Contents

Introduction to the Series v
Preface ix
List of Tables xvii

Chapter 1. Overview of the Model

1. Introduction 1
2. Bloc structure and principal features of the model 3
3. The production and factor demand functions 11
4. Effective inputs and production in the short run 12
5. Potential and full-employment output 17
6. Costs and prices 19
7. Plan of the book 20

Appendix to Chapter 1–Description of variables 21

Chapter 2. Aggregate Demand

1. Introduction 37
2. Consumer goods and services 38
   2.1. Estimated equations: Personal consumption expenditures
3. Business investment 42
   3.1. Business fixed investment
   3.2. Inventory investment
   3.3. Estimated equations: Business investment
4. Residential construction 46
   4.1. The rent and household equations
   4.2. The residential construction equations
   4.3. Estimated equations: Housing and residential construction
5. Government purchases of goods and services 56
   5.1. Estimated equations: Government purchases of goods and services
6. Foreign trade 58
   6.1. Estimated equations: Foreign trade

Chapter 3. Factor Inputs and Production

1. Introduction 61
2. Labor demand 61
2.1. Estimated equations: Labor input
3. Production 63
3.1. Output identities and analytical ratios and growth rates

Chapter 4. Labor Supply and Potential Output

1. Introduction 67
2. Labor force and hours per worker 68
2.1. Estimated equations: Labor force and hours per worker
3. Labor supply at full employment 75
4. Capacity, full-employment, and potential output, and their utilization rates 79
4.1. Estimated equations: Full-employment man-hours and utilization rates

Chapter 5. Money, Wages and Prices

1. Introduction 87
2. The monetary sector 88
2.1. The term structure model
2.2. Estimated equations: Money and interest rates
3. Wages 98
3.1. Estimated equations: Money wage rate
4. Prices 104
4.1. Rental price of capital
4.2. Estimated equations: Prices

Chapter 6. Income and Taxes

1. Introduction 113
2. Income 114
2.1. Estimated equations: Income
3. Taxes and transfers 118
3.1. Estimated equations: Taxes and transfers

Chapter 7. Prediction Errors in Dynamic Simulations

1. Introduction 129
2. Errors in dynamic simulations 129
   2.1. Role of inventory investment
   2.2. Errors in predicting annual changes
3. Forecast horizon and error cumulation 135
4. Concluding observations 138

Chapter 8. Post-war Policy Simulations

1. Introduction 141
2. Nature of the simulations 142
3. Policy multipliers for 1951–66 146
   3.1. Budgetary impacts of alternative policies
4. Real multipliers and spending propensities, 1951–66 154
   4.1. The expenditure multipliers
   4.2. The personal tax multipliers
   4.3. The investment tax credit multipliers
5. Capacity multipliers, 1951–66 171
6. Summary and conclusions 175

Chapter 9. Dynamic Properties of the Model

1. Introduction 179
2. Dynamic interactions of components of aggregate demand and monetary factors 180
3. Pre-war and post-war multipliers 187

Chapter 10. Constant or Increasing Returns to Scale?

1. Introduction 199
2. Comparison of errors in dynamic simulations 199
3. Comparison of dynamic multipliers 204

Chapter 11. Summary and Concluding Observations

1. Introduction 209
2. Contributions on specific topics 209

3. Policy multipliers and dynamic properties of the model 212
4. Potential applications and improvements 215

Appendix A. National Income and Product Estimates, 1922–28

1. Introduction 219
2. Gross national product 220
   2.1. Personal consumption expenditures
   2.2 Non-residential fixed investment
   2.3. Residential structures
   2.4. Change in business inventories
   2.5. Net exports
   2.6. Government purchases of goods and services
   2.7. Private gross national product
   2.8. Housing rent
   2.9. Private gross non-residential product
3. National income 224
   3.1. Compensation of employees
   3.2. Proprietors' income
   3.3. Rental income of persons
   3.4. Corporate profits and inventory valuation adjustment
   3.5. Net interest
4. Relation of gross national product, national income and personal income 226
   4.1. Gross national product
   4.2. Capital consumption allowances
   4.3. Indirect business tax and non-tax liability
   4.4. Business transfer payments
   4.5. Statistical discrepancy
   4.6. Subsidies less current surplus of government enterprises
   4.7. National income
   4.8. Corporate profits and IVA
   4.9. Contributions for social insurance, government transfer payments, and net interest paid by government
   4.10. Dividends
   4.11. Interest paid by consumers
5. Personal income and its disposition 228
   5.1. Personal income
   5.2. Personal tax and non-tax payments
   5.3. Personal consumption expenditures
   5.4. Interest paid by consumers
   5.5. Personal transfer payments to foreigners
   5.6. Personal saving
6. Implicit price deflators 230

Appendix B. Explanatory Notes on Labor Income and its Measurement

1. Measurement of private labor income 233
2. Measurement of private wage rate 234

Appendix C. New Estimates of Labor Force and Unemployment, 1922–40 237

Appendix D. Estimates of the Utilization Rates

1. Four measures of resource utilization 241
2. Alternative measures of capacity utilization 244
3. Alternative measures of potential utilization 246
4. Summary 250

Appendix E. Sources and Methods for Data on Household Formation, Housing Starts and Housing Stocks

1. Introduction 251
2. Investment 251
3. Non-farm residential wealth–value stock 252
4. Housing starts and completions 252
5. Households 254
6. Stock of non-farm dwelling units 256
   - 6.1. Benchmarks
   - 6.2. 1919–29 stock
   - 6.3. 1929–40 stock
   - 6.4. 1948–55 stock
   - 6.5. 1955–69 stock
7. Sources 261

Appendix F. Derivation of the Standardized Household Variable

1. Introduction 263
2. Farm population 264
   - 2.1. Census years
   - 2.2. Intercensal years
3. Non-farm population 272

4. Headship rates 272
5. Standardized household variable 273
6. Sources 274
