Sachgebiete: _____
Standort: _____

contents

1. Introduction	1
A. Techniques in Logic	3
2. Recursion	5
2.1 Parameter tracking	6
2.2 Algorithm structure	6
2.3 Tracking order	8
2.4 Stack memory	8

2.5 Algorithm examples	9
2.5.1 Factorial example	9
2.5.2 Permutation example	13
2.6 Summary	16
2.7 Exercises	17
3. Polish strings	18
3.1 Standard expression form	19
3.2 Polish form	21
3.3 Polish evaluation algorithm	24
3.4 Summary	30
3.5 Exercises	30
4. Syntax directed methods	32
4.1 Diagramming	33
4.2 Formal syntax definition	35
4.2.1 Order	36
4.2.2 Combination	36
4.2.3 Recursion	37
4.2.4 Common phrases	37
4.3 Automatic parsing	38
4.3.1 Bottom to top parsing	38
4.3.2 Top to bottom parsing	40
4.3.3 Computer based parsing	41
4.4 Syntax problems in automatic parsing	44
4.4.1 Ordering of alternatives	45
4.4.2 Circular definitions	45
4.5 Summary	46
4.6 Exercises	46
5. Programming languages	48
5.1 Symbol declaration	49
5.2 Constant declaration	52
5.3 Expression declaration	53

5.4 Expression conversion to Polish form	60
5.4.1 Syntax considerations	62
5.4.2 Infix to Polish algorithm	63
5.4.3 Parenthetical expressions	66
5.4.4 Addition of operators	67
5.5 Coded format	73
5.6 Coding a complete language	77
5.7 Summary	81
5.8 Exercises	82
6. Syntax driven algorithms	83
6.1 Syntax tables	84
6.2 Syntax driver	85
6.3 Text processing	90
6.4 Repeat processing	90
6.5 Coded conversion processing	91
6.6 Summary	97
6.7 Exercises	97
B. Techniques in Data Management	99
7. Data presentation	101
7.1 Tables	102
7.2 Lists	102
7.3 Logical structure	103
7.4 Maintenance	105
7.4.1 Insertion	105
7.4.2 Deletion	105
7.4.3 Storage efficiency	108
7.5 Summary	111
7.6 Exercises	111

8. Search structures	112
8.1 Choosing a search structure	113
8.2 Linear search	113
8.2.1 Data structure	114
8.2.2 Search mechanism	114
8.2.3 Insert mechanism	114
8.2.4 Delete mechanism	115
8.3 Binary search	116
8.3.1 Data structure	116
8.3.2 Search mechanism	116
8.3.3 Insert mechanism	118
8.3.4 Delete mechanism	120
8.4 Unbalanced tree search	121
8.4.1 Data structure	121
8.4.2 Search mechanism	122
8.4.3 Insert mechanism	125
8.4.4 Delete mechanism	126
8.5 Balanced tree search	127
8.5.1 Data structure	127
8.5.2 Search mechanism	130
8.5.3 Insert mechanism	130
8.5.4 Mathematical notation	132
8.5.5 Assignment notation	133
8.5.6 Balance algorithm	134
8.5.7 Insert timing	141
8.5.8 Delete mechanism	141
8.5.9 Delete timing	143
8.5.10 Mathematical notation for the balance after delete algorithm	144
8.5.11 Mathematical algorithms	144
8.6 Hash total search	151
8.7 Summary	154
8.8 Exercises	156
C. System Application	159
9. Definition of a sample compiler system	161
9.1 Program variables	162

9.2 Program expressions	162
9.2.1 Operator priorities	163
9.2.2 Parenthetical usage	164
9.3 Functions	164
9.4 Statements	165
9.4.1 Assignment statement	165
9.4.2 GO TO statement	165
9.4.3 DO statements	166
9.4.4 Input/output statements	169
9.4.5 IF clause	170
9.5 Program example	171
9.6 System syntax	173
9.7 Programmer interaction	174
9.8 Summary	174
10. Elements of design	176
10.1 Task segmentation	176
10.1.1 Logically complete segments	177
10.1.2 Segment delineation	178
10.2 Development plan	179
10.2.1 Manpower allocation	179
10.2.2 Implementation	179
10.2.3 System modularity	180
10.3 Summary	180
10.4 Exercises	180
11. Sample system design	182
11.1 Processing philosophy	182
11.1.1 Direct approach	183
11.1.2 Interpretive approach	183
11.1.3 Choosing an approach	184
11.2 Phase structure	185
11.3 Phase delineation	185
11.3.1 Parsed statement formats	186
11.3.2 Block chart	190
11.4 Parsing phase	191
11.4.1 Acceptance module	192

11.4.2 Parser module	192
11.4.3 Control	193
11.5 Interpretive phase	194
11.5.1 Interpreter module	194
11.5.2 Function module	194
11.5.3 Control	195
11.6 System block chart	196
11.7 Summary	198
11.8 Exercises	198
12. Sample system implementation	199
12.1 Parsing phase	200
12.1.1 Control module	200
12.1.2 Acceptance module	201
12.1.3 Parser module	201
12.2 Interpretive phase	223
12.2.1 Control module	224
12.2.2 Function module	224
12.2.3 Interpreter module	225
12.2.4 Driver subroutine	226
12.2.5 Statement subroutines	229
12.2.6 Expression subroutine	233
12.2.7 Summary	253
12.3 System summary	253
12.4 Exercises	253
13. Summary	255
Answers to exercises	259
Index	271
