CONTENTS

	Page
Preface	iii
Acknowledgements	v
1. WASTEWATER CHARACTERISTICS AND EFFLUENT QUALITY PARAMETERS	1
1.1 Introduction	1
1.2 Characteristics of Wastewaters	2
1.3 Quality Parameters of Importance in Agricultural Use of Wastewaters	5
1.3.1 Parameters of health significance	5
1.3.2 Parameters of agricultural significance	9
2. WASTEWATER QUALITY GUIDELINES FOR AGRICULTURAL USE	13
2.1 Introduction	13
2.2 Human Exposure Control	13
2.3 Effluent Quality Guidelines for Health Protection	14
2.4 Water Quality Guidelines for Maximum Crop Production	15
2.5 Health Protection Measures in Aquacultural Use of Wastewater	18
2.5.1 Special concerns in aquacultural use of human wastes	18
2.5.2 Quality guidelines for health protection in using human wastes for aquaculture	19
3. WASTEWATER TREATMENT	21
3.1 The Problem	21
3.2 Conventional Wastewater Treatment Processes	22
3.2.1 Preliminary treatment	22
3.2.2 Primary treatment	23
3.2.3 Secondary treatment	24
3.2.4 Tertiary and/or advanced treatment	27
3.2.5 Disinfection	29
3.2.6 Effluent storage	29
3.2.7 Reliability of conventional and advanced wastewater treatment	30
3.3 Natural Biological Treatment Systems	31
3.3.1 Wastewater stabilization ponds	31
3.3.2 Overland treatment of wastewater	38
3.3.3 Macrophyte treatment	39
3.3.4 Nutrient film technique	41

	Page
4. AQUIFER RECHARGE WITH WASTEWATER	43
4.1 Principles	43
4.1.1 Soil-aquifer treatment (SAT)	43
4.1.2 SAT system layouts	43
4.1.3 Soil requirements	45
4.2 Operations	45
4.2.1 Hydraulic capacity and evaporation	45
4.2.2 Basin management	46
4.2.3 Pretreatment	47
4.3 Effects	47
4.3.1 Suspended solids	47
4.3.2 Organic compounds	47
4.3.3 Bacteria and viruses	48
4.3.4 Nitrogen	49
4.3.5 Phosphorus	49
4.3.6 Trace elements and salts	50
5. IRRIGATION WITH WASTEWATER	51
5.1 Conditions for Successful Irrigation	51
5.1.1 Amount of water to be applied	51
5.1.2 Quality of water to be applied	51
5.1.3 Scheduling of irrigation	52
5.1.4 Irrigation methods	53
5.1.5 Leaching	53
5.1.6 Drainage	55
5.2 Strategies for Managing Treated Wastewater on the Farm	55
5.3 Crop Selection	56
5.3.1 To overcome salinity hazards	56
5.3.2 To overcome toxicity hazards	60
5.3.3 To prevent health hazards	60
5.4 Selection of Irrigation Methods	64
5.5 Field Management Practices in Wastewater Irrigation	67
5.5.1 Water management	67
5.5.2 Land and soil management	70
5.5.3 Crop management and cultural practices	71

	Page
5.6 Planning for Wastewater Irrigation	72
5.6.1 Central planning	72
5.6.2 Desirable site characteristics	74
5.6.3 Crop selection issues	75
6. AGRICULTURAL USE OF SEWAGE SLUDGE	76
6.1 Characteristic of Sewage Sludge	76
6.2 Sludge Treatment	77
6.3 Sludge Application	78
6.4 Effects of Sludge on Soils and Crops	80
6.5 Planting, Grazing and Harvesting Constraints	80
6.6 Environmental Protection	81
7. WASTEWATER USE IN AQUACULTURE	82
7.1 Biota in Aquaculture Ponds	82
7.1.1 Food chains	82
7.1.2 Fish species	82
7.1.3 Aquatic plants	83
7.2 Technical Aspects of Fish Culture	83
7.2.1 Environmental factors	83
7.2.2 Fish yields and population management	85
7.2.3 Health related aspects of fish culture	86
8. ECONOMIC, INSTITUTIONAL AND POLICY ISSUES	88
8.1 Economic and Financial Implications	88
8.2 Institutional Organization	89
8.3 Policy Issues	89
9. WASTEWATER USE CASE STUDIES	91
9.1 Advanced Wastewater Treatment: California, USA	91
9.1.1 Reclaimed wastewater uses	91
9.1.2 Wastewater reclamation criteria	91
9.1.3 Wastewater treatment	93
9.1.4 Monterey wastewater reclamation study for agriculture	93
9.2 Wastewater Treatment in Stabilization Ponds: Al Samra, Jordan	96
9.2.1 Septage pretreatment and wastewater transmission	96

	Page
9.2.2 Al Samra stabilization ponds	97
9.2.3 Performance of Al Samra stabilization ponds	98
9.3 Soil-aquifer Treatment: Arizona, USA	100
9.3.1 Project details	100
9.3.2 Quality improvements	102
9.4 Wastewater Treatment and Crop Restriction: Tunisia	107
9.4.1 Current and future use of wastewaters in Tunisia	107
9.4.2 Studies of treated wastewater irrigation and sewage sludge application	109
9.4.3 Legislation	110
9.5 Wastewater Treatment and Human Exposure Control: Kuwait	111
9.5.1 Background to treated effluent use in Kuwait	111
9.5.2 Master plan for effluent utilization	111
9.5.3 Project outputs and controls	113
9.6 Crop Restriction for Wastewater Irrigation: Mexico	114
9.6.1 Historical use of sewage for irrigation	114
9.6.2 Mezquital Valley irrigation district 03 experience	114
9.6.3 Health impacts	117
9.7 Wastewater Use in Aquaculture: Calcutta, India	117
9.7.1 The Calcutta system	117
9.7.2 Health impacts	118
