|--|-----|
| PREFACE | vii |
| 1. THE MODEL IN SCIENCE | 1 |
| The model in history | 1 |
| The scientific method | 4 |
| The model and the objective function | 11 |
| Inductive and deductive models | 14 |
| Pattern recognition | 14 |
| 2. INFLUENCES ON THE DECISION-TAKER | 18 |
| Pressures on the system | 18 |
| Pressures on the individual | 20 |
| Objectives, goals and criteria | 22 |
| Self-generated conflict | 24 |
| Conflict in a simple linear programming case | 27 |
| 3. CAUSE-EFFECT STRUCTURES | 36 |
| Classification of variables | 36 |
| Generalized structure | 37 |
| An example of structure | 38 |
| 4. CLASSIFICATION OF MODELS | 42 |
| Why classify? | 42 |
| Seven basic structures | 42 |
| Ackoff-Sasieni classification | 50 |
| A further classification | 58 |
| How is it done? | 61 |
| 5. ACCOUNTING DATA | 64 |
| 6. INVESTMENT CHOICE | 73 |
| Simple investment models | 73 |
| Introduction of probability | 76 |

| | |
|---|-----|
| 7. SEQUENCED DECISIONS | 81 |
| Decision trees | 81 |
| Some criticisms | 83 |
| 8. UTILITY THEORY | 87 |
| A paradox | 92 |
| The Von Neumann and Morganstern axioms | 95 |
| Discussion of the axioms | 96 |
| Utilities and gambles | 100 |
| 9. COMPETITIVE PROBLEMS | 103 |
| The area of competition | 103 |
| The market | 104 |
| Method of approach | 105 |
| Heterogeneous response | 107 |
| Quality of advertising | 109 |
| Promotional activity | 110 |
| Media allocation | 111 |
| A model formulation | 112 |
| Product range | 112 |
| Competitive tendering | 114 |
| Static bidding | 116 |
| Games and hypergames | 118 |
| Level of approach in conflict problems | 118 |
| Implications for formal analysis | 119 |
| Summary | 123 |
| 10. THE PROBLEM OF FORECASTING | 124 |
| Futures forecasting | 128 |
| Economic forecasts | 130 |
| Social forecasting | 131 |
| Technological forecasts | 132 |
| Political factors | 132 |
| Energy forecasts | 133 |
| The pervasive social factor | 134 |
| A synthesis | 135 |
| 11. SIMULATION PRINCIPLES | 138 |
| 12. ORGANIZATIONAL OBJECTIVES | 145 |
| Organizational objectives as they exist | 146 |
| An alternative approach | 152 |
| An ideal formulation of objectives | 154 |
| The responsibility of the researcher | 156 |

| | |
|---|-----|
| 13. SUMMARY | 158 |
| Difficulties in the operational research approach | 158 |
| Variety of models | 160 |
| Objective free and objective constrained models | 162 |
| REFERENCES | 167 |
| INDEX | 170 |
