymers	310
13.3	Bibliography for Chapter 13	311
14	NMR Spectroscopy in Biochemistry and Medicine	313
14.1	Introduction	313
14.2	Elucidating Reaction Pathways in Biochemistry	314
14.2.1	Syntheses using Singly ¹³ C-Labeled-Precursors	314
14.2.1.1	Low Levels of ¹³ C Enrichment	314
14.2.1.2	High Levels of ¹³ C Enrichment	316
14.2.2	Syntheses using Doubly ¹³ C-Labeled Precursors	317
14.3	High-Resolution <i>in vivo</i> NMR Spectroscopy ..	319
14.3.1	The Problem and its Solution	319
14.3.2	³¹ P NMR Experiments	320
14.3.3	¹ H and ¹³ C NMR Experiments	323
14.4	Magnetic Resonance Tomography	324
14.4.1	Basic Principles and Experimental Considerations	324
14.4.2	Applications	326
14.5	Bibliography for Chapter 14	330
	Subject Index	333
	Index of Compounds	341
